विद्या विवादाय धनं मदाय शक्तिः परेषां परपीडनाय ।

खलस्य साधोर्विपरितमेतत् ज्ञानाय दानाय च रक्षणाय ॥ (नवरत्नम्/7)

The education/knowledge of an evil person is for dispute, his riches are for pride and power is for torturing/ tormenting other people. On the other hand, the education of a noble person, education is for knowledge, riches for charity and power to save others.

(*naitika manjusa*, p. 564, sl No. 1664)

I have taken the greatest interest in the question of education because I consider it to be the basis of every improvement and of every marked progress of civilization. Unless the rulers and the ruled are intelligent and are able to understand each other's motives, it is impossible to have sympathy between the two. And in absence of sympathy it is impossible to carry on any important work without friction and difficulties....it cannot be a matter of surprise if the best endeavors of the administration are not adequately appreciated.

(Speeches & Addresses of His Highness Sayaji Rao III, Vol II 1911-1927, Pub. in 1927 from Cambridge, pp 342-343)

H. H. Sir Pratapsinhrao Gaekwad (29th June 1908 – 19th July 1968)

His Highness Pratapsinhrao Gaekwad was an able administrator, who was properly trained in administration by His Highness Sir Sayajirao Gaekwad - III himself. He was consecrated on 7th February 1939. During his period, the New Constitution was approved in 1940. It was viewed for the welfare of both kingdom and subjects. In 1940, the Shantadevi Trust & the Padmavati Trust for Welfare of T.B. Patients were approved. The M.S. University of Baroda was established in 1949. He said at that time "experts are to be trained from our own people." He also signed the proposal of dissolution of private states.

अलसस्य कुतो विद्या अविद्यस्य कुतो धनम् ।
अधनस्य कुतो मित्रममित्रस्य कुतः सुखम् ॥

(आलसी को विद्या कहाँ, अनपढ़/मूर्ख को धन कहाँ ।
निर्धन को मित्र कहाँ और अमित्र को सुख कहाँ ॥)

A lazy person can never acquire knowledge or a Skill, and such a foolish person can never acquire wealth and remains poor.
A poor person has no friends and how can such a person remain happy in his life?

Taking inspiration from the above subhasita and the ancient Indian scriptures, there is no doubt in the fact that education is the only means to reach to excellence. There is no point in being lazy or procrastinating things which can be accomplished today. Procrastination only delays the progress. What good shall it be for a person to be of high social stature but devoid of education? Education should be so revolutionized as to answer the wants of the poorest villager, instead of answering those of an imperial exploiter. It is very correctly thought that education to a person is what fragrance is to flowers. With this conviction in the power of education and hard work, and the zeal to be fragrant among other prestigious educational institutes, we began working afresh on this year's Annual Report for the year 2019 - 2020.

The preparation and presentation of the Annual Report of the Maharaja Sayajirao University of Baroda (MSUB) is the resultant outcome of critical reviews and reflections on Academic, Research, Extension, Curricular, Co-Curricular as well as Social Outreach, and various other developmental activities of the university. (A student while pursuing education should contemplate to gainfully utilize every single moment of his/her time and an entrepreneur while pursuing acquisition of wealth should take care of even the smallest unit of money, because by sacrificing valuable time and small sums of money there are no chances of becoming learned and acquire wealth.)

It is my privilege to share some thoughts as the Convener of the 71st Annual Report of The Maharaja Sayajirao University of Baroda. It is my profound joy to be associated with the Annual Report Committee in capacity of the Convener as it keeps me updated with all the latest additions to the University's functioning.

This year, the Annual Report preparation was a bit different than usual. It took a lot of contemplation on the end of the team to figure out the methodology of compilation of the report. The academic year 2019-2020 was indeed very challenging as most of the year was spent under lockdown. I thought it worthwhile to reflect over the purpose for all this hard work and how it can be used to make a difference to the society. It is rightly said that any progress is based on dreams and requires change. With this constant thought in mind, this year, we have put in our best efforts in bringing out this 71st Annual Report. The Annual Report, this year, highlights some of the prominent research and academic achievements, along with the other major administrative reforms and educational activities carried out during the year 2019-2020. It provides an opportunity to reflect on the significance of academic research, educational achievements and effective governance and the contribution that The Maharaja Sayajirao University of Baroda makes in assisting the city's transformation into a knowledgebase. The Maharaja Sayajirao University of Baroda has always taken initiatives in the field of teaching and research and has been in the limelight in the areas of extension and co-curricular activities. The significant academic growth of our University is an indicator of the inherent effectiveness of this great institution and of the excellence of the human resources.

Self-belief is extremely important for progress. Sincerity is a sign of such self-belief. The ability to accept, evaluate, adapt and adopt new ideas is very essential. Keeping this in mind, our University has put in huge efforts to generate ideas among students and teachers during the year. The University has received considerable grants during the year from various agencies for development and research activities. To enhance the teachers' and researchers' potential, various faculties and institutions have organized and conducted regional, national and international online seminars and conferences during the year. A good number of research projects have been approved with generous grants in each case. Many teachers from various faculties have been granted financial assistance for participation in conferences and seminars, abroad. During the year 2019-20, many of our faculties and institutions have done a remarkable job and under the able leadership of Prof. (Dr.) Parimal Vyas, Honourable Vice-Chancellor of our University, and we have made an effort in collecting entire information for Annual Report online (ARMS) again this year. The details about the decisions of Board of Studies and Faculty Boards, The Opinions, Suggestions and Feedback from Alumni, Parents and Students, the awards and felicitation of individual teachers, the PhD information and

unique features of every academic institution have also been incorporated in the Annual Report. We have also made very important progress in the area of Alumni Cell with special emphasis on Alumni activities and their online registrations. We also, continuously, keep on organizing intramural and extramural activities through various faculties and departments. National Service Scheme (NSS), NCC, Physical Education and various academic cells and institutions have incessantly worked for the benefit and overall development of the students, throughout the year. This year, owing to the Coronavirus Pandemic, the university undertook the mammoth task of conducting online examinations for the final year students online. This was a great achievement for the university and it also showed our firm belief in the power of technology and digitalisation.

The students showed their inclination towards research and innovation, which is very well evident from number of doctoral degrees awarded during the year 2019-2020. To promote health and fitness and to encourage sports activities, the university always encourages and supports students' participation. Students of various faculties have participated in state and national level tournaments in various sports disciplines, individually and in teams. Career counselling centres for students have also been developed and all Students' activities have been positively emphasized by all faculties. The Institute of Leadership and Governance organized various need-based educational programs for the benefit of the students at large. To meet the industrial requirements, the students have also been trained accordingly leading to secure placement with various Government, Private and Multinational Companies. The Maharaja Sayajirao University of Baroda has also strengthened its ties with the various industries and corporate in and around the city of Vadodara as well as the state of Gujarat and the national level.

The University has taken a great initiative in the field of higher education and actively participated in promoting National Education Policy and has organized number of programs to create awareness about new education policy. We acknowledge the efforts and hard work of our staff members for making this University a Centre of Excellence. The university is also committed to work for the upliftment of nearby community by adopting number of villages. Series of rural development & awareness programs were arranged as a part of Unnat Bharat Abhiyam.

The Hansa Mehta Library of The Maharaja Sayajirao University of Baroda has added 9,346 books making the total collection of books to 8,82,152 during the year 2018-19. A total of 15,000+ e-Resources have been added to the Library for facilitation of teachers and students which include e-Journals and e-Books. The library also has the facility of Open Knowledge Gateway (OKG) which provides access to free academic resources without geographical boundaries.

The University has introduced several progressive steps towards digitization of administrative processes and other technological advancements. We have efficiently managed students' cycle from admission to obtaining mark sheets in programmes where they have sought admission. An interesting e-Initiative of the university is MSU Examination Portal [MEP] for examination related activities with minimum use of paper. The recruitment of teaching and non-teaching staff is also a completely online process. Online Human Resources Management System (HRMS), which is an effective tool to unify, control and maintain the employee life cycle is also in use. This year, an online mechanism of Performance Appraisal of staff has also been undertaken in digital format to ensure continuous improvement of the staff and greater good of the beneficiaries.

Apart from managing students' requirements, various Staff Development Programs have also been organized in the year 2019-2020 for our Teaching as well as Non-teaching Staff.

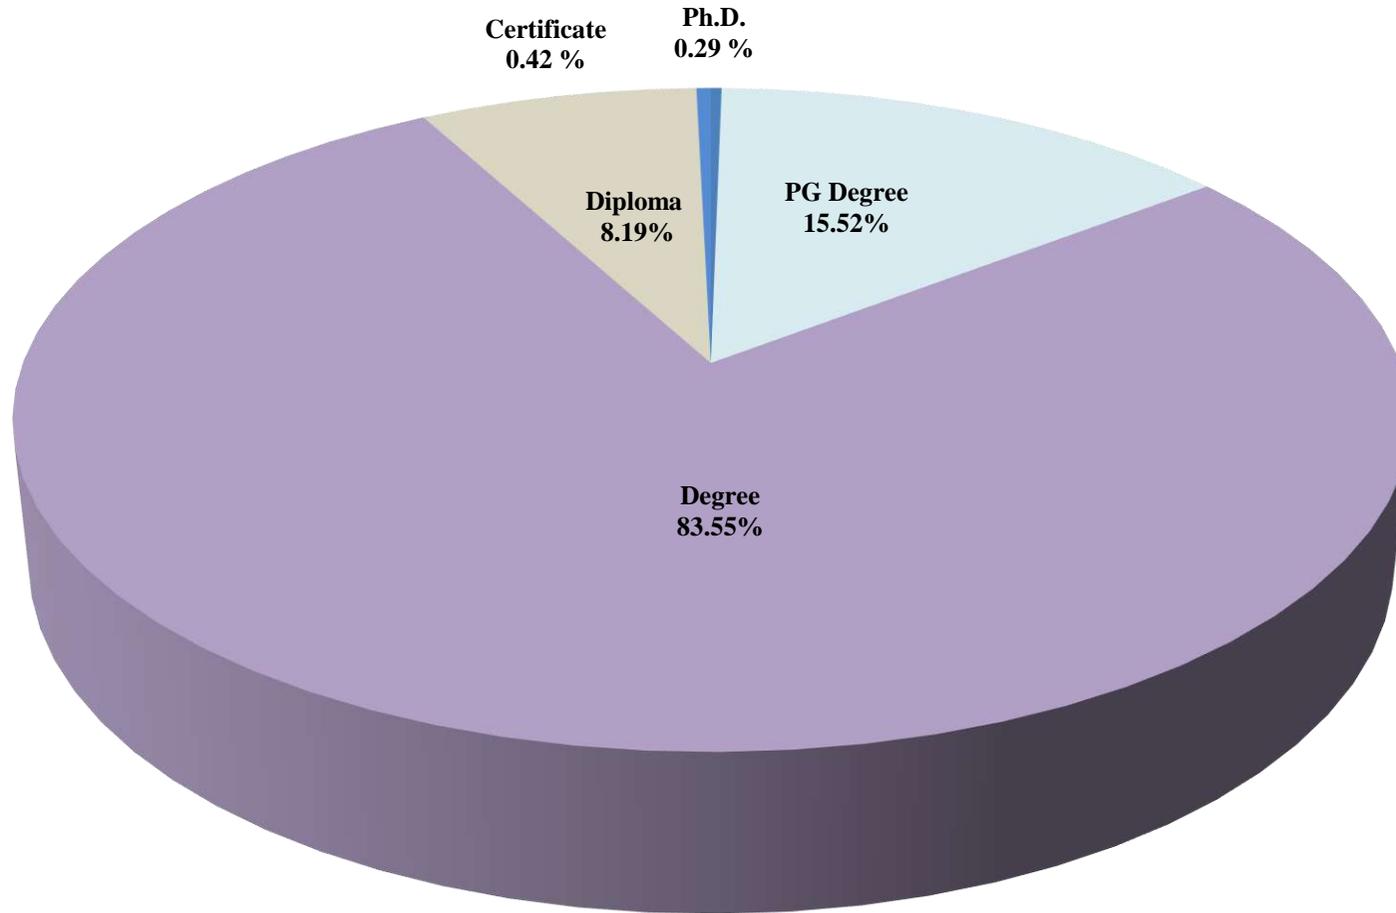

I am grateful to the Development Officer, GCU Section, Dr. Viral Kapadia, Dr. Arun Anand, all faculty level coordinators and University Officials, University Press in completing the compilation of this Annual Report.

I wish that The Maharaja Sayajirao University of Baroda reaches the pinnacle of excellence and proves to be a model University to other universities not only in the state or the country but on the global front as well.

1 INTRODUCTION

A premier institution of teaching and research in languages, social sciences and the humanities, the Faculty of Arts, owes its genesis to The Baroda College, established in 1881 by H. H. Maharaja Sayajirao Gaekwad – III of the erstwhile Baroda State. The Faculty is sanctified by the name of the seer and philosopher, Sri Aurobindo Ghosh, who had been appointed by Sir Sayajirao to teach English and also as the Vice-Principal of the erstwhile Baroda College.

The alumni of the erstwhile Baroda College and the present Faculty of Arts included well-known personalities like Acharya Vinoba Bhave, Shri Rang Avadhoot, Shri Mota, Shri K. M. Munshi, Kakasaheb Kalekar, Shri Rajendra Shah, Dr. M. N. Srinivas, Dr. B. Subbarao, Dr. I. G. Patel, Dr. V. Y. Kantak, Dr. Suresh Joshi, Dr. Sitanshu Yashashchandra and others.

The founding vision of the Faculty was charted, realized, and furthered by eminent academicians and stalwarts in different disciplines, and it remains committed, through its sustained efforts, to the enhancement of this rich tradition as well as the expectations and demands of the present day changing environment. Among other institutions in the region, the position of the Faculty of Arts is distinguished by the wide variety of disciplines in which it imparts training and knowledge.

The Faculty has always endeavoured to establish a network of intellectuals with a view to contributing to the cause of knowledge and imparting education, responsive to the changes taking place in the field of knowledge and technology, to encourage multi and interdisciplinary research, to introduce and develop courses, bringing them in line with contemporary theoretical developments and also relate them to societal concerns and issues. It also attempts at promoting and developing educational opportunities in tandem with the demands of social justice.

In an endeavour to bringing all its Programmes in line with the proposed uniform pattern all over the state and the country, with effect from the Academic Year (2011-2012), the Faculty of Arts introduced a Choice Based Credit System (CBCS), initiated by the National Knowledge Commission, University Grants Commission and the Association of Indian Universities.

importance of the Himalayan region to Asian security and prosperity, and how destabilizing factors in the region can adversely affect Indian interests. Furthermore, India must pursue an integrated approach along with friendly States and peoples in the Himalayas to help address the myriad strategic and security issues that the region is facing in today's changing geopolitical landscape. Longstanding border disputes and strategic rivalries in the area mean that new connectivity schemes – both infrastructural and economic – are laden with geopolitical significance and security implications. India could benefit from taking on a more active role in influencing the emerging strategic and economic geography of the Himalayan region and developing a common agenda on some the key issues like Security, Regional Connectivity to enhance trade and commerce, Climate Change, Cultural preservation etc. with friendly states and populations in the region. One-day Symposium seeks to discuss the multifaceted dimensions of the Himalayas and its impact on the Geopolitics and Geo-strategy of the region, with special reference to India

Education and Psychology*

5. Faculty of Education and Psychology

Department of Psychology

The Department of Psychology at the M. S. University of Baroda is one of the oldest and strongest departments in the Western India. The Psychology Department was started in 1952. Prior to this, Secondary Teacher Training college ran courses in Educational Psychology, Educational and Psychological Measurement, Experimental Psychology and Statistics. The STT college also had a laboratory of Experimental Psychology since 1935. With the establishment of the Maharaja Sayajirao University of Baroda on 29th April 1949, the Student Teacher Training college was incorporated into the University and the Faculty of Education and Psychology was established as one of the faculties of the University. However, in view of the progressive development as well as various specializations in courses and also increasing number of students interested in basic and other applied fields of Psychology, a separate department of Psychology was setup in 1952.

