LIST OF FIGURES

Figure Nos.	Title	Page Nos.
1	Life cycle of HIV	20
2	The structure of HIV-1 RT in the region near the polymerase active site.	23
3	Molecular surface diagram with NNIBP & TIBO derivative	34
4	TIBO (119) positioned in the NNRTI-binding pocket of HIV-1 RT	34
5	Molecular surface diagram of NNIBP with loviride analogue	35
6	Molecular surface diagram of NNIBP with ITU	36
7	Binding modes of DATA analogue	38
8	Different binding conformations of TMC-125 observed in mutant species of the reverse transcriptase enzyme.	40
9	The binding modes of TMC-278 (138).	41
10	The evolution of 2-aminopyrimidnes	42
11	Computed structure for (141) bound to RT	44
12	Compound (S)-(144) (colored by atom type) docked into the HIV-1 RT NNBS.	46
13	The composite binding pocket of the NNRTI active site of HIV-1 RT	48
14	Schematic diagrams showing the contacts between HIV-1 RT and inhibitor R157208 and R165481	49
15	Schematic diagrams showing the contacts between HIV-1 RT and inhibitor R221239 respectively	50
16	Adhesion, activation and thrombus propagation	104
17	life cycle of malaria parasite	147
