Chapter 1	**Introduction**	
1.1	Modern Geodynamics	4
1.2	Subduction Zone	9
1.2.1	*The Structure of subduction zone*	12
1.2.2	*Accretionary Prism*	*13*
1.2.2.1	*Ophiolites*	*13*
1.2.2.2	*Sediments*	*16*
1.2.2.3	*Mud volcanoes and fluid activity*	*16*
1.2.3	*Island Arc*	*17*
1.3	Chemistry of subduction related ophiolites, slab and mantle wedge	
1.3.1	*Subduction related Ophiolite*	*17*
1.3.2	*Chemistry of Mantle wedge and slab*	*19*
1.4	Andaman Subduction Zone	20
1.5	Objectives of this study and their significance	27
Chapter 2	**Geology and Earlier work**	
2.1	Geology of Andaman and Nicobar Islands	34

2.1.1	*The Ophiolite Group*	35
2.1.2	*The Mithakhari Group*	42
2.1.3	*The Andaman Flysch Group*	43
2.1.4	*The Archipelago Group*	44
2.1.5	*Island Arc Group*	45
2.2	Structure of the Andaman and Nicobar Islands	49
2.3	Mud Volcanoes of the Andaman islands	50
Chapter 3	**Volcanological studies of Barren Island**	
3.1	Introduction	60
3.2	Geology	62
3.3	Prehistoric eruptions	66
3.3.1	*Pre-caldera tuff breccias: deposits left by lahars and debris flows*	66
3.3.2	*Ash beds: pyroclastic surge and fall deposits*	71
3.3.3	*The prehistoric aa flows*	74
3.3.4	*Possible syn-caldera deposits*	75
3.4	Historic eruptions	76
3.5	Recent eruptions	78
3.5.1	*The 1991 eruption*	78
3.5.2	*The 1994–95 eruption*	81
3.5.3	*The 2005–06 eruption*	83
3.5.4	*The 2008 -09 eruption*	84
3.5.5	*The 2010 -11 eruption*	86
3.6	The nature of the caldera-filling aa flows	87
3.7	The cinder cone and recent ash cover	93

Chapter 4 **Materials and Methods**

4.1 Sampling Protocol 98

4.2 Analytical Methods 100

4.2.1 Petrography 109

4.2.2 Geochemical Characterization

Major element content 110

Loss on Ignition 113

Trace element contents 116

Radiogenic Isotopic ratio 121

Stable oxygen and hydrogen isotopic ratios 128

Total carbon(C) and nitrogen (N) contents in mud breccia 129

Chapter 5 **Results**

5.1 Petrological description 134

5.2 Geochemical Data 137

Chapter 6 **Discussions**

6.1 Model descriptions 155

6.1.1 Mixing model 155

Two components mixing model 155

Three components mixing model 156

6.1.2 Rayleigh Fractionation 157

6.1.3 Water rock interaction model 158

6.1.4 Melting model 159

6.2 Field observations 160

6.2.1 Mud volcanoes of Andaman Islands 160

6.3	Rocks, Clasts, Breccias from Andaman Islands	160
6.3.1	Petrography of rocks and breccias	160
6.3.2	Geochemistry of rocks and breccias from Andaman Islands	162
6.3.2.1	Clues from Major oxides and trace elements	162
	Rock clasts and breccias from Mud volcanoes Andaman Ophiolites	
6.3.2.2	The Radiogenic isotope studies of rocks of Andaman Islands	172
6.3.2.3	Stable isotopic studies of mud waters	175
6.4	Lavas and ash from Barren Island (BI) Volcano	178
6.4.1	Petrography of lava flows	178
6.4.2	Clues from Major oxides, trace elements and isotopic studies	180
	Mantle source Characteristics	186
Chapter 7	**Summary and scope for future work**	197
	Scope for future work	200