Since its inception, the department has grown tremendously both in the sphere of teaching as well as research. The department undertakes various functions of teaching as well as research and guidance. A separate guidance and counseling center catering to the needs of student community was attached within the department till 1965. Over a period of time the enrollment of students opting psychology has increased manifold, from 8 students in 1952 to 500 approximately in 2016, at undergraduate and post graduate levels. Besides this, department also helps other disciplines such as Performing Arts, Fine Arts, and Medicine in teaching Psychology and research methodology. The number of students undertaking research at the post graduate level as well as enrollment for Ph.D. has also increased considerably over a period of time.

Vision : Department of Psychology is dedicated to provide an exceptional scholarly and intellectual environment to serve our students, professionals, and community. We will strive to promote new directions, partnerships and programs that will enhance personal, professional and academic skills of our students and faculties.

Mission : Department of Psychology will continuously and relentlessly work to provide excellent learning and training in the science and practice of psychology. We will emphasize both research based and applied experiences in our curriculum. We will develop educated individuals who are competitive in knowledge and job market. We will integrate teaching, research, and practice by involving students in classroom activities, research projects, consultancy projects and field based experiences. This mission will be accomplished through committed and enthusiastic faculty and staff who are dedicated to high quality teaching, research and service to the university and community.

Counselling centre : The students actively engage in conducting psychological tests such as IQ evaluation, personality, aptitude, interest as well as learning disability tests for clients of various age groups. They engage in career counselling and also assist in cases with severe mental health related issues.

Department of Education

The Department of Education is well known as a Centre of Advanced Study in Education (CASE) since 1965. It provides academic leadership in the field of Education in the country. The Department of Education also has been raised to the status of IASE by MHRD, New Delhi. The Department has been organizing various need based training programmes for the teachers of schools and faculty members of DIETs, PTC & B.Ed. Colleges. The Department is vibrant in organizing continuous academic programmes for undergraduate, postgraduate and research students. It also conducts state and national level Workshops/ Seminars and provides academic platform for educationist of India and abroad. The department has been offering academic services to support Gujarat State Government and also MHRD on various developmental projects in Education. Department of Education has adopted modern teaching-learning processes by implementing Mobile learning and Webtools 2.0. Our teachers have been using Google Classrooms, Moodle, Blogs, and Social Media for better dissemination. Information is free so rather than providing information, we focused on providing better experiences in the classroom. Flipped models of teaching are implemented successfully in Science, Communication and English subjects. The concept of Bite-size learning is applied to the FY B.Ed. students for the development of their language through WhatsApp which gave satisfactory results. Our teachers kept on learning new edu-tech by attending webinars, seminars and workshops at state and national level to update their knowledge base on innovative teaching. Assignments have been submitted by the students in video, audio and other media.

1 INTRODUCTION

INTRODUCTION

From the humble beginnings in December 1948 the Faculty has evolved into a premier institute encompassing dynamic fields of study. The faculty comprises of Composite Programs along with eight major fields of specialization.

- Clothing and Textiles
- Extension and Communication
- Family and Community Resource Management
- Foods and Nutrition
- Human Development and Family Studies
- The Chetan Balwadi
- Women's Studies Research Center
- Institute of Fashion Technology

Over the past six decades since its inception (1950 51), the faculty has made conscious efforts toward redefining and broadening its view in response to the rapidly changing national and global scenarios. Grounded in the philosophy of ensuring individual, family and social wellbeing, the programmes offer a judicious mix basic and applied disciplines. Based on its unique disciplinary perspective, each department trains students to understand the interface between micro and macro level issues in their social political and technical environments.

The major objectives of the Faculty of Family and Community Sciences

To create a class of professionals in the five major fields, which are Clothing and Textiles, Extension and Communication, Foods and Nutrition, Family and Community Resource Management and Human Development and Family Studies, suitable for Government, Industries, voluntary organizations and self-employment.

To train the students and widen their horizons by exposing them to micro and macro level issues in the changing scenario of the social technical environment.

Benefits and Opportunities

Students are encouraged to develop their faculties through independent learning and research under the constant guidance of able and qualified teachers. At the end of the program our students emerge as well rounded personalities with a clear perspective and abilities to undertake their role as professionals and entrepreneurs. In addition, graduation in this faculty also opens up new avenues for professional development in various fields such as Social Work, Hotel Management, Interior Design, Food Industries, Public Health and Dietetics, Textile and Fashion Industries, Communication, Journalism and Education.

Department of Clothing and Textiles

The Department of Clothing and Textiles has an illustrious existence of 61 successful years and has earned research grant under UGS DRS SAP I. Ever since its inception in the year 1957 it has offered to the society an enlightened body of alumni who have been placed at various levels of the Clothing and Textile industry.

- A strong and updated interdisciplinary curriculum trains the students to develop proficiency to be designers, quality controllers, merchandisers, consultants, stylists, entrepreneurs and teachers. A fact that is reiterated with the knowledge that our alumni hold premier positions in many national and international academic institutes. The curriculum at UG and PG levels exposes student to field trials at research, lab, industry and grass root levels. The curriculum design incorporates a 'Hands on' learning approach in real life situations through 'on job training', 'internship' and 'field work' during each semester of the UG and PG program.
- The department has well equipped Clothing, Textile and Design labs and is also proud of housing a "TEXTILE ART MUSEUM" under its roof. The laboratories are updated with instruments of industry standards as per the requirements of the modified curriculum. The faculty and students have a sound research background with most of the regular staff possessing a Doctorate degree and the Department has a grant of 10 fellowships for research.
- Academically inclined, conceptually strong and enthusiastic faculties of the department mould the students to contribute meaningfully to Academics, Research and Extension.

Department of Family and Community Resource Management

During the internship the students get hands on experience and are prepared and trained for the typical work environment and thus developed the needed skills and competencies required for the relevant profession.

The faculty members of the department have authored and co authored various books. The staff members have participated in International/National level Seminars/Conferences and published several papers in International and National Journals and Edited volumes. The department was also actively involved in the community outreach program by way of extending its expertise in improving quality of life of individuals and families by delivering talks organized by Knowledge Consortium of Gujarat, Indukaka Ipcowala Institute of Management (I2IM), Charotar University of Science and Technology, CHARUSAT Campus, Changa, Gujarat Indian Women Scientists Association, Baroda Branch in association with Shukla Yajurvediya Mandhyadin, Maharastrian Brahmin Mandal, Vadodara, and S. Many of the students were also offered jobs at various firms and institutions off campus. Students were exposed to the practical knowledge through the trips, field, site visits and educational visits under the courses of their curriculum. Open House was organized for First year students wherein the accessories and products designed by students and the work done by them under various courses studied were displayed. Several workshops and Expert lectures were also organized for the students for better understanding of the concepts and updating them about current trends in the field.

II. PROPOSED CHANGES TO M.Sc. HDFS CURRICULUM (Applicable LSD and CDESD specializations)

a. Proposed that the course HDF 2307 CBCS: Science and Art of Parenting (2cr) offered in the 3rd semester (FSMSC-II) be replaced with a new course titled "Friendships and Romantic Relationships" (2cr) from Academic Year 2020-21.

I. Curriculum revisions in M. Sc. (HDFS): New Specialization 'Child Development And Education For Sustainable Development' (CDESD)
MASTERS' DEGREE COURSE ON 'CHILD DEVELOPMENT AND EDUCATION FOR SUSTAINABLE DEVELOPMENT' (CDESD)

Perspective, Rationale and Aims

The proposed course titled, 'Child Development and Education for Sustainable Development' (CDESD) is created at the critical intersection of optimizing childhood development and attempts to achieve the Sustainable Development Goals (SDGs) by 2030. The course focuses on creating competent Child Development Professionals who understand the significance of contributing to the SDGs. The course assumes that human beings and their developing potentials lie at the crux of achievement of SDGs at national and global levels. Inputs in the early years go a long way in ensuring the achievement of many interconnected SDGs.

The proposed course aligns its objectives with the UNESCO (2009) definition of Education for Sustainable Development (ESD) in global contexts, stating that ESD is a holistic package that commits to the principles of sustainability across all levels of education. Particularly, it focuses on quality learning and educational outcomes that enhance human development by engaging with issues that can reduce poverty, ensure gender equality, social justice and respond to environmental issues of climate change and sustainable livelihoods. In line with the ESD goals, the course will train students in the five fundamental types of learning- learning to know, learning to be, learning to live together, learning to do and learning to transform oneself and society. After taking the course, students will be able to

transfer appropriate knowledge, skills, attitudes, values and behaviours such that people develop their capacities to engage with sustainability issues and can creatively design alternate methods of living with reference to particular contexts of governance and cultural participation.

In spite of mammoth efforts over fifty years, there has been little progress in ensuring quality ECCE programs in India and the developing world, at large. The feedback loop of path breaking research, theoretical understanding of childhood across cultures, and current programs, policies, and practices has been rather weak. These gaps have left us with inadequately informed social intervention and education programs for children that remain far removed from the goals of sustainable development. On the flip side, there is an increasing demand for child care programs and practitioners due to a number of socio-economic factors. For example, lack of strong ECCE policies leading to proliferation of unlicensed, poor quality early childhood programs and practitioners.

The course thus aims at creating well-trained Child Development Professionals who can give specialized inputs into culture, context and gender sensitive program innovation, preschool teacher education, and other significant components of childhood education. The course focuses on important connections in the SDG network with issues that affect children, families and communities. Along with a strong focus on children's rights and value education, the course attends to issues of diversity, vulnerable communities and disadvantaged contexts. Overall, the course proposes to create professionals ready to create new opportunities and respond to the challenges of child rearing in the 21st century.

The course structure reflects three key dimensions of theory, research and application focusing on the childhood years (0-12 years). The courses in the program broadly focus on infancy, early childhood and the school years. There is special emphasis on counselling, developmental assessment and program evaluation skills. The courses are distributed across the two year (four semesters) program.

As Part Of This, The Center Had Organized A Debate Competition For The Students Of The Maharaja Sayajirao University Of Baroda. A Total Of 10 Students Were Participated. The Theme Of The Competition Was 'Should We Talk More About Menstruation?'.	Dr. Mrunalini Devi Puar Auditorium, Faculty of Family and Community Sciences	March 04, 2020	9
2	The Session Started With A Question "What Is Science?" Dr. Varughese Explained The Differences Between The Small And Big Science And How It Is Connected With Society. Science Is Not Simply A Closed Circle Which Has No Connection With Society. The General Notion About The Science Was That They Were The Authority Of Knowledge. Ideologies Of Gender, Nature Society And Science Developed Over Different Eras Have Resulted In The Exclusion Of Gender From Science. Analyzing Gender In Science Has Two Levels: Counting How Many Women Are Participating In Science As A Labour Force And The Second Is Critically Examining The Knowledge Produced In Science. The Arguments Supporting These Developments Are Either Using The Efficiency In Economic Terms, Human Rights, And Quality In Terms Of Scientific Excellence. Recent Research Explored How To Measure Those Structural Causes And How To Implement Structural Change To Improve Women'S Participation In Research. As Gender Studies As A Discipline Grew Out From Humanities And Social Sciences Transformation Of Stem Research And Knowledge Production Is Still At The Beginning. He Was Giving Examples From The Science About The Influence Of Society And Social Movement In Shaping Of Science. The Session Ended With	Women's Studies Research Center	September 19, 2019	25

Session Theme: Concept of Gender; Gender as a System; Concepts of Equality and Equity

Session Expert: Dr. Subair Kalathil

Date: August 19, 2019

The session included meaning of gender, difference between gender and sex, the process of socialization/gendering, knowing and learning gender as a system, concept of Gender Equality and Equity. The sessions had equipped participants with introductory knowledge and tools that had enabled them to recognize potential gender issues and to begin to determine how they should be addressed throughout. This session covered various gender related definitions and concepts: It reviewed and explained key concepts on gender, social construction of gender, gender roles and stereotypes and gendered institutions and structures which sensitize participants on how gender is socially constructed and how it shapes masculine and feminine identities, behaviors, attitudes and practices with particular reference to gender inequalities. Gender equity and gender equality plays important role when we talk and discuss about gender development. It was stated that gender equality refers to absence of discrimination on basis of person's sex in opportunities, allocation of resources and benefits, access to services whereas gender equity refers to fairness and justice in the distribution of benefits and responsibilities by recognition of different needs and power and addressing these to rectify the imbalance between sexes.

Sessions Theme: Gender Socialization and Identity Formation

Sessions Expert: Dr. Subair Kalathil

Date: August 20, 2019

The session incorporated gender socialization and identity formation, gender division of labor, gender and development and need of gender sensitization, gender analysis and gender mainstreaming. Gender socialization is the tendency for boys and girls to be socialized differently. The difference with which children are addressed, handled, treated and clothed and through this regulation taught how they should behave to be part of the society they are born into and in which they live. The process of socialization includes manipulation/molding, canalization, verbal appellations, activity exposure, societal prescriptions (dress, roles and responsibilities, attributes etc.).

The division of labor in societies is directly tied to socio-cultural patterns, which determine the tasks that women and men should perform. The division is generally divided into three parts production, reproduction (biological, social, economic), and community. It leads to gendered division of skills, hierarchies and inequalities as work is not valued and rewarded equally, men assume control over land, capital, technology, etc., to challenge the division of labor means to challenge the definitions of men and women in the society. The need and importance of gender sensitivity was also discussed. Being gender sensitive simply means being sensitive and caring and being against and opposing injustice and unfairness between men and women wherever it exists. The reasons why does gender sensitization evoke a hostile response would be institution of family, institution of marriage, privileges, disturbs the status quo and false consciousness. Session also talked about Gender and the hierarchical power relations between women and men.

This session was started with theoretical explanation of caste and class in the background of gender, and also explained the theory of intersectionality. Followed by a loaded discussion on it. The discussion extended on what are the sources of power. To make participant understand the existence and importance of gender, caste, education, occupation, religion etc. in our society, the known game named power walk was played. Each participant was assigned one role like Brahmin woman, Dalit man, dalit woman, Muslim man etc. and then they were asked to move further or backward with respect to given statement which enabled them to be absolutely powerless to absolute powerful with a one/many social identities.

Session Theme: Feminism and Indian Women's Movement

Session Expert: Dr. Subair Kalathil

Date: August 22, 2019

This session was divided into two parts. Session one was dealing with the overview of feminism and its origin in European and Indian context. It also discussed with the various types of feminisms, and the major difference with the each other. The section part was more into the evolution and the progress of Indian women's movements. The session gave an overview of Preamble and its important aspects that talk about sovereign socialist secular democratic, republic, justice, liberty, equality, fraternity etc. How and why there is a rise of women's studies in India was also discussed.

Session Theme: Women and Law - Session 1

Session Expert: Dr. Archana Gadekar

Date: August 26, 2019

Starting with highlights of the session, Dr. Archana Gadekar talked about rights of women from constitutional and human rights perspective. By stating a quote said by Swami Vivekanada, she emphasized that it is necessary for a country to respect its women. She said that to live in a world of equal opportunity, free from sex based discrimination and sexual harassment would be a joyous thing. However, in real sense, these all things exist only on paper. At some or the other point, women still faces discrimination and harassment. It becomes difficult to understand what the human rights are and what women's rights are. Thereafter she explained about the human rights; the basic alienable rights which we are entitled to and which are universal in nature. Dr. Gadekar focused on Indian scenario, starting from the basic document i.e. Indian Constitution. She shared about women involved in shaping the Constitution of India like Ammu Swaminathan, Begum Aizaz Rasul Durgabai Deshmukh, Hansa Mehta and so on. Then she talked about process of gender justice as explained by Justice Dr. A. S. Anand. In relation to that, she continued with the discussion on gender equality entitled through the Constitution of India. The end part of the session included 'Sexual Harassment at Work Place Act'.

