List of Tables

Table 1.1. Generalized stratigraphy of Saurashtra region

Table 2.1. Facies classification, brief description and interpretation

Table 3.1. Notch parameters as measured in Babarkot and Diu Island

List of Figures

Figure 1.1. Study area.

Figure 1.2. Map showing the major geomorphologic subdivisions of Gujarat

Figure 1.3. Tectonic framework of the Saurashtra peninsula

Figure 1.4. Geological map of the Saurashtra peninsula

Figure 1.5. Distribution of different litho-units exposed along the coastal tracts in the study area

Figure 2.1. Types of aeolian stratification

Figure 2.2. Types of bounding surfaces

Figure 2.3. Hierarchy of bounding surfaces

Figure 2.4. Plane Laminated facies

Figure 2.5. Cross-stratified facies

Figure 2.6. Tabular sets of low angle cross-laminae

Figure 2.7. Karst facies

Figure 2.8. Paleosol facies

Figure 2.9. Pinkish buff colored Miliolite facies and Shell limestone facies

Figure 3.1. Nature of Miliolite cliffs

Figure 3.2. Joints, solution channels and Miliolite platform

Figure 3.3. Gopnath cliff profile

Figure 3.4. Cliff profiles in Babarkot

Figure 3.5. Cliff profiles in Diu Island

Figure 3.6. Marine Notches

Figure 3.7. Bioerosion and Bioconstruction

Figure 3.8. Marine and sub-aerial erosion

Figure 3.9. Mechanisms of sub-aerial processes of cliff erosion

Figure 4.1. Lateral facies mapping

Figure 4.2. Lateral facies mapping

Figure 4.3. Lateral facies mapping

Figure 4.4. Lateral facies mapping

Figure 4.5. Lateral facies mapping

Figure 4.6. Wind regime

Figure 4.7. Stratigraphic evolution of the coastal Miliolites of southern Saurashtra

Figure 4.8. Composite cross-section of cliffy coast between Babarkot and Diu
