CONTENTS

	Page no.
CHAPTER – 1	
INTRODUCTION AND BACKGROUND INFORMATION	1
Desert Margin	3
Geomorphology and tectonic setting	8
Climate	11
Stratigraphy	11
Central Himalaya	18
Study area and climate	23
Scope of the present thesis	24
CHAPTER – 2	
EXPERIMENTAL DETAILS	26
Luminescence dating	26
Age estimation	28
Optical dating	31
Pretreatment procedures	32
Multiple aliquot additive dose procedure	34
Single aliquot regeneration procedure	38
Single aliquot additive dose procedure	38
Luminescence and radioactivity measurements	40
Anomalous fading	40
Preheats	41
Dose rate estimation	42
Error estimation	42
Radiocarbon dating	42
Experimental procedures	43
Climate proxies	45
Mineral magnetic	45
Geochemical parameters	46
Organic carbon estimation in dunes	47
CHAPTER - 3	
CHRONOLOGY OF DRY LAND SEDIMENTS	48
Fluvial sequences	48
Sabarmati Basin	48
Scroll plains	50
Depositional environment	52
Chronology and palaeoenvironments	53
Mahi Basin	57
Depositional environment	61
Chronology and palaeoenvironments	63
Orsang Basin	67
Depositional environment	69
Chronology and palaeoenvironments	71

Aeolian sequences 75
Sabarmati Basin 76
Mahi Basin 78
Orsang Basin 80
Chronology 80

CHAPTER - 4
CHRONOLOGY OF LACUSTRINE SEDIMENTS IN CENTRAL HIMALAYA
Garbayang 85
Geology and Geomorphology 87
Sedimentology of lacustrine deposits 89
Magnetic susceptibility and S-ratio 95
Geochemistry 97
Chronology 97
Radiocarbon dating 97
Infra-red luminescence dating 99
Palaeoenvironmental inferences 102
Goting 106
Geology and Geomorphology 106
Physical stratigraphy and sedimentology 109
Magnetic and geochemical studies 111
Chronology 114
Palaeoenvironmental inferences 116
Evidence of Quaternary seismicity 118
North-South extension 122
East-West extension 127

CHAPTER - 5
DISCUSSION 132

CHAPTER - 6
CONCLUSIONS 151

REFERENCES 160