Everybody is entitled to a safe working environment. Today when women steps out of her house and goes to workplace, her workplace has to be safe. Therefore, it is important to evolve a sexual harassment policy. Dr. Gadekar talked about how the Act came into existence followed by Vishakha guidelines and explained its components in detail like definitions, forms of sexual harassment, inquiry, constitution of complaints committee, penalty, etc.

Session Theme: Women and Political Science

Session Expert: Dr. Lajwanti Chatani

Date: August 28, 2019

Dr. Lajwanti Chatani started the session by infusing an understanding among the participants about the relation of gender and the discipline of political science. To understand where gender fits in this discipline, one has to understand the discipline of political science first. She said 'Gender is a political category' and explained the need of political science. Politics is based on conflict; it is the conflict of interests. If a society has harmony of interest, that society will be boring. The minute we become social, we become political because conflict of interest starts, she added. Hence, we need some arrangement to order and regulate us; otherwise, there will be a situation of conflict. She said that, Politics is conflict between 'I' and 'Others'; wherein 'I' never compromises and 'You' does compromises. It is a relationship between self and others. So which state is better, 'a state with conflict or without conflict'? In a society peaceful without conflict, you will have no say even for disagreement. She ended the session with overview of women's reservation bill and its problems.

Session Theme: Women and Psychology

Session Expert: Dr. Dhvani Patel

Date: August 30, 2019

The session began with the study of women in history. Traditional history has been written and interpreted by men in an androcentric frame of reference; it might quite properly be described as the history of men. The very term "women's history" calls attention to the fact that something is missing from historical scholarship" (Lerner, 1979, p.xiv). Approaches to study of women in history from Lerner 1992 were discussed as compensatory history, contribution history, and transitional women's history. Further, women in psychological research were explained of women as problem, female-male differences and similarities, feminist study of women's lives by Marecek, Kimmel, Crawford, & Hare-Mustin, 2003.

Theories on Psychological Gender differences were also shared in the session such as Evolutionary Theories, Cognitive Social Learning Theory and Sociocultural Theory. Gender Similarities Hypothesis states that males and females are alike on most-but not all-psychological variables. Notable exceptions are Motor behaviours (e.g. throwing distance), Aspects of sexuality (larger differences), Aggression shows moderate differences. On the other hand, Costs of Inflated claims of gender differences states Women's opportunities at the workplace, Couple conflict and communication, Analyses of self-esteem problems among adolescents. The session ended with the discussion and sharing of the two articles on gender similarities and differences and gender similarities hypothesis with the participants followed by a group discussion.

Session Theme: Women and Law - Session 2

Session Expert: Dr. Namrata Luhar

Date: September 3, 2019

Dr. Namrata Solanki initiated the session by talking about different types of crimes against women and laws to combat such crimes. The definition of domestic violence was discussed, which is comprehensively given in Protection of Women from Domestic Violence Act, 2005. With reference to Domestic Violence, there are two types of remedies, one is under criminal law and second is under civil law, she added. A brief about IPC was given to the participants. She added that it defines different types of offences and lays down punishments, but not the procedure to deal with it. For that, we have Criminal Procedure Code. Right now, we are just limiting ourselves to the offences against women and that too listed in IPC. She explained those provisions in details. The session ended with a loaded discussion.

Session Theme: Movie Screening "Baulkham Hills African Ladies Troupe"

Date: September 4, 2019

Baulkham Hills African Ladies Troupe (BHALT) is a celebration of the remarkable spirits of four African women survivors of sexual abuse, and the triumph of their improbable theatre troupe.

Four women fled from different parts of Africa to Australia in order to escape violence and abuse. They find a safe haven in Australia, but still they hold their pain silently within them. **Until they decide to join a theatre group... and speak out.** Under the nurturing guidance of theatre director Ros Horin, they collaborate to let their life stories be transformed into an extraordinary and joyously uplifting theatrical

experience. This film charts their personal journeys from trauma to healing and public triumphs, as the Troupe's show moves from a stage in western Sydney out to the world.

Session Theme: Women in Media Session 1

Session Expert: Dr. Prathiba Maitra

Date: September 05, 2019

The 21st century has offered varieties in education and knowledge, information and technology and almost an adequate expertise in almost every field. However, with this highly tech-savvy and robotic world, some unseen and unexplored emotions are attached to it. India, in particular, currently is facing the transition phase wherein, people are becoming smarter with the newest technologies (specifically, communication development technologies) but on the other side, their emotional quotient and superstition still remains a matter of concern. In such an era, 'Medium of All, Medium for All' i.e. Media, has a significant role to play as this is an age where it becomes difficult for genders in general to have their own desired space. Media like Television, Print, Cinema, Radio, New media etc. has not only built the opinions but have created a gender notion in society. Women working in media and women grasping media, both are important subjects and issues to ponder upon as they give a differentiating picture of the two groups/sections prevailing in society.

As a Media Educator, women have opportunities to sensitize people on important issues of national interest, mobilize resources, do networking, groom young minds, and strengthen personal and professional growth. Dr. Prathiba also shared about various challenges face by women in media. She has to fight the stereotypical portrayals of women in the media, cope with the new age digital participatory culture, recreate and implement appropriate drive towards media literacy and curriculum. She mentioned about 'Marshall McLuhan' who has many books on communication. He says, 'The medium is the message', means whatever is the way to treat your message is the way message is conveyed. Often women in various visual media are shown chopping vegetables, doing household chores and domestics work, which needs to be changed. Dr. Prathiba said that she teaches her students to change the typical stereotypes, change the dialogues, script, and actions. Change can be brought at all levels, she said. Anyone can create content and anyone can do being about change.

Session Theme: Women in Media Session 2

Session Expert: Dr. Nidhi Shendurnikar

Date: September 06, 2019

As a continuation of earlier session on women and media, Dr. Nidhi discussed on Gender Discourse in the Digital Space. She addressed following parts in her session:

- a) Theory - Different dimensions of gender activism and debates in the digital space
- b) Activity/Practice oriented input - How to devise an online campaign on a gender issue and Web resources on gender issues

Women's rights activists called attention to the attacks in Bengaluru as evidence of the continuing failure to address women's safety in India, despite four years having passed since the brutal assault of Jyoti Singh Pandey on 16 December 2012 in Delhi. This earlier case, popularly dubbed the Nirbhaya case by the national media in India, concerned the gang-rape, torture, and murder of a 23-year-old student on private transport taken after a night out with a friend in Delhi. The case was seen by many in India and beyond as a turning point regarding women's rights and gender justice, and in particular, gender-based violence.

Today, almost three decades after the liberalisation of the Indian economy, the development of information and communication technologies, a rapid rise in access to mobile phones, and the increasing reach of social media have provided new tools for women's rights activism, with the potential to shift the nature of activism. These changes in technology have occurred in tandem with rising educational attainment in the Indian subcontinent. Within this increasingly complex environment for thought, knowledge, and understanding, new generations of feminists and activists have begun to question the role and nature of both gender and sexuality. Through their activism, both offline and digital, this new crop of feminists have begun to challenge existing power structures in the Indian subcontinent and their impact on individuals along gender, caste, and class lines. Followed this, she conducted an activity to make the hashtags for online campaign on various gender issues

Session Theme: Women and History

Session Expert: Prof. Aruna Awasthi

Date: September 9, 2019

The session started with the introduction of the participants to know their background. The perceptions of the participants regarding history and women in history were discussed. She started the session by defining the meaning of history. There are two kinds of history. History with small 'h' is history of everyday events taking place while the later one is the recorded history. Every day history that is taking place, both men and women participate in this history. Men participate to make a meaningful presence; similarly, women are also participating to make it meaningful. The work that is being done economically, both participate in that. This further led to discussion that all women are excluded from history because

of their sex unlike men. In earlier days, women were debarred from getting educated. Women thus have become timeless creatures and since then no change have been taken place. This lead to challenge history and what had been written in that history and thus it was re-conceptualize. These discussions further lead to discussion as how we look to the history and how we judge it from masculinity point of view.

Session Theme: Women and Health

Session Expert: Prof. R.K. Baxi

Date: September 10, 2019

The session highlighted problems and issues faced and related to women's health and preventive measures for the same. Women generally live longer than men because of both biological and behavioural advantages. In Asia, these advantages are overridden by gender-based discrimination so that female life expectancy at birth is lower than or equal to that of males. Moreover, women's longer lives are not necessarily healthy lives. Conditions that only women experience and whose potentially negative impact only they suffer were discussed with the participants. Sexuality and reproduction are central to women's health: biological and social processes that carry health risks and require health care. Gender-based inequalities for example in education, income and employment limit the ability of girls and women to protect their health. Further, challenges which include reducing Maternal mortality, Unwanted fertility, Sexually transmitted infection (HIV /AIDS), Female feticide. Deadly pregnancies complications of pregnancy and childbirth are the leading cause of death in young women aged between 15 and 19 years old in developing countries.

The session also incorporated some facts such as proper nutrition is a key determinant of health, both in childhood and beyond; the nutritional status of girls is more important due to their future potential reproductive role and the intergenerational repercussions of poor female nutrition. Some other sobering facts shared were Girls that do not finish secondary education are more likely to have an earlier age of sexual initiation, engage in risky sexual behavior, and consequentially be at greater risk of dying from pregnancy-related causes. Girls in school were more likely to have heard of sexually transmitted diseases or infections than girls not in school. Girls in school were also more likely than girls not in school to boil water before drinking.

Session Theme: Women and Nutrition

Session Expert: Dr. Hemangini Gandhi

Date: September 10, 2019

The session began with -Why Malnutrition is a multi-faceted problem and Malnutrition and Productivity. Nutrition, as Dr. Gandhi puts up- Nutrition investments can help break the cycle of poverty and increase a country's GDP by at least 2 to 3% annually. Investing \$1 in nutrition can result in a \$30 return in increased health, schooling and economic productivity. Low-birth weight (LBW) infants with intrauterine growth retardation (IUGR) are far higher risk of death and more likely to be underweight or stunted in early life; a variety of developmental deficits. Maternal nutrition will improve birth weight - short and long-term benefits; reduced health care costs throughout the life cycle, increased educability and intellectual capacity, and increased adult productivity. Birth-weight is a major determinant of growth during infancy childhood, adolescence and adult life. Focusing on antenatal care will bring about a modest reduction low birth-weight especially preterm births and bring about some improvement in nutritional status. The session ended with a loaded discussion.

Session Theme: Fitness for Women

Session Expert: Ms. Vini

Date: September 13, 2019

This session was an exercise training for the participant to maintain their fitness. Ms Vini, a well know fitness trainer of Vadodara, started the session by introducing the importance of exercise in daily life. Exercise can improve your health and reduce the risk of developing several diseases like diabetes, cancer and cardiovascular disease. Exercise can have immediate and long-term health benefits. Most importantly, regular activity can improve your quality of life. A minimum of 30 minutes a day can allow you to enjoy these benefits. She added that there are many benefits of regular exercise and maintaining fitness and these include Exercise increases energy level; Exercise improves muscle strength; Exercise can help you to maintain a healthy weight.

Later this session has gone for a practical session. She energized the students to actively participate in the exercise part. Ms. Vini showed them various types of simple and advanced levels of exercise. The session ended with a discussion and sharing everyone's daily routines.

Session Theme: Gender Issues in Education

Session Expert: Prof. Sujata Srivastava

Date: September 16, 2019

The session began with an introduction to women and their role in education. Earlier women were not considered as an earning member. Education for women was considered only from a cultural aspect. But, now the society has changed. Education for women was prevalent during the Vedic period of ashram and Gurukuls. Women took up education as assistants to Rishis imparting knowledge. The medieval period saw categorization in the schools of education. Over a period of time, education for women has gained importance. Before and after independence, the National Policy for Women's Education and Subsidized Education has seen higher rate of education for women. The global revolution of the world or the computer world came in the 1980s.

There was a demand for highly skilled workers. Women on the other hand, opted for courses which were subtle, non-productive and non-financial or of any economic benefit. But slowly women were in demand for their skilled work. Education should solve the problems make the life successful. There is a need to bring about tremendous change, so that women reach the optimum level of education especially where higher education is concerned. Curriculum development on the other hand should be gender sensitive, where the content of education is important. Even today in the modern world women and men are not treated equally. Reservations for women would help and should be for the first generation learners. Reservations for women, overall weakens our system. One should prove it by their intellect, behavior and by what you are by being a woman to an individual.

Session Theme: Issues of Women in Tribal Context

Session Expert: All Participants and Dr. Subair Kalathil

Date: September 17, 2019

This is one of the interesting sessions of the course. In this session, we decided to read one articles related to tribal women's issues and share every participants' point in the classroom. We selected one high quality articles from EPW to discuss about gender issues of tribal women. The article is "Mapping Violence in the lives of adivasi women" by Kriti Sharma (2018). The article is about that the Adivasi women of Jharkhand negotiate with power structures within the family system and society, and are further entrapped in gender hegemonies that are part of larger shifts in the political economy. Their lived experiences in the urban and rural landscape of Ranchi, a Schedule V district under the Constitution, and an analysis of the enforcement of legal machinery in removing or tightening the existing disparities provide crucial insights into the socio-legal realities of the lives of Adivasi women, thereby mapping their everyday experiences of violence and the means available to address their issues.

Session Theme: LGBT and their Rights

Session Expert: Mr. Manvendra Singh Gohil

Date: September 18, 2019

Mr. Gohil, initiated the session by giving a brief introduction about Lakshya Trust, which is the first and only community based organization working for lesbian, gay, bisexual and transgender population based in Surat and Vadodara. Thereafter he talked about the concept of human sexuality, which has five main components viz. Sex, Gender Identity, Sexual Orientation, Social Role, and Sexual Role. He interacted with the participants, and explained each component in detail. Key definitions of lesbians, gay, bisexual and transgender were discussed during the session. He talked about Hijras, the age-old cultural community mainly present in South Asian countries. They are formed predominantly of men whose gender identity is female. Since Indian society does not easily accept transgender men, some join Hijra community. One of the key element that segregates the Hijra community from transgender is the Guru-chela system- a traditional system of learning things from the guru. They do dancing, give blessings to people during auspicious occasions, do begging, and engage in sex work to earn their living.

One of the important aspects covered by Mr. Gohil was the health aspects of transgender population, like serious mental health concerns, complications related to breast implants, castration, and risk of STIs and HIV to commercial sex workers and many other issues. He also discussed about the legal recognition of transgender, the final decision and recommendation of the Court. The rights and recognition of Hijras, Eunuchs and Transgenders needs to be ensured through legislations, as have their own identity, they also face health issues and other problems, and they need education, medical care, work opportunities and political participation. Thus, Centre and State Governments should take steps for framing various social welfare schemes for their betterment and seriously address the problems being faced by Hijras/ Transgenders. Public awareness should be created so that transgenders will feel that they are also part of the social life and be not treated as untouchables.

Session Theme: Gender and Science

Session Expert: Dr. Shiju Sam Varughese

Date: September 19, 2019

The session started with a question "what is science?" Dr. Varughese explained the differences between the little and big science and how it is connected with society. Science is not simply a closed circle which has no connection with society. The general notion about the science was that they were the

authority of knowledge. Ideologies of gender, nature society and science developed over different eras have resulted in the exclusion of gender from science. Analyzing gender in science has two levels: counting how many women are participating in science as a labour force and the second is critically examining the knowledge produced in science. The arguments supporting these developments are either using the efficiency in economic terms, human rights, and quality in terms of scientific excellence. Recent research explored how to measure those structural causes and how to implement structural change to improve women's participation in research. As gender studies as a discipline grew out from humanities and social sciences transformation of STEM research and knowledge production is still at the beginning. He was giving examples from the science about the influence of society and social movement in shaping of science. The session ended with a question answer part.

