List of Tables:

Table 2.1: List of genes implicated in Parkinson's disease.

Table 7.1 A: The miRNAs target nuclear encoded mitochondrial subunits.

Table 7.1 B: The pathways affected by up-regulated miRNA in presence of TNF.

Table 7.1 C: The biological process modulated by upregulated miRNAs in presence of TNF-α.

Table 7.1 D: The biological process modulated by down regulated miRNAs in presence of TNF-α.

Table 8.2.1: The putative targets of miR-5701 are involved in mitochondrial quality control and lysosomal degradation pathway.

Table 8.2.2: The functional annotation of putative targets of miR-5701.

Table 8.2.3: The biological process modulated by miR-5701.

Table 8.2.4: The cellular localization of putative targets of miR-5701.
