ACKNOWLEDGEMENTS

I would like to extend thanks to the many people, who so generously contributed to the work presented in this thesis.

Special mention goes to my enthusiastic supervisor Professor Suresh Balakrishnan, Ph. D. from Department of Zoology, Faculty of Science, The Maharaja Sayajirao University of Baroda whose help, stimulating suggestions and encouragement helped me in all the time of research and writing of this thesis.

The completion of this study would have been not possible had I not been dependent on the steadfast support and encouragement of my wife (Payal Dalal) and son (Dharmayu Dalal). They hence paid equal contribution to the study for which I always feel profound gratitude in my heart.

Similar, profound gratitude goes to Dr. Abhay Deshpande, who has been a truly dedicated mentor. I am particularly thankful to Dr. T.G. Marvania for his constant faith in my lab work, and for his support.

I also owe my special thanks

to Dr. V.K. Tiwari for his experimental experiences at the beginning of the research;

to my colleagues Miss. Neelam Patel, Miss. Ritu Chhimwal, Mrs. Bhavana Prajapati, Dr. Uday Kapurkar, Dr. Chintamani, Mr. Partha Bose and all the staff of Department of Toxicology, Jai Research Foundation for kind cooperation during the research;

to Mr. Pratyush, Mrs. Mital, Mr. Pranav, Mr.Shashikant, Mrs.Hiral, Ms.Sonam for helping in my thesis writing and editing.

Finally, but by no means least, thanks go to mum and dad for almost unbelievable support. They are the most important people in my world and I dedicate this thesis to them.

Vishvesh Dalal