Session Theme: Women and Literature

Session Expert: Dr. Darshini Dadawala

Date: September 20, 2019

The session started with a quick review of history in the field of literature and the contribution of women along with how literature played role in women's identity. The writings in previous years were only done by men. So, the women's lives were written and portrayed by a male perspective. Later, women started writing and that arose a whole new era of bringing out the voices of women by women. The thought process and overall lives of women were now penned down. Apparently that was also the time of the Industrial Revolution and during that period of 1870-1920, Women's Movement started. This movement along with the Industrial Revolution, women were given the right to vote. New fashions emerged, Women started going out of their houses and to work and earn money. There was a big change in the social systems.

Dr. Darshini Dalawala introduced the components of subject topic, out of which the session mainly focused on Women and Literature. In the first component, she explained how we define women. It was seen that even Sigmund Freud failed to understand the needs of women. Therefore, a systematic research in this area of women's literature was needed. At the end of the session, she emphasized that efforts of young women writers need to be recognized. She persuaded participants to realize their potential of expressing oneself. Whenever you feel you cannot express, know that you can express, she added. Nobody can deprive you of expressing.

Session Theme: Men and Masculinities

Session Expert: Dr. Subair Kalathil and Ms. Mansi

Date: September 24, 2019

This session was divided into two parts. Part one was dealt by Dr. Subair Kalathil and second was by Ms. Mansi. Dr. Kalathil introduced about the importance of masculinity/ men's studies, further he explain about hegemonic masculinity. According to Connell (2005) 'Hegemonic masculinity' is not a fixed character type, always and everywhere the same. It is, rather, the masculinity that occupies the hegemonic position in a given pattern of gender relations, a position always contestable. The number of men that can actually succeed at doing or embodying this type of idealized masculinity may be quite small. But the majority of men can benefit from its hegemonic status through complicity. "The conceptualization of hegemonic masculinity should explicitly acknowledge the possibility of democratizing gender relations, of abolishing power differentials, not just of reproducing hierarchy." Connell and Messerschmidt (2005:853). It conceptualize masculinity as not necessarily violent but as supported by force which meant gaining consent and domination over others through culture, institutions and persuasion (Connell and Messerschmidt 2005).

In the second part, Ms. Mansi presented a research on men's identity. The conclusion of the presentations were overall, men show gender sensitivity and demonstrate an attitude towards changing gender roles which are traditionally associated or accepted by the society. Men are also beginning to critically reflect upon the notion of women. They wish to see the change in women's gender roles in terms of taking a step forward in sharing equal responsibilities (financial especially), being career oriented and also to be more expressive in sharing their desires. Assertion of individuality is clearly seen among the young men along with concern for family interdependence and harmony.

Session Theme: Women, Economic and Empower

Session Expert: Dr. Sunita Sharma

Date: September 25, 2019

Dr. Bajrang Lal Gupta, a renowned economist stated that 'Equality' is a western philosophy's terror. We need to stress on Synergy of men and women. Our society is full of diversity. India never had rigid thinking on women. Bharat has most dynamism and we changed according to time. Rigidity came due to Islam and Britishers. Indian women could study and participate in debates during vedic era and Upanishad era. Hence Indian women's problems need to be addressed differently than the women of other parts of the world.

Women empowerment has different meaning in Western country because of their own thinking. Men and women in Indian philosophy work in pair to make a family. Working women and comparing herself

with the Men is hazardous to the health of society. Discourse on women empowerment requires re-evaluation of the role of women. Women do not require her position as proxy for men. We need to develop social structure/ fabric to empower women. People have started thinking differently on women's participation at work places due to changing environment, viz. toilets in rural area, more enrolments at schools and colleges, and Ujjwala yojna.

Positive changes come when women is empowered and that we need to create learning environment and not teaching environment. Women needs to learn empower herself and others need to support the same. Empowerment comes through education. Equality has to be in mind. 20th Century was age of change and 21st Century is age of acceleration. We need to bring changes not only in women but also in boys and men.

Approaches and Techniques of Women Empowerment - three major approaches to empowerment of women, Integrated Development Approach, Conscious Raising Approach and Economic Empowerment Approach.

Indian examples of women empowerment-

- Few women who relentlessly worked for 25 years to get 30 acres of forest and now the village having 120 houses is supplying water to the district with population of 30000 people. That's the contribution of women in saving environment. Until women are ready to assume leadership role the society and women cannot progress.
- Women like Savitribai Phule and Sarojini Naidu did the exemplary work in social movement.
- In India, panchayati raj has witnessed 43% Sarpanch women. However, at India level in Sansad we can see only 11% women.
- There are more women participation at grass-root level and in Agriculture there is feminization of agriculture is taking place.
- Very recently National Women's Party was launched with an objective to contest for 50 Loksabha seats by women in Madhya Pradesh.
- Women have excelled in sports, services, jobs, NGOs etc. Only reservation for women is not sufficient but there has to be empowerment.

1 INTRODUCTION

The Faculty of Journalism and Communication (FJC) was set up in the M.S. University of Baroda vide Syndicate Resolution Number S.R.2 (4) dated 28. 08.1993. It initially offered a one-year post-graduate Bachelors in Journalism and Communication Programme (BCJ), which five years later, in 1997, was replaced by a four-semester Masters in Communication Studies programme. The nomenclature of this course has been recently changed to Masters of Journalism and Mass Communication (MJMC). FJC offers a comprehensive curriculum which encapsulates a range of relevant subject areas and related practical work. One of the key ongoing features of the programme is that during the proceeds of the course, students get ample opportunity for exposure and hands-on training in the field. For instance, students report on the beats and publish the newsletters through daily reportage of varied local events like industrial exhibitions, university Youth Festival, conferences, etc. Their print media lab journal "Itivritt" is also published each year. Similar work is done for Radio and Television too, and many programmes and films have been produced over the years. Such an interface helps student build their confidence and capability to be effective practicing journalists in the future. The New Media component has also been integrated into the theory and practical aspects of the curriculum. The Faculty has fully integrated the PhD Programme, where the registrations are ongoing, and the Bachelor's Programme (BJMC) where the first cycle of the Programme has been successfully completed.

Faculty of Law

1 INTRODUCTION

The Faculty of Law, M.S.University of Baroda has been a premier law institute in Gujarat since the sixties. It offers various courses like LL.B. (3 years), B.A.LL.B (Hons.) LL.M. (Business Law), LL.M. (Criminal Law), Post Graduate Diploma in Taxation Practice, Post Graduate Diploma in Labour Practice and Ph.D. programme. Over the years, the Faculty has expanded quantitatively as well as qualitatively to meet the ever increasing educational needs of the cosmopolitan city of Vadodara.

Globalization, liberalization and the information technology revolution has had a profound impact on law and legal institutions – worldwide and in India. A rapidly growing global market in legal services and information has changed the structure of the legal profession in India as well. To answer this global need a new and totally innovative legal thinking is required. With this object in mind, Faculty of Law has started “Baroda School of Legal Studies”, which imparts Five Years Law Degree Programme in the year 2005 to advance and disseminate learning and knowledge of law and to make law and legal process an efficient instrument of social development. The Faculty of Law has produced several eminent lawyers and judges of the Gujarat High Court.

1 INTRODUCTION

In 1884, Shrimant Sayajirao Gaekwad III founded a "Sangeet Shala" in Baroda. This became the college of Indian Music, Dance and Dramatics, part of the Faculty of Fine Arts, at the inception of the M.S. University in Baroda in 1949. Since 1986, it has been known as the Faculty of Performing Arts, one of the star institutions in India for in-depth study of the classical performing arts.

The erstwhile Baroda State had done pioneering work in many directions. The educational plan of the state included the study of fine arts and music as far back as 110 years ago. Sayajirao Gaekwad III was all for art education and to him goes the credit for creating the first school of music in India. For the first in this country, the University of Baroda put the seal of recognition on the teaching of fine arts at the University level.

It is a unique faculty of its kind in the entire western region, which imparts training at the university level in performing arts viz. Music, Dance and Drama offering courses up to Ph. The goal is to train students to develop their creative and intuitive abilities whereby attaining a systemic understanding of the art and science of performing arts and its aesthetic applications.

The academic platform provides local, national & international interaction and development of individual ideas through an open and free exchange within the programme of study. Over last fifty years, a single number of top performers in the field are involved in building up reputation of the faculty as one of the principal centers of contribution to performing arts through education and research in music, dance & drama.

Many younger generations of artists from 80s & 90s are actively involved in the evolving face of contemporary performing arts. A number of alumni are working with developing and reputed institutions all over the country. Since 1961, a substantial number of alumni and students have pursued career in professional fields of music, dance, theatre, film & T.V.

Over and above the academic excellence the faculty has gained a very special reputation for its socio-cultural awareness and the commitment of its staff and student towards the social cause. This small faculty has contributed significantly to such purpose. The city of Baroda considers this faculty as the cultural hub of the city.

Faculty of Science

Department of Chemistry

The Department of Chemistry was established by "The Maharaja Sayajirao University of Baroda" along with its inception in 1949. Prior to that, the department was one of the departments of Science in the erstwhile Baroda College affiliated to Bombay University. Rising from a small Department of the then Baroda College, the department has evolved into a reputed academic research centre.

The department has always laid equal emphasis on teaching and research. The department offers graduate degree programme in chemistry and post graduate degree programmes in Analytical Chemistry, Inorganic Chemistry, Organic Chemistry as well as Physical & Polymer Chemistry.

The Department of Chemistry has a vibrant research culture with its 21 faculty members working in rich and diverse areas of chemistry as well as interdisciplinary areas which include Analytical Chemistry, Bioinorganic Chemistry, Environmental Chemistry, Material Chemistry, Medicinal Chemistry, Nanoscience, Synthetic Organic Chemistry, Supramolecular Chemistry and Sensors.

Instrumental facilities for both research and teaching could be improved under Committee on the Strengthening of Infra-structure for Science and Technology (COSIST) programme as well as DST-FIST (Phase I and Phase II) programmes. Another notable achievement of the Department, is that it is recognized as Centre of Excellence in "Material Science - Nano polymeric Materials" by Gujarat Council of Science and Technology (GUJCOST).

As the department has extensive collaboration with neighbouring industries, such as Alembic, Sun Pharma, Solvay, Transpek and ZyduScadila to name a few, funding for research comes in from industries as well.

The department houses several sophisticated instruments for carrying out research in frontier areas of chemistry such as UV-VIS, FT-IR, FT-NMR spectrometers, spectrofluorimeter, polarizing microscope, DLS, GC-MS, AAS, polarimeter and a host of other instruments.

With this quantum of support from national programmes as well as personal research projects of its staff members from national funding agencies viz. CSIR, 2 DST, DAE and BRNS, the department is now recognized as UGC's "Centre of Advanced Studies in Chemistry" (CAS).

The department serves as a nexus for teaching and research, for students who wish to pursue a career in chemistry. The department is proud to state that the undergraduate and postgraduate students get proper placements and several students desirous of pursuing research clear national exams such as NET, GATE and GSLET. The department on an average publishes 25-30 papers per year. Every year about 5-6 students get Ph.D. degree. Many of the students go abroad for research and further studies. The department teachers are invited to give lectures at international and national conferences, seminars and symposia and as resource persons in refresher courses.

Department of Environmental Studies

The Department of Environmental Studies began its glorious existence under UGC Innovative Program as a self-finance program of B.Sc. (Hons) Environment Science in the year 2000 and later introduced M.Sc. (2010) and Ph.D. (2016) programs. The Department is celebrating its 20th year of existence with successful accomplishments of educational and societal commitments.

This trans-disciplinary course is being taught by the teachers of this department and experts (visiting faculty) drawn from various Faculties of the University as well as other government/non government/industrial organizations. The Department itself has teachers from different prestigious institutes of India with good research standing in various disciplines. Numerous research guides from other departments of the Faculty have been recognized for active research in the Departmental thrust areas that integrate physical, earth, chemical and biological sciences and technology. The framework of this course aims to generate trained and skilled humanpower in diverse fields that has potential to be developed as academicians, researchers, managers, entrepreneurs, innovators, policy makers and technicians. The subject has yet unforeseen diversified potentials which we need to recognize and unsheathe.

Department of Applied Mechanics

The Department of Applied Mechanics and Structural Engineering was established in 1949 with undergraduate course. Post graduate courses started from 1962. Department has started Post graduate programs in Geotechnical engineering during 1962, than Structural Engineering in 1964. After that Post graduate course in Fracture mechanics started in 1986. Two Post Graduate courses: Post B Sc (Diploma) in Geotechnology and M Sc (Tech) Geotechnology started during 1984 and 1987 respectively. The department has dedicated faculty with total sanctioned strength of teaching staff as 31. The department has excellent research team and has identified thrust area of research in Structural engineering, Concrete technology and Geotechnical engineering.

Department has total 31 sanctioned teaching post out of which 7 Professors, 13 Associate Professors and, 11 Assistant Professors. Among them 10 staff members are holding Ph D degree and 1 staff member is pursuing doctoral research work. The growth of the department is largely due to its Post –graduate degree programmes in structural engineering, geotechnical engineering and fracture mechanics.

Department of Architecture

Maharaja Sayajirao Gaekwad III, ruler of the erstwhile State of Baroda in the western part of the Indian subcontinent, was not only a visionary leader but also an institution builder. Under him, the princely state began to experience the first aspects of urbanization and became one of the most progressive states in the country.

In 1890, he founded the Kalabhavan Institute of Industrial and Fine Arts. He realized that with the consolidation of British rule in India, the practicing British Architects in the country would require skilled assistance. With this in mind, the Department of Architecture was established, initially as a section of Fine Arts, under the leadership of Professor T.K.Gajjar, a textile chemist. The course was essentially in draftsmanship and was awarded a certificate in Architectural Assistantship.

The Department of Architecture offers a ten semester (five year) Under graduate course in Architecture leading to the degree of B. Arch. which conforms to the recommendations of the Council of Architecture (COA), and is recognized by both COA and the All India Council of Technical Education (AICTE). Major subjects of the course are Architectural Design and Building Construction Technology supported by other technical and humanities subjects.

The Department also offers a self financed four semester (two year) Post graduate course in Urban and Regional Planning leading to the degree of MURP which conforms with the guidelines laid down by the Institute of Town Planners India (ITPI) and is recognized by ITPI and AICTE. The main subjects of the course are the Planning studios on Area Planning, Metropolitan Planning and Regional Planning supported by other subjects including Infrastructure and Governance.

Department of Civil Engineering

The department of Civil Engineering is one of the pioneer departments of the Faculty of Technology & Engineering. The department started its UG course in 1949 and PG courses in 1956. It offers a four year B. E. degree course in Civil Engineering and two year M.E. degree courses in Civil with specializations Environmental Engineering, Highway and Transportation Engineering and Hydraulic Structures. It also offers Ph.D. programme in Civil Engineering. The department has identified few major thrust area as –(i) Environmental Management and Impact Assessment Studies (ii) Monitoring of Environmental Mediums (iii) Reservoir Performance and Flood Related Studies (iv) Hydro-informatics (v) Traffic flow analysis (vi) Transportation Infrastructure Planning and Appraisal (vii) Public Transport Management. The department has successfully completed sponsored projects of various organizations. The department is recognized Schedule I Auditor for Industries. It offers consultancy services in area of civil engineering.

Department of Textile Chemistry

The Textile Chemistry Department is the oldest department in the Faculty of Tech. & Engineering, whose existence dates back to 1890, when artisan courses were conducted in Bleaching, Dyeing and Sizing. The Department is offering Ph. D, M.E, B.E & Diploma in Textile Chemistry programmes. The thrust areas for the Department are Nanotechnology, Ecofriendly textile processing, pollution control in textile effluent, chemical modification of textile fibres, natural dye application, continuous processing sequences for blends, etc. The Department has full-fledged research laboratory with all the latest equipments and teaching aids. The Department has close interaction with industry and research associations and encourages Inter-disciplinary research work. Many graduates of the Department have been serving at the top level in Government organizations & multinational companies. The department had conducted short term training programmes in various fields of Textile Chemical processing under

Anchor Institute's activities sponsored by the Government of Gujarat. The Department is doing Saraswati pooja every year since 2013. The department has been awarded MODROB project twice and Research Project Scheme (AICTE) in 2013-14

Department of Textile Engineering

Department is located in a built-up area of 4309.75 Sq.mt with sufficient open space. It is a small mill in itself.

