Summary		
Chapter 1.	**Introduction**	**1-72**
1.1	General Introduction	01
1.2	Hypothesis and Objectives of the present work	39
1.3	References	44
1.4	Abbreviations	**73**
Chapter 2.	**Binuclear complexes with σ-bonded bis(oxamide) bridges**	**74-110**
2.1	Introduction	74
2.2	Experimental	76
2.3	Results and Discussion	79
2.4	References	107
Chapter 3.	**Complexes of bis(oxamido) hydrazones with amino acids: Synthesis, characterization, Magnetism and Electrochemical studies.**	**111-143**
3.1	Introduction	111
3.2	Experimental	113
3.3	Results and Discussion	117
3.4	References	142
Chapter 4.	**Angular Trinuclear Complexes with bis(oxalo)dihydrazones of aromatic aldehydes: Effect of End Group variation.**	**144-186**
4.1	Introduction	144
4.2	Experimental	150
4.3	Results and Discussion	153
4.4	References	183

Chapter 5. **Linear trinuclear complexes with aromatic bridges: Synthesis, Characterization, Redox Properties and Magnetic Exchange.** **187-223**

5.1 Introduction 187

5.2 Experimental 192

5.3 Results and Discussion 197

5.4 References 221

Chapter 6. **Trimetallic Cu_2Fe complexes with a Ferrocenoyl ligand: Synthesis, Characterization and Electrochemical Studies.** **224-251**

6.1 Introduction 224

6.2 Experimental 228

6.3 Results and Discussion 229

6.4 References 247

Chapter 7. **Trinuclear Copper(II) complex with myo-inositol: A low molecular weight complex as hydrogelator.** **252-270**

7.1 Introduction 252

7.2 Experimental 254

7.3 Results and Discussion 257

7.4 References 266

Conclusion. **271**

Publication.