WREMI

In 1980s in Gujarat State a massive step to boost up the agricultural production was taken up by modernising existing irrigation projects and constructing a few new ones including Sardar Sarovar Narmada Project. A need arose for water.

Polytechnic

Department of Applied Chemistry

The Department of Applied Chemistry was established in the year 1956 under the headship of Dr.(Prof.)J.M.Lohar. This department was started with the view that knowledge of chemistry is necessary for engineers. It was found that engineers without the knowledge of chemistry are not real technologists. So this subject is taught to all branches of diploma engineering.

Department of Applied Mathematics

The Department of Applied Mathematics is established since the inception of this institute and is endowed with well qualified and experienced faculty members who are committed to ensure the outstanding performance. As per the constitution of The M. S. University of Baroda, this department is academically a part of the Department of Applied Mathematics, Faculty of Technology and Engineering. The department at Polytechnic has been imparting Mathematical education to various branches of Diploma in Regular stream and Higher Payment Programs. The efforts of the department are focused on continuous updation and improvement of teaching-learning process. The department imparts knowledge of practical application of Mathematics and how it can be incorporated in respective Engineering branches.

Department of Civil Engineering

Department of Civil Engineering is imparting knowledge in various fields of Civil Engineering such as Building Construction Technology, Civil Engineering Drawing, Construction Planning and Management, Environmental Engineering, Highway and Transportation Engineering, Irrigation and Water Management, Material Technology, Surveying and Computer Application Development in Civil Engineering.

Apart from Theory Teaching, the Departmental Teachers are actively involved in imparting Practical Aspects and knowledge in various subjects taught through well developed and equipped laboratories and Drawing Halls. The Modernization of Surveying laboratory has taken place with the purchase of modern field survey instruments such as Total Station, Auto Levels and Digital Planimeter.

Further to add, every year the Department is organizing Study tours, and Field visits, Special lectures and seminars for students in order to enhance their knowledge regarding the novel materials, Construction, Operation and management Techniques used worldwide.

Department of Mechanical Engineering

Department of Mechanical Engineering is running a Three year post SSC diploma course with an approved intake of 180 + 25 % additional as per GOG notification (2019). We are providing best in class knowledge, practical and general technical as well as soft skills to our students. We have a excellent placement track record of almost 60% passed out students being placed in various MNC's.

Department of Petrochemical Technology

Four Year Diploma Petrochemical Course Was Started With Oil & Gas, Plastic & Fertilizer As A Special Subject In 1973. According To The National Policy Of Three Year Diploma The Course Was Modified To Three Year Diploma In Petrochemical Technology Looking To The Job Profile In The Vadodara Region In 1982. Further It Was Revised In 1992 To Increase The Job Availability In Chemical Complexes. Further It Was Also Revised In 2003 Due To Development In Technical Field. The Teaching & Examination Scheme Were Further Revised In 2008 Due To Administrative Reason.

1 INTRODUCTION

The Computer Centre of The Maharaja Sayajirao University of Baroda was established in 1979. In its early days, the computer centre was a data processing centre & major data processing jobs were executed for many corporate firms in the vicinity of Vadodara like Jyoti Ltd., ONGC, Alembic Chemicals, IPCL etc. The Payroll System of the Maharaja Sayajirao University of Baroda was computerized as early as in 1981-82. Subsequently, the Examination Result Processing System was also developed, which is still in use. The Computer Centre has been the hub of the computer related activities of the University since its inception.

The Computer Centre has been managing and administrating the University Network which includes wired and wireless.

Major Projects carried out during the year 2019-20.

Due to the Covid-19 Pandemic era emergency was created in each and every sectors. Our education sector was much affected by the same. Computer centre had converted this emergency into the opportunity and created a new shining path during the era and shown their ability to how Information Technology helps others. During the era computer centre has carried out the following major projects.

Surfland Cyber Café

The Surfland Cyber Café facility at the Computer Center has continued to provide various internet and computer related services to the University community. With the University becoming a participant of the National knowledge Network, a bandwidth of 1 GBPS (which includes 550 MBPS of internet bandwidth and the remaining intranet bandwidth among participating institutions) is available for the University networks. Surfland Cyber Café under the Computer Center has been a favourite place for University fraternity of all ages for accessing e resources using internet and intranet. Our University network has access to the electronic journals both from the UGC InfoNet program and the Indest Consortium of AICTE. Due to the state of the art computer network of the University, these priceless electronics resources including hundreds of Electronics Journals of the highest quality are accessible from every computer connected to our network. The University community has been utilizing the bandwidth provided and the electronic journals accessible to the fullest possible extent. The INFLIBNET as well as 'Indest' organization have been highly appreciative of this effective utilization.

Computer Centre at University Head Office

With co ordination with Exam Section Student life cycle system from Maharashtra knowledge Corporation Limited was implemented since 2012 13. This year also we have continued the registration of online admission process for all the programs except those programs for which the admission process has been conducted by central admission committee of Govt. of Gujarat. This facility was customized in MKCL portal and it was integrated with University website so that students get the information about the whole admission process from University website.

Computer Center has been maintaining Webserver(www.msubaroda.ac.in) and Email Server (mail.msubaroda.ac.in) those are hosted on the servers of the Computer Center and are being actively used for publishing exam results, merit lists, annual reports, event advertisement etc. This is also being used as the testing platform for various network based applications being developed in house. Since April 2014, we have signed the MoU to shift our email server on the Gmail. The email ids of all staff members of our University have been continued to be created whenever requested by faculties and Institutions. - **THALASSEMIA COUNSELLING SESSION FOR STUDENTS ON 11/02/2020:-**

The counseling session for those students who were detected to have Thalassemia minor in the Compulsory Thalassemia screening program held in the year 2019 from June 2019 to January 2020 was held on the 11th of February 2020 at 2:00 pm in the B. R. Ambedkar Hall in the Faculty of Social work .

The counselling session started with a welcome address from Dr. Sonal Mishra, followed by a brief account of the screening program & statistics by Prof. Annie Kuruvilla. Dr. Anil Khatri, leading pediatrician of Ahmedabad and an active member of the Indian Red Cross Society, Ahmedabad branch explained in detail & in a simple way, the precautions and steps to be taken by the audience who were mostly Thalassemia minors. He also expressed concern of the Iron deficiency anemia in many students which could have deleterious effects if not attended to. The session ended with vote of thanks by Dr. Pravin Joshi, Secretary, and Indian Red Cross Society. There was an astounding presence of students who were anxious and eager to know more about the disease and its consequences.

Post-counselling was found to be meaningful and very much needed as students are not aware of such genetic disorders.

Proper Counselling will lead to greater awareness amongst the students regarding the disorder and will help to halt transmission of this hereditary disorder in their future progeny.

This academic year (2019-20) **17885** students, i.e. 99.4% students were screened by the Indian Red Cross Society, of which, 6.2% were thalassemia positive. This year one was reported as having thalassemia major disease and eight with sickle cell disease.

In the year 2018 and the year 2019th a similar counselling session was held in C. C. Mehta Auditorium.

Incentivization of Research at MSU

The administration of MSU recommended few measures to promote & encourage research work & research output by staff members of the university. Under this initiative a proposal of RCC was approved & implemented in this period. Data was collected from staff members regarding their research publications & patents from the calendar year 2019. The data is compiled & submitted for the approval to the authority.

Under this head grant of Rs. 2,50,000/- was sanctioned to foot the bills for analysis of the research samples of research students & staff members carried out from outside Government approved institutions/ Sophisticated instrumentation facilities. This scheme was highly appreciated & support was sought & given to about 33 applicants in the tune of Rs. 1,43,638/- . The details of this distribution is given below.

Date: October 7, 2019

Venue: BBA Auditorium

No. of Participants: 45

Speaker:

- Koenraad Elst

Duration : -

Total days: 1

Total hours:1hour

Objective and About the Speaker:

Koenraad Elst is a right wing **hindutva** activist, known primarily for his support of “Out of India Theory” and for publication of “Anti Islamic Literature”. Born into a Flemish catholic family, calls himself a “Secular Humanist”.

He graduated in **Indology** (Academic study of culture, language, history and literature of India), **Scinology**(Study of Chinese literature, language, culture & history) and philosophy at the Catholic University of Leuven. His doctoral dissertation on **Hindu** revivalism was published “Decolonizing the Hindu Mind”.

He is deered as one of the leading proponents of the OIT school of thought.

He was an editor of “New Right”, Flemish Nationalist Journal “Teksten, Kommantaren en Studies”. He had been a regular contributor “The Brussels Journal”.

Elst’s work has drawn praise from fellow “hindutva” activists and conservatives,

David Frawly (an American Hindu Teacher) called his work on ayodhya “Definitive”.

Paul Belien (Author and Founder of Brussels Journal) described him as one of the Belgium’s best orientalist

Ramesh Nagraj Rao(Proff. Communication, Columbus State University) praised Elst for his unassuming and brilliantly meticulous research.

Frankois Gautier (Journalist based in India) considers Elst as one of the most acute Scholars on India.

In references to the questionwhether there really was a Hindu temple at the Ayodhya site later covered by the Babri Masjid, the focus is invariably on the case made by the Hindu side, viz. that there was a temple, and that different types of evidence confirm this. The standard question is: is this evidence for the temple demolition scenario valid? Have they succeeded in proving the existence of the temple? By contrast, the opponents of the temple hypothesis are but very rarely asked to put their evidence on the table. The nontemple argumentation is confined to two types of evidence: arguments from silence, and attempts to find fault with pieces of evidence offered

by the temple party. Criticism of the pro-temple argument is usually directed against a straw man, not against the actual argumentation as presented by pro-temple scholars. A number of much-acclaimed anti-temple publications bravely announce in the introduction or on the cover that they will demolish every argument given (or 'concocted' and 'maliciously propagated') by the temple party, but then fail to address or even mention

જન્મ સ્થળે જ રામ મંદિર બનવું જોઈએ: કોઈનરાડ ICAI દ્વારા દિપ ઓડિટોરિયમમાં ચર્ચાસત્ર યોજાયું

ચિત્રી ક્ષિપ્રેટર | વડોદરા

ઈન્સ્ટીટ્યુટ ઓફ ચાર્ટર્ડ એકાઉન્ટન્ટ્સ ઓફ ઈન્ડિયા, ભારતીય વિચાર મંચ તેમજ ઈન્સ્ટીટ્યુટ ઓફ લીડરશીપ એન્ડ ગવરનન્સના સંયુક્ત ઉપક્રમે યુનિ.ના દિપ ઓડિટોરિયમમાં સોમવારે ખ્યાતનામ હિન્દુત્વ કાર્યકર કોઈનરાડ ઈલ્ટનું ચર્ચાસત્ર યોજાયું હતું. જેમાં કોઈનરાડ ઈલ્ટ દ્વારા અયોધ્યા વિશે અનેક અજાણી ચર્ચા કરવામાં આવી હતી.

કોઈનરાડ ઈલ્ટનો જન્મ કેથલિક પરીવારમાં થયો હતો. પરંતુ રોમન કેથોલિક ધર્મને નકારીને તેઓ પોતાને "ધર્મનિરપેક્ષ માનવતાવાદી" કહે છે. તેમના દ્વારા હિન્દુ ધર્મ અને કલ્ચર વોર, ગોડસેએ મહાત્માને કેમ માર્યા અને આર્ય સમાજ જેવા વિષયો પર પુસ્તક લખાઈ છે. કોઈનરાડ

ઈલ્ટએ જણાવ્યું હતું કે, ઓયોધ્યામાં રામ મંદિર અને બાબરી મસ્જિદનો ક્રીસ્ટો ખુબ જ સરળ છે. હિન્દુ અને ઈસ્લામ ધર્મો દ્વારા તેનો વધારે જટીલ બનાવાયો છે. તે જગ્યા હિન્દુઓની જ માનવામાં આવે છે. અને ત્યાં મંદિરનીજ સ્થાપના થવી જોઈએ.

Topic: Great Team for Great Results

Objective/ Concept Note of the event: -Learning various aspects of Governance, Administration, Entrepreneurship, Industry, etc and many other fields necessary for Self-Reliant India

Venue / Digital Platform: - Zoomdigital platform,YouTube

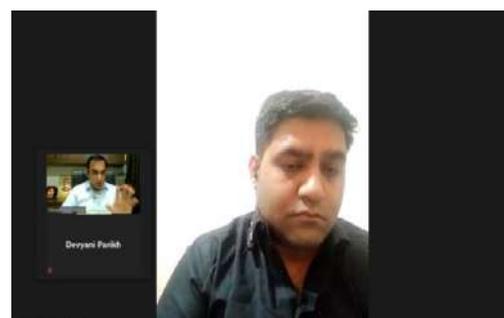

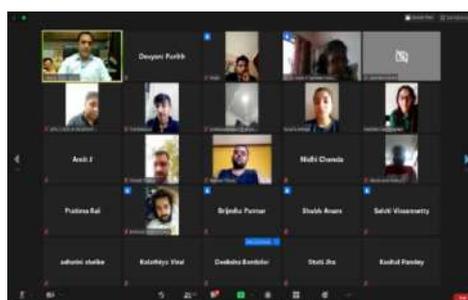

Video link - NOT RECORDED

Activity Description: -

- He addressed the participants on the theme '**Great Team and Great Results.**' Before starting the topic, he gave a parable that there was a small child. His father was able to give him less time as he worked in the army. One day the father was busy, but the son said that father, I want to play with you. Being busy and unable to play with the child, the father asked him to cut world map and said, "Add it, and when you are done with it, then we will play together and he starts on his duty."
- After a while, the map was attached to the child. Papa was surprised, asked how it is impossible to add it, then the child said that father, I do not know that this is a map of the world. But when I turned back, I saw a picture of a human being and when I started connecting them, the world connected. Once you get the man's right to get the manager's right. The problem is not the addition of outside team. The problem is connecting the inside team. Civilizations are destroyed not by external invasions but by internal invasions.
- Referring to the Taittiriya Upanishad, he said, whenever a person works for himself, that work is most beautiful. It is best and when the same task has to be done for someone else, he gets tired in that work. have no interest
- Always ask yourself the first question. What is not known while doing it? What is that? What is the work you are not tired of doing and what is it that you are willing to do without money?
He said, professors are also of two ways. By profession by default. Construction and Holocaust play in the teacher's dock.
So always try to find it. What are your blessings this is the blissful treasure of Taittiriya Upanishad?
- What is the purpose of life and spend your life in the purpose? All the great people who have been born have some purpose in their life. While stating further, Dr. Vikram Singh Tomar said. Try to know what the world needs in today's time and try to find out what other things the world can give you value for. There are 2 ways in the world. One is on the basis of internal call and secondly on the basis of business, when a man works for his own self, he never retires. And when he works for business. So he has to retire for 1 day and he also gets tired. This is the science of science.
- Moving forward, he gave the example of Manometer Kosh. When asked how you work with such concentration in Air Traffic Control at New York ATC, he said that our formula is One Flight at a time, in the sky, there can be thousands of flights in the sky. But let's focus on one topic, one thing, and one flight. Taking this topic further, he said that one problem at a time and one subject at a time is the same. Get focused on the work you have taken up. When you act the Promise done with you, it is called self-confidence. All these actions come under PranmayKosh. Come under action. Further Dr. Tomar said that after this we should also take care that what you eat? How do you keep yourself healthy? Giving the example of Guru Nanak Dev Ji, he said that the same kind of colour is consistent. This whole life should be like a yajna and you are a sacrifice. That is why in the yajna we call swaha and as much purity, as much as mindfulness, as much diligence as we call swaha, we bless God and God according to the same swaha. God the Supreme Father tells us that we will invest as much energy as we do in grooming our lives. We will get the blessings of cosmic energy in return for this great goal.

-1979 Batch IAS officer

- Former Director of NMML

- He has also served as a Joint secretary in the Prime Minister's office in the past.

Objective: - Learning various aspects of Governance, Administration, Entrepreneurship, Industry, etc and many other fields necessary for Self-Reliant India

Venue / Digital Platform: - Zoom digital platform, YouTube

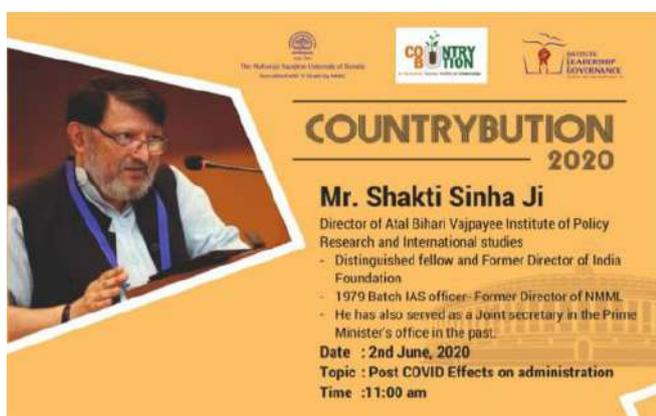

Video link: www.facebook.com/themsubaroda

Activity Description: -

- He started the statement and told the participants that the Corona period is the biggest challenge for Indian society and system after independence.
- Even before this, there have been economic crises but due to lack of some policy, but this crisis is due to health reasons. We have a lot of livelihoods here. In comparison to other countries, we have a lot of inequalities, such as many shortcomings in schools and hospitals in rural areas. If a license or document is required in the government sector, then the common man has to be very upset, but during the cyclone, election, natural disaster, we perform very well.
- This epidemic is testing our administrative capabilities a lot but all the government machinery including our officers have done very well. Railways has done a very good job. At the end of April, we were at number 16 in the global covid-19 list but on May 31, we had reached eighth position.
- If we add new cases, today we are at number four. We will be number one by the end of July. We have to accept this. This is a matter of concern for our population. We are also working on this with priority.
- But much better is also a 50% recovery rate and very low about 3% death rate is a very positive thing. Covid-19 spread rate is very high in Delhi Mumbai metro cities. The Delhi government is yet to make full preparations that large hotels are now preparing as Covid-19 treatment centres. State governments will have to get ready for Covid-19. One important point is that due to lockdown fatigue, we are also distracted by Covid-19. It is a matter of concern It is an invisible enemy and there is no resolution available. Along with this, attention should also be paid to how the immune system of our citizens should grow. It is a matter of luck that our Prime Minister started making Yoga Ayurveda aware 5 years ago.
- Further, Shri Shakti Sinha said that one of the topics to be noted is that 40% of the population in our country is migrant, but regular migrant labourers are also 10 crores. They also need to be resolved.

- We have 54 labor laws at the center, separate from the states. He said that along with all these problems, our education system also needs attention. DTC has a vacancy of 1000 drivers, Plumbers are not available in Delhi. There is a need to inspire the youth for all this but there is more need to train youth to become advanced economic power, work will have to be done in the field of making study oriented.
- According to some reports, 27% of the labor force is unemployed, one-third units may not be able to reopen. The Central Government is seriously considering and taking appropriate steps to solve all these problems. But this is the collective responsibility of all of us during this corona period or disaster. It is the duty of every citizen. Let's work as a unit. If the government and society work as a single unit, then we will surely overcome this crisis.

ACTIVITY: - During the session: speech on "My Journey in the Lockdown": Interactive Experience Sharing session has taken place on how one has spent his/her time during the lockdown, what new thing you have learnt, what beliefs you have changed inside them, any New Skill you have developed during the lockdown."

Topic: Effective Communication Speech and Modulation

Speakers: -Dr. Harish Vyas

He is Voice and Speech Trainer Faculty and course designer for "Anchor. Host Announcer Workshop" at Lifelong education centre" Vadodara.

He is having 27 years' experience at faculty of performing arts, The Maharaja Sayajirao University of Vadodara.

Objective: - Channelizing Youth's Energy in Transforming India

Venue / Digital Platform: - Zoom digital platform, YouTube

Video link: - <https://youtu.be/dwWtJYmYPjA>

Activity Description: -

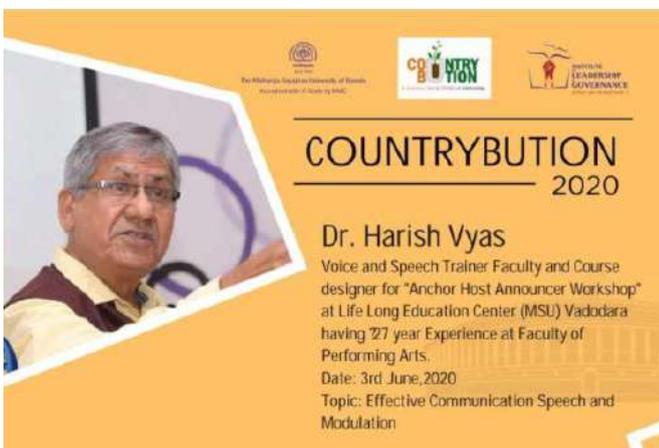

He trained participants on the subject of influential speech art. Dr. Harish Vyas started the dialogue and said that speech is the most powerful medium of communication. There are many communication factors. Visibility is also body language, but speech is the most important.

Krishna Arjun dialogue is also a unique example of speech effect which has overcome Arjun's beau Karishevavakamtava. On one hand, Draupadi became the origin of Mahabharata with her speech.

- The child first learns to speak according to family and environment.
- People are drawn to a person's speech and say if the speaker is there and if someone speaks, then they say that he is talking.
- We use this speech. Speech uses conspiracy, expressions in conspiracy.
- Speak in a different way with different people in a different situation.
- We all have a certain tone. It is God-given. Speech and respiration use the same system of pronunciation. Lip tooth palate nasal etc. The languages of our Indian origin which are made up of all Sanskrit are entirely scientific. Panini said that Shiva became a sutra by playing the Damaru of Lord Shiva, Panini became grammar. A is classified as hypnosis and B is in the category of aspiration. The pronunciation of b is heavier than a.
- Dr. Harish Vyas explained in detail about the alphabet's orthogonal palatal dentistry. Sturdian is the character of Veer Ras. These characters are not used in makeup juice. How scientific it is that child first learns the alphabet. Because at that age only the child learns the operation of the lips. Dr. Vyas went into the depth of the subject and said that communication is the basis pillar of diversity. For speaking while talking, attention should be paid to the important words such as stress, ascension, intensity of voice, volume of voice, speed of speaking, rhythm and punctuation style and melody. He also said not to give undue weight to all words. Babies often do not come to action. In the style of Gaita, do not speak and the last words should also be heard clearly, do not let loose. On all these topics Shri Harish Vyas Ji also made the participants to practice various examples.

Assignment: VOICE MODULATION ACTIVITY-There were two poems attached in assignment the voice modulation of two poems BHARAT ZAMEEN KA TUKDA NAHI and GEET NAYA GATA HOON written by poetic prime minister of India Shri Atal Bihari Vajpayee Ji.

2. Inters had to record their video reciting the same poems and be cautious about the voice modulation that's the prime focus.

- He is Faculty of Law at Ashoka University And also the senior research fellow at India Foundation.
- He has been the editor-in-chief of India Law Journal and also leads the Abhinav lecture series.
- He has previously worked at Washington based strategic advisory firm called Albright Stonebridge group

Objective: - Learning tools which can make citizens an effective part of Governance system**Venue / Digital Platform:** - Zoom digital platform**Video link:** Not Recorded**Activity Description: -**

- According to him, after the Emergency in 1978, our law-and-order system changed a lot. The idea of increasing citizens' contact with the government was somewhere in the psyche of the Supreme Court as well. It is also the basic and positive beginning of all these rules. We have four types of rights. Directive principals are the legal rights of citizens in a legal sense, while protecting fundamental rights is of paramount importance. The basic element of duties is the directive principal.
- After this comes legal rights. The government can change the legal right by using its powers to change the list of rights. Earlier the right to education was in the moral rights directive principal, but after the 86th Amendment it became a category of fundamental rights. The Maneka Gandhi vs Union of India case in 1978 played a major role in law-and-order changes. The Emergency was ruled by dictatorship. Then the Supreme Court also started thinking that citizens should be given some rights so that such chaos does not happen again and governments become accountable to the people of the country. Maneka Gandhi went to the Supreme Court due to stop traveling abroad and confiscation of passport and argued that according to Article 21, free work is my basic right.
- Many such cases laid the foundation of rules like RTI and PIL. Giving rights to citizens is not enough, but arrangements have to be made to protect these rights. Protecting fundamental rights is also very difficult for the people of our country. PIL came into existence for this. Earlier, the lawyer and the court local stand used to ask what would be your personal loss, but due to RTI and PIL, the competent people were empowered to stand for the citizens of weaker sections. They could not apply for bail due to lack of money. Many times the criminal spent more time in jail than the punishment for the crime. KapilaHingorani filed a PIL in this favour and 40,000 people were released by the Bihar government. Who had spent more time in prison than his conviction?

- Later, the women's cell at the police station is also the result of a PIL filed by Kapila Hingorani. Converting government buses into CNG buses in Delhi is the result of PIL. Catching large scams is also the result of many PILs. A ban on public smoking was also imposed as a result of a PIL.
- Similarly, moving forward Apoorva Mishra, the root cause of RTI is hidden somewhere in the emergency that there should be some way of communication between the people and the government.
- Before 2005, when all these efforts were made, any person who asked for any clarification from the government was under the Official Secrets Act 1923 which was implemented in India by the British. The British certainly suffered from a colonial mindset as they did not want to share policy decisions with any Indian. That is why he established the Secret Act of this way, but after independence no secret act of this method is needed. According to Article 19 Fundamental Rights, the right to information is necessary for the exercise of fundamental rights.
- The basic people of all kinds of powers in democracy. Therefore, the public has the right to know this. This case became clear from Raj Narayan vs Indira Gandhi.
- And because of this the current form of RTI came into being. The core of RTI is that maximum information should be shared, only special information which is related to national security should be hidden. If you do not reply for 30 days under RTI, then applicants can go to the State / Center Information Commission. If you do not get an explanation then you can go to the Supreme Court. If an IS has given false information in RTI, tries to hide the information, then its service record is bad and service record is very important for a government official. ITIs do not require local standi like PIL. You can do RTI for anyone else wherever you are. RTI is very easy to do, even on simple paper. Shri Apoorva Mishra said that RTI and PIL is a powerful medium to make people aware of their rights in the present times.

DAY: 7**Name of the Programme:** - Countrybution 2020-Summer Socio-Political Internship**Type of the programme:** - Online Internship**Date:** - June 05, 2020**No. of Participants:** - 129**Topic:** dunk Bharat-India's journey towards making Smart Villages**Speaker:** -Mr. Himanshu Patel

He is the youngest sarpanch of India- Sarpanch of Punsari village for the tenure of 2006-2016 and has turned the village into Model village of India. Under his tenure Punsari was awarded with "Gaurav Gram Sabha".

PM Narendra Modi has acknowledged Punsari village as "Adarsh Gram" in 2014, "Aatma Gaamni-Suvidha Shaheri" (the soul of Village- The facilities of city) was his motto for Punsari village

He is currently working for Smart Anganwadis Project for 11 states of the country, Created Smart Sarpanch Group of around 1000 Sarpanch all over the country and giving training to them for the Model Village concept.

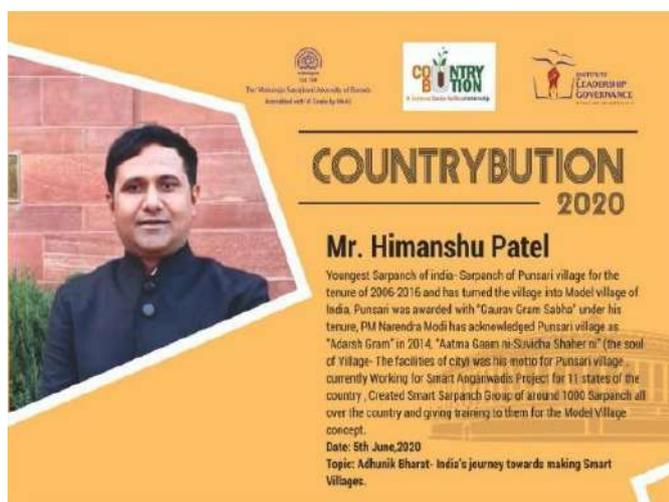

Objective: - Understanding ground level realities from the speaker and also channelizing youth's energy in transforming India.

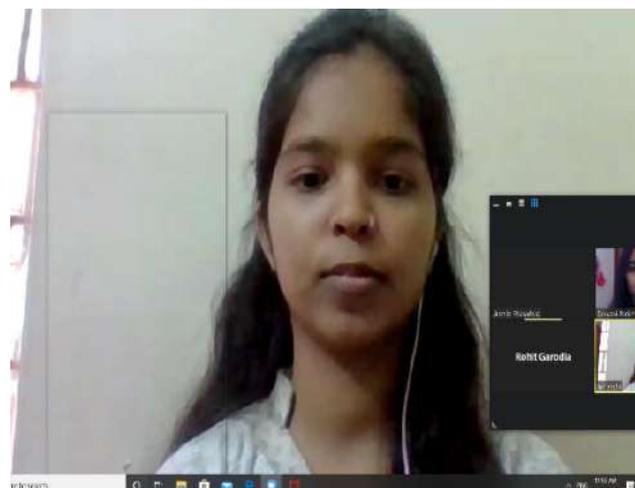

Venue / Digital Platform: -Zoom digital platform, YouTube**Video link:** -https://youtu.be/lftrze1Fb_E**Activity Description:** -

- Himanshu Patel explained the concept of Adarsh Village, that there are 650000 villages in the country and 255000-gram panchayats. He also used to come to the village on Diwali like the common people and contested in 2007 after graduating in 2006 when he had to stay in the village. He says that he won by losing the election of sarpanch. When he first became a sarpanch at the age of 23, by a margin of 50 votes, he came to experience that perhaps what the old elderly grandfather of the village used to say was right. Taking the village in the direction of the ideal village or smart village was not so easy. The election of Sarpanchi is much harder than the election to the Lok Sabha Rajya Sabha Assembly. All of you can understand this well. Internal Politics, Dirty Politics and Mouth to Mouth Talk constitute a large part of rural elections. If you come to power, then you know how much our strength is and at what level can we change? When Himanshu Patel came for the first time, there was no office to sit in the Gram Panchayat. Only 30% of the houses in the village had toilets and tap water was not available.
- In order to improve the village, it is very important to have the involvement of those people to take the village in the right direction. There is as much difference between an ideal village and a smart village as we understand between India and Bharat. Providing 100% toilet for people, 100% drinking water system and not only drinking water system, but also pure. When it came to mind that drinking water is available to the people of the village but their TDS is 2800, and then arranged RO water in the village. Every house in the village has connectivity with the road. There should be availability of electricity in the village as well as employment in the village.

- Mr. Himanshu Patel told that in the initial stage of this journey, it was seen that what the young Prime Minister should do, sitting on the chaupal at the crossroads in the village, what the Chief Minister should do. Let's discuss this. I told them that if something has to be done, then let us provide pure water to the people of the village. I started several government schemes of the Finance Commission in the village. Drinking water for ₹ 4 and if cold water to drink, then 20 liters of water at ₹ 6 per liter made available to the people of the village.
- Cluster Village was created and at that time people could not think that the facility of public announcement should also be in the village. WiFi facilities should also be in the village 10 years before today. It was made available to the people of Punsari at that time so that the people have a connection with the government schemes. If the people of the village do not know about the government schemes then how will they be able to take advantage of them?
- Today the progress of the village is that more than 97% of the family is connected with the government scheme. Initially there was a lot of protest. People in Gujarati newspapers also protested that what it wants to do is youth, but I knew my direction is right. Security camera in the village at a time when it was not prevalent even in cities. Then get this facility provided as it is also necessary to monitor the system.
- Anganwadi School post office all these people have constant contact in the village. If there is any deficiency of any kind in the running of a Steering Committee in the village by connecting all people, then these people. To improve it. Birth rate, education rate, availability of employment will work on all these, only then the vision of the ideal village will come true.
- He believed that the people of the village should also be on Twitter, but they should also read 16 chapters of Gita. And the result of all these efforts was that in 2014 Punsari was declared the best village in the country.
- When we work in the village, it is seen that 50% of the youth is public work, social work and therefore contribute. 30% people find their advantage in it and 20% people oppose it if we need 100% people support to create ideal village status. If the most beneficiary of Mudra schemes is in a village in the country, then it is a Punsari. SBI gave a loan of about one and a half crores and today I can proudly say that there is not a single NPA case in my village if this country has to be taken to the level of Vishwa Guru. Out of 6:30 lakh villages, at least 1 lakh village will have to be made an ideal village. Today I am not working only in Punsari. I am going around the country and training the sarpanches of about 1000 villages so that the Punsari model can be replicated all over the country. If any village has to be taken in the direction of progress. If the ideal village is to be built, then the youth of that village, the women of that village and the children of that village, this is the biggest power to handle that village. If all the villagers work together with positivity, then it is possible to realize the ideal village.

Topic: Organic Agriculture

Speakers: - Mr. Shantanu Sukhdevkar.

He has Graduated from The Maharaja Sayajirao University of Vadodara and by occupation he is Farmer having farms located at Shri Sukhdevkshetra, Rajpipla.

He is currently Researching and practicing "JaivikKheti" on the main plantations of Mango and Banana.

Objective: - Understanding ground level realities from the experience of the speaker and Channelizing Youth's Energy in Transforming India.

Venue / Digital Platform: - Zoom digital platform, YouTube

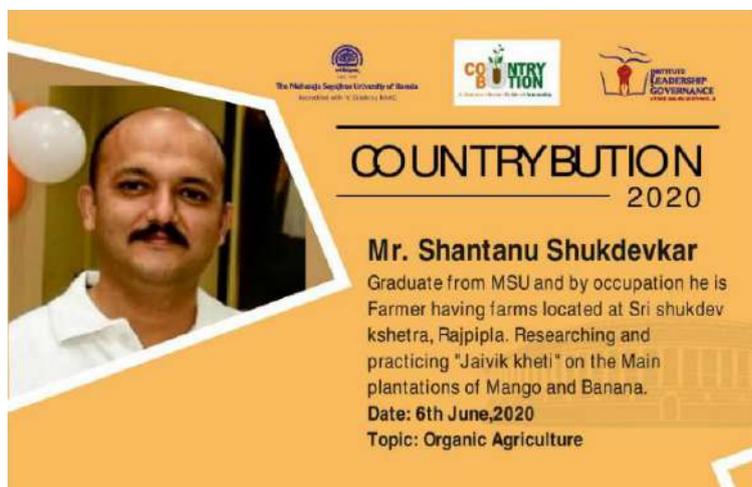

Video Link (if any): <https://youtu.be/9y0RgTzRRGQ>

Activity Description: -

- He said that organic farming is a very profound subject affecting our lives. 55% of our country's population lives in 6.70 villages. Agriculture has a profound impact on the economic system. The point being 1% agriculture growth is .5% industrial growth. And .7% increase in national income.
- The first Green Revolution took place in India in 1965 whereas in the western world it was only in 1850. The sad part is that after this the use of chemical fertilizer in our country increased in greater quantity. After giving 5 times more yields in the beginning, now it is seen that even after adding a greater number of chemical fertilizers, the yield is not increasing. It is a matter of concern that when we did an investigation, it was found that microbes used to change the state of chemical fertilizers.

- Their quantity is only in the condition of ending up in the soil. It is seen that the chemical fertilizers and the Green Revolution brought benefits or more losses to our country. Punjab, which is the most agro-based state in India, runs a cancer train from Bathinda to Bikaner. That is, farmers put so much chemical fertilizer in their land that they also poisoned their crops. In the present situation we have no other choice.
- That we have to turn to organic farming as soon as possible. There is also a fear and mindset that if the chemical fertilizer is not put in the earth, the yield is reduced by about 30% in the first 3 years. But if we do not return to organic farming. So, a bigger threat than Corona has stood before us. Due to misuse of chemical fertilizers, the air is standing on the verge of destruction of the soil and the entire ecosystem. Cow is an essential medium for us in organic farming. Organic farming has been a part of our culture since very old times. Eco system balancing has been done in our country for thousands of years. Compost from cow dung can be cultivated for about 10 to 15 acres and very good yield can be taken. At present, quantity as well as quality have to be given a lot of attention. Gomutra is also used as a pesticide.
- When farmers use chemical pesticides, scientific research suggests that a substance called nitrous oxide is produced which is CO₂. It is 300 times more harmful. Increasing the yield of the farmer is not the only reason for his income growth. Further, Shri Shantanu Sukhdevkar said that we have to worry about organic products being available to all sections. It should not happen that the organic product is confined to a particular elite class.
- For the western world, globalization means that the whole world is a market for them, whereas for us Vasudev Kutumbakam means that the whole world is a family for us. This basic ideology makes us different from the western world. And this is the difference between the idea of organic farming and organic farming. There are 835000 farmers doing organic farming in India today, but even then, there is a lot of competition in front of us. And today Australia is leading the world in organic farming. Australia dominates 36% of the organic product. Many states have started working in this direction too, like Sikkim has declared itself as a biological state. To make organic farming successful in India, one has to move towards cow base farming. It is a matter of excitement that our farmers are seriously thinking about this subject and are slowly moving in this direction. Today, a market of 100 billion organic products has been opened in front of us.
- The subject is how ready we are for that, organic farming can prove to be a big step towards self-sufficiency. But for this, both the society and the farmer have to step together.

He is faculty at Department of Political Science University of Delhi.

He is Former Chair Professor at DR. Ambedkar Chair in Social justice Indian Institute of Public Administration.

Objective: - Channelizing Youth's Energy in Transforming India and Learning various aspects of governance, administration, entrepreneurship, industry etc. and many other fields necessary in Self-Reliant India

Venue / Digital Platform: - Zoomdigital platform, YouTube

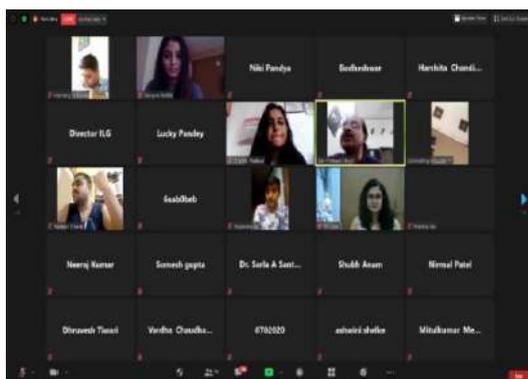

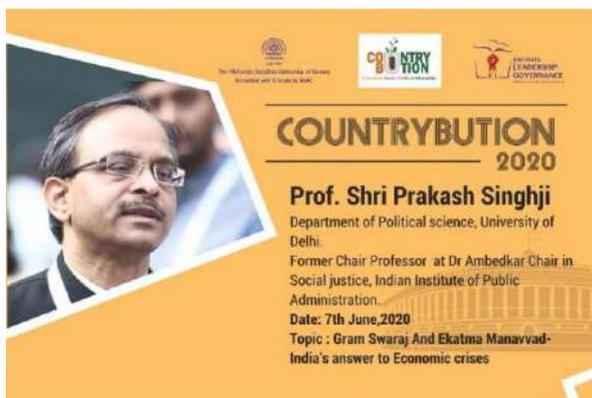

Video Link (ifany): -https://youtu.be/P_Y1g1xabFU

Activity Description:

- The focus of the speaker was on the three topics throughout the session: Gramsaran, Self-reliant and India's response to economic crisis.
- He addressed that The Gram Swaraj, a special term coined by Mahatma Gandhi and later developed by Vinoba which promotes conversion of every village into a self-efficient autonomous entity where all the systems and facilities for a dignified living are available. Gandhian ideology has inspired to keep human happiness in tandem with sustainable growth. Swaraj is self-rule with continuous effort towards independence and self-reliance. Gram Swaraj or village self-rule is decentralized, human centric and non-exploiting. It adheres to working towards simple village economy and to achieve self-sufficiency.

- Good governance demands respect for human rights, rule of law, strengthening of democracy, promoting transparency and capacity in public administration. The responsiveness of the state and its institutions to the needs and aspirations of the people, and inclusive citizenship are imperative to good governance. Democracy depends upon the equality of all human beings, their right to participate in social and political transformation and the right to development, to live in dignity. Panchayat Raj is a system and process of good governance. Villages have always been the basic units of administration in India since ancient times. The Gram Sabha can become the cornerstone of the whole Panchayat Raj institutional set-up, thereby the Indian democratic system. So, the focus is on Gandhian concept of Panchayat Raj. This is useful to development of India. So, in 21st century this concept becomes powerful in the Nation.
- It's the vehicle that was most ideal to initiate both political and economic democracy at the grassroots level was the Panchayat Raj system. Mahatma Gandhi's tours all across the country reinforced his convictions that India would benefit if the villages were governed by Village Panchayats based on the principal of "simple living and high thinking". These were village republics which were self-contained and self-reliant and having all that people want. These were the institutions where minimum standard of living could be accorded to all human beings. An individual has maximum freedom and opportunity to develop his personality to the greatest extent. In this republic, there would be a diminution of the state and the roots of democracy deepened. According to him centralization cannot be sustained as a system without adequate force.²
- The affairs are to be managed by Panchayats consisting of five persons elected annually. Gandhi aimed at the individual the centre of the local administration. People are expected to take personal interest and turn up in large numbers at the meeting to deliberate problems of common interest such as village industries, agricultural production, obligation and planning.

Topic: Volunteering- a social perspective towards making a new India

Speaker: - Ms. Swathi Ram Mam

She is the Vice President at “Socially Good” - the world's first online market place social change.

She is currently the National Executive Member at youth for Sava.

Objective: - Learning tools which can make Citizens an effective part of governance and Channelizing Youth's Energy in Transforming India

Venue / Digital Platform: - Zoom digital platform, YouTube

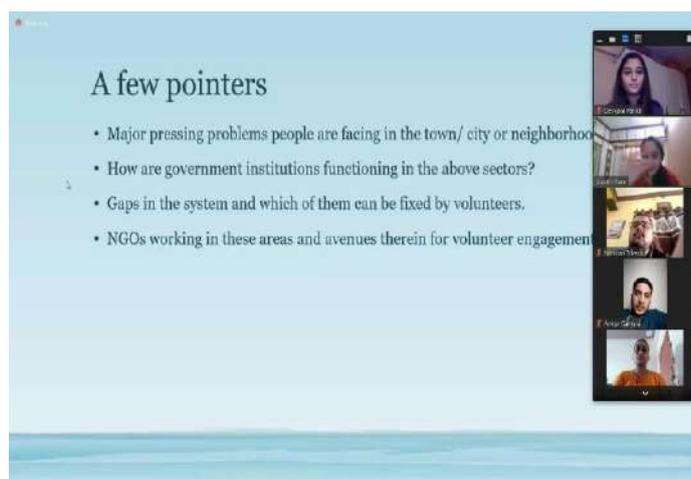

Video Link (if any): <https://youtu.be/jrZEIhIEqzA>

Activity Description: -

- Keynote speaker Swathi Ram told the participants that two-thirds of the country's population is young, full of energy, wants to do something, even after all, the present form of India is not very satisfying. It can be seen in depth that despite having such a large youth power, our country is struggling with very basic problems.
- The main reason for this is the lack of a sense of nation building. Our general belief is that development is the sole responsibility of the government. While it is the responsibility of every Indian citizen as a whole. Volunteering is an activity that uses our time, abilities, and qualities to raise the standard of living of others without feeling of any benefit. Volunteering awakens the sense of complacency in us, say 52% of the volunteers while 30% consider it as social work experience but a sense of service that I can change with my efforts in the lives of others, He is the origin of volunteering.
- When volunteering, one should keep in mind what others need. Service is the very basis of self-transformation. When we make small positive changes around us that is the basis of big change. Small good works are the basis of great works. The atmosphere of positive and mutual cooperation is created by solving local problems, while the role of social changes is created.
- If we look closely, we can see deep meaning in these words:
- Survey Bhavantu Sukhin Survey Santi Niramaya Survey Bhadrani Pashyantu

Only the spirit of happiness and health of the all-purpose beings is the root of volunteering. If all citizens, especially the youth, can bring this feeling into their lives, then it is possible to build a developed nation.

Activity Description: -

- Dr. Dholakia said that the word 'Constitution' refers to the relationship with the government somewhere. Government is not a person's word as it sometimes appears, but the government is a group of power that is established and governed by law. The basic meaning of government is the law.
- The person is limited to following the rules only. The law is built on the principles of Fundamental Rights. The constitution has been called the Mother Institute, on the basis of which other interpretations have been done by law. On the basis of this, other laws are envisaged but rather the constitution of the state comes out on the basis of the constitution.
- The constitution is the most important compilation for any nation. Even in ancient times, there was a system for controlling the emperor's emperors. The present form of a systematic constitution for running democratic governments emerged after 17 -18th century. The biggest contribution to this was the USA, where the first systematic written constitution was presented as an example. The Constitution of India is one of the most balanced legislations in the world, due to which such a diverse country is on the path of development. The average age of constitution made after 1947 in colonial

states is only 17 years. Second, the classification of power in which a balanced classification of power is made between the administrator, the judiciary and the executive and the third fundamental right

- Very few constitutions of the world have protected the rights of the public. But the Constitution of India provides protection of rights to citizens. Our constitution gives administrative powers to a three-tier government system so that the classification of functions can be done in a big way. The Supreme Court has been made the protector of the rights of the citizens of India. The public is ultimately universal. The rest are subsidiaries. The Indian Constitution is the largest written constitution in the world. The former role of the Constitution was hidden in Swaraj. Our struggle was not only for independent attainment, the basic feeling of freedom is self-rule. Self-government includes decentralization of power, protection of indigenous, cultural heritage, etc. The future constitution was laid out at the All-Party meeting after opposition from the Simon Commission. A draft of this was presented in 1928.
- This draft became the authority of the working of the Constituent Assembly in 1946. On 26 January 1930, PurnaSwaraj was demanded.
- The foundation of India's independence was laid during the Second World War. The constitution was ready in November 1949, but the constitution came into force on 26 January 1950 due to the feeling of 26 January PurnaSwaraj Day.
- In the end, we have to understand that a word like freedom is not complete in itself. The power and future of freedom is hidden in Swarajya in which self-reliance is inherent in itself. The meaning of Swarajya is that people can make beneficial decisions and policies

According to a survey, 43% of the people do not have internet facility at home. 82 crore people do not have computers at home and 72 crore students have at home.
- This is also a big problem. India is the second-largest population of the world, where the number of Internet users is increasing very fast. So, it has increased from 18% to 38% in a few years. It is also a matter that 97% of our total users use the internet through mobile phones. In the coming times, we have to understand that the business life cycle is going to be 25 to 10 years due to reduction. Education currently needs to be redesigned, redesigned, and reimagined. He said that nowadays many professors complain that students do not have books. But they have to understand that in this era of technology, we will have to use new technology tools to spread education. Today is the time that we have to redesign the National Education Policy. Why our students are not ready for international jobs? He further explained that through open education learning, models, slip learning, and Massive Online Open Courses, we are helping our students to compete.
- The 3 pillars of education are Curriculum, Conduction, and Evaluation. In these three, we have to understand how we can use more and more technology. Artificial intelligence is going to have a lot of use in the education system in the coming times. The teacher can use it in voice assistant. I can use this for advanced facial recognition. It can be used for emotional monitoring so that maximum concentration in the classroom can be studied by students.
- Artificial intelligence will prove very useful. He further explained that we have to understand the 5R theory in open education. Regarding flip learning, he told us that in the coming time after Covid-19, blended learning will be the only solution left to us. We have to adopt a four-pillar based education system.

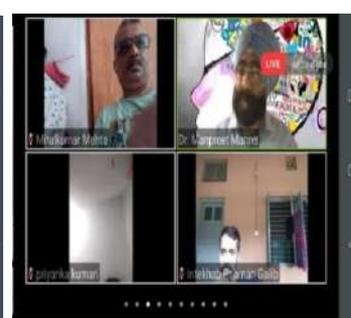

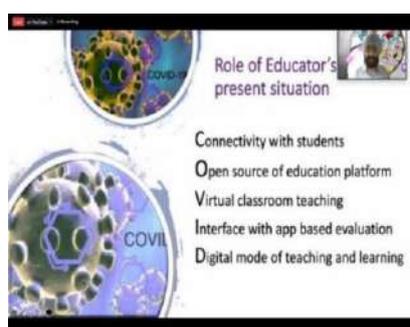

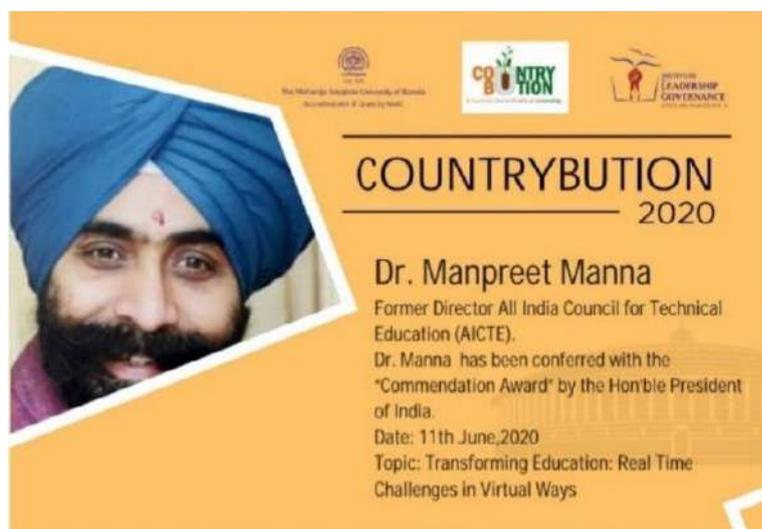

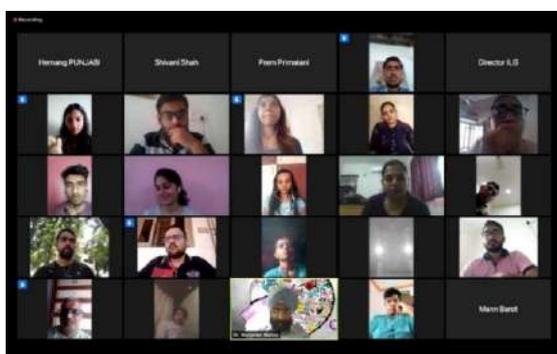

- In which e-tutorials, e-content, discussion forums, and assessments are very big parts of any education system. After Kovid-19 in our life, we have to digitalize education so that we remain social while maintaining physical distancing.

The speaker started by asking questions to the participants, what are our expectations from this course?
- The basic reason for learning and learning new is the need of 21st century leadership in the shade of human values today. In the coming times, the relevance of the three skills will be maximum Learn, Unlearn and Re-Learn. It is important to understand what leadership means to us? Learning has three parts. Input, Process, Output.
- According to Harvard University, Leadership is an art that encourages and gives direction to others so that they can work towards achieving the goal set by consensus while maintaining unity, ethics, and positivity in the group. The opportunities and competitions of the 21st century will be brand new. 21st-century leaders will have to learn to align servicing empowering these four elements, according to noted author Bill George.
- According to Daniel, the quality of coaching others is very important for the leader. In today's time, it is very important for the leader to be an expert on the subject. Doesn't being a technical master decide that you will be a good leader? But if you have a mastery in your behaviour, it is very likely that you can become one.
- Conscience is of the highest importance with all abilities. Without conscience, we cannot understand global human principles without which leadership is of no importance. Only high ideals and humane principled leadership can provide the right direction. Life values influence our behaviour as well as determine the direction of our leadership. What we do are our life values that we think are not our life values. Testing, understanding and elevating one is the first step towards leadership. It is most important to know yourself. Self-awareness develops the qualities of leadership. Well imported to Costume Sales management is its second step Self-configurationSelf-healingSelf-optimizationSelf-protectionAnd the third step is self-management Ability to delay gratification Company of Wise People Time management Reflection and learning throughout this journey, we will also have to install some filters.

- The speaker told the trainees that for many years after the industrial revolution, the government has been seen as a partner with society and a promoter. We now see the role of the government as the facilitator going forward.
- As a collector, he told us that the collector should leave the AC room and be among the public. Should be in the middle of the public. Redefining the Role of Bureaucracy Why people have a reluctance to meet an officer. 72 There are reasons why a common man has to go to the Collector office. As a collector, he decided that a fixed time limit should be set for the works within which that work should be done. Bureaucracy has to be constantly prepared for uncertain disasters and problems.

Bureaucracy means public work management. In this, the responsibilities are clearly set out in writing or the responsibilities are fixed. Bureaucracy has to act according to the guidance of political leadership. If we will not come to bureaucracy with service and

It will be difficult to work if you have a feeling of power-seeking. In public administration, the responsibility of every person is fixed and he has to answer to someone. Here it is an arrangement.

- Major positive results can be achieved if bureaucracy uses social engineering. Corporate has learned a lot from governance. This is the Art of Science of Coordination. This society is full of diversities. You cannot be a successful bureaucrat if you are not inquisitive, not an apprentice.

CEO at Zydex Industries Pvt.ltd.

Director of International board of Road Federation (IRF)

Objective: - Channelizing Youth's Energy in Transforming India**Venue / Digital Platform:** - Zoom digital platform, YouTube**Video Link (if any):**

Activity Description: -:He explain how every business impacted by this (Pandemic) disruption in one way or another, industries are reflecting on 2020 as a significant inflection point in global operations. Business-as-usual is being replaced with a new landscape embracing remote connectivity and digital technologies. Tools for the reconnection are Capture and transmission of streaming Industrial IoT sensor and machine data Intelligence at the edge: gateway devices analyse and act in real-time. Smart asset tags and trackers help manage raw material and work-in-process assets throughout production, as well as finished goods, equipment, vehicles in the field.

Post COVID Industrial Solutions

By the perspective of India there are 4 major factors which will impact Indian economy in a very positive manner:

1. Dr. Ajay Ranka started with the crude oil prices being remain stable between \$30 -\$50 posts COVID which is a good sign for India with digitization being increased rapidly.
2. Cost of Capital for borrowing in industry is decreasing day by day i.e.in other words in International markets one can get capital/money on a lower rate of interest. Interest cost is a contributing factor in businesses of India.
3. Structural Reforms by Government in order to control the economic stress.
4. **Technology Enablement i.e.,**journey towards a virtual world.

Also, there are many factors which in inversely affect the Indian Economy at the same by unless we know how to control them, he added.

Presently there is \$73 Trillion Economy which will go up to \$200 Trillion by 2050. For creating this wealth in next 30 years youth will or can play a very important role.

How the wealth is generated? Or which country can be called a wealthy country? This we need to keep in mind:

1. Production of Good & Services is more per person i.e., Productivity per Person. In other words, increase of wealth with the increase in productivity
 - E.g. During 1910s & 20s evolution of Electric Bulb led to increase in productivity of people around & a huge amount of surge came and economy went up
 - 1960s – Automation, Assembly lines, roads, highways, increase in speed of commuting whole mechanization lead to productivity
 - 1980s - Computers made our lives easier
 - Last evolution in telecommunication & internet connectivity

How do we increase productivity in next 20 – 30 years?

- Automation will convert into robotization

In today's scenario in about \$1000 a human head can be simulated. 2016 is been remember because from that particular year more emphasis was started being given to Robotization or AI.

Cost of maximum technology related products have become cheaper and affordable by most of the country & companies. This will be the biggest revolution in next 30 year. This technology will accelerate post COVID as economies are turning self-reliant.

- Impact of AI technology:

1. Labour employment (Industrial, Agriculture, Construction labour etc) for this we need to retrain or retool society
2. Limitations of Indian Industries in future (Where India needs to improve)
 - Innovation (Innovation as a mind-set of the country with sacrificial attitude i.e. at own cost)
 - Excellence (Companies pursuing excellence at their own cost will grow)
 - Worker or Executive shies away from hard work

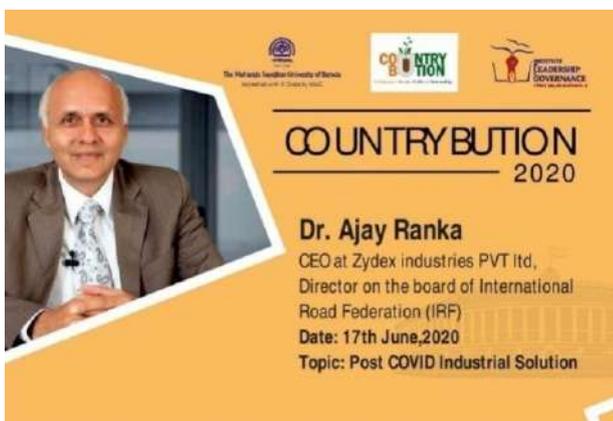

Post COVID Industrial Revolution we need to work on Innovation over Capital i.e., changing mind-set towards sacrificial attitude.

Hard work + Innovation + Faster work + Excellence will lead our country to desired GDP growth of 8 -9% unless we fail to follow this our GDP growth will stick to 4 -5% only.

Next Ajay Ranka Ji focused on Capital formation of country has dropped by 20% as we compare the same 15 years back and we need to work on that in other words for an industry to maintain positive cash flow in order to grow.

Furthermore, in the end, he commented on different sectors like agriculture, medical etc and its growth & effect post COVID and then we moved to Q&A session.

18th June' 2020 – Dr. Virendra Singh Chauhan

New Kashmir, New India

He initiated the session by quoting India/ Bharat is the oldest & ancient nation. 'New India' means we keep making new changes & alterations to our ancient India. 'New Kashmir' means after this abolishment of 370 & 35A we can proudly say now Kashmir is our Shirmani (King) of our Nation.

There were some issues in past which made Kashmiri hinder from many laws, schemes & facilities that are being provided to normal Indian. This has happened after since the Constitution of India came into existence in 1950s. And why were all these acts, laws etc. we're not applied to Jammu & Kashmir? Because there was this law mentioned in the constitution that stated without the permission of Kashmir Government & Vidhan Sabha no act, provisions, laws etc can be applied in the state except Defence & other 3 matters. In other words, Constitution of India will be applied in Jammu & Kashmir State through Article 370. There was seen a line of difference between the Government of India & Government of Jammu & Kashmir with different flags, constitutions, President, PM Etc.

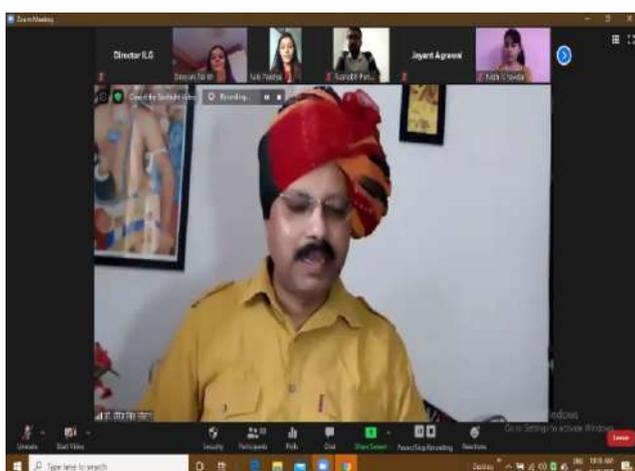

Many were against Article 370 but sacrifice of Dr. Shyama Prasad Mukherjee is to be remembered. Issue was raised during Constituent Assembly & many were against Article 370 but everybody was told that to apply Constitution of India in the state of J&K is which why 370 is there we'll remove it eventually. Almost every party was against article 370. Gulzarilal Nanda, Home Minister agreed to remove 370 & asked for time to make it work but it didn't work.

Now Veranda Ji discussed about the Article 35A. Article 35A was worse/ worse than Article 370. People were divided into two, which are State Subject & Non-State Subject. The worse thing about this article was no consideration was taken of Parliament before amendments made in constitution and with that also Constitution assembly also agreed. These amendments were made with the order of Dr. Rajendra Prasad and after this many lawyers, or the ones who were expert in constitution didn't know Article 35A existed in the constitution. This situation of not knowing about 35A came into existence when country started opposing this article few years before abolishment of 35A & 370.

He added in current situation, New Kashmir came into existence after Constitution of India was now applicable in the state of J&K i.e. abolishment of Article 370 & 35A. Now Kashmiris can enjoy same rights, duties, provisions, act etc like any other citizen of India after 3 decades of being deprived of any rights with one flag.

This is the whole gist of the session.

DAY 21: -

19th June' 2020 – Dr. JigarInamdar
Individual Social Responsibility

Dr. Jigar sir started his session by quoting “All Humans are Equal” there's no point or very disgracing to distinguish them by their caste, religion, colour etc...

As our country is moving towards a Self-Reliant Nation, to use & to promote Swedish product is our dharma. From all our 5 senses it is very difficult to please taste sense and also give up our taste sense is all together a great sacrifice and it about sacrificing vidheshi and trust Swedish.

Next, he mentioned about Regions Freedom, it is right of every religion to feel proud of it & respect it. But religious freedom is valid till we do not disgrace or demean other religions in other words we have to respect all other religions.

He added to respect every religion as Mahatma Gandhi has 11 vows. Jigar sir has attempted to relate vows with a person's national character. If a person's national character is not strong then our nation is also not strong, this has come from past experiences. Every Indian needs to understand India's National Character.

Lastly He quoted:

- Onebajhan by “Vaishnavajhan to tenekahiye je pidhparayiJane re” emphatizing pain of others and also work for them is true sense of Individual Social Responsibility.
- Be your own version
- AdarshokaChayan (Choosing proper ideal)

19th June' 2020 – Shri TarunChugh**Valedictory session – “Self-Reliance, Sustainable Development Goals”**

Tarunji started with greeting all of the participants. And session was started by listing down the work done by BJP government during the course of 6 years of BJP Government. Like URI Army Attack, Phulwama Case, Jan Dhan, SwachataAbhiyan, Ram Mandir Case conclusion, Article 370 & 35A abolishment, Kartarpur express etc...

He talked about Economic growth in India which has reached top 5 economies of world during this course of 6 years. 48 new airport building, Electricity in villages, Health schemes, COVID 19 period fight etc... India is successfully fighting COVID19 better than other developed economies. And Modi government to bring back economy to normal has launched 20 Lakh crore packages for the citizens. This government is successfully tackling the problem faced during this COVID19 phase.

In this fight of COVID19 & economy crisis, every Indian has to work to make India growth & make India a Self-Reliant Nation. Every Indian citizen has to work together to make this happen & make India growth worldwide.

The road and promenade were constructed by late philanthropist Bhagojisheth Keer and Pallonji Mistry. It is a 'C'-shaped six-lane concrete road along the coast of a natural bay. At the northern end of Marine Drive is Girgaon Chowpatty and the adjacent road along links Nariman Point at southern tip to Babulnath and Malabar Hill at northern tip. Marine Drive is situated on reclaimed land facing west-south-west.
