TABLE OF CONTENTS

Acknowledgements				**i-iii**
Table of contents				**iv-viii**
Abstract of thesis				**ix-xiii**
Chapter 1.			**Introduction of Crystal Growth and Non-linear Optics**	
1.			Introduction	1
2.			Crystal growth from solution	2
3.			Expression for supersaturation	5
	3.1		Solubility curve	5
	3.2		Selection of solvent	7
4.			Non-linear Optics (NLO)	7
	4.1		Non-linear optical phenomena	8
	4.2		Non-linear optical materials	11
		4.2.1	Inorganic non-linear optical materials	12
		4.2.2	Organic non-linear optical materials	12
		4.2.3	Semi-Organic non-linear optical materials	13
5.			Significance and applications of NLO materials	14
6.			Potassium Dihydrogen Phosphate (KDP): A NLO crystal	15
7.			Impurities importance in KDP	17
8.			Significance of doping of amino acids in KDP	17
9.			Recent literature survey	18
10.			The objective of the present study	20
			References	22

Chapter 2.	**Experimental Techniques**	
1.	Introduction	27
2.	Crystal growth	27
3.	Different methods of crystal growth	28
4.	Different experimental techniques	29
5.	Powder X-ray Diffraction (XRD) Analysis	30
6.	Fourier Transform Infrared Spectroscopy (FT-IR)	32
6.1	Working of FT-IR spectrometer	33
7.	Ultraviolet-Visible Spectroscopy (UV-Vis)	34
8.	Photoluminescence (PL) Spectroscopy	36
8.1	Photoluminescence's fundamental mechanism	37
9.	Thermogravimetric Analysis (TGA)	39
9.1	Differential Thermal Analysis (DTA)	40
10.	Dielectric Analysis	41
10.1	Dielectric Constant ($\boldsymbol{\varepsilon_r}$)	42
10.2	Dielectric Loss (tan δ)	42
10.3	A. C Conductivity	42
10.4	Polaron	44
11.	Second Harmonic Generation (SHG) Efficiency	45
	References	47
Chapter 3.	**Effect of L-Cysteine of Structural, Thermal, Electrical and Optical Properties of Potassium Dihydrogen Phosphate (KDP)**	
1.	Introduction	48
2.	Experimental	49

3.			Results and Discussion	50
	3.1		Powder X-ray Diffraction (XRD) Analysis	50
	3.2		Thermogravimetric Analysis (TGA)	51
	3.3		Dielectric Analysis	53
	3.4		Photoluminescence (PL) Analysis	55
	3.5		Fourier Transform Infrared (FT-IR) Spectroscopy	57
	3.6		Ultraviolet-Visible (UV-Vis) Spectroscopy	59
	3.7		Relative Second Harmonic Generation (SHG) Efficiency	64
4.			Conclusion	65
			References	67
Chapter 4.			**Effect of L-Arginine on Structural, Electrical and Optical Properties of Potassium Dihydrogen Phosphate (KDP) Crystals**	
1.			Introduction	70
2.			Experimental	71
3.			Results and Discussion	72
	3.1		Powder X-ray Diffraction (XRD) Analysis	72
	3.2		Dielectric Analysis	74
		3.2.1	Impedance Spectroscopy	76
		3.2.2	A. C Conductivity Mechanism	80
		3.2.3	Jonscher's Plots	82
		3.2.4	Complex Modulus Spectroscopy	88
	3.3		Fourier Transform Infrared (FT-IR) Spectroscopy	93
	3.4		Ultraviolet-Visible (UV-Vis) Spectroscopy	95

		3.4.1	Wemple-DiDomenico Single Oscillator Model Analysis	100
		3.4.2	Urbach Energy (Absorption band tail)	101
	3.5		Photoluminescence (PL) Analysis	103
	3.6		Relative Second Harmonic Generation (SHG) Efficiency	104
4.			Conclusion	105
			References	107
Chapter 5.			**Effect of L-Leucine on Structural, Electrical and Optical Properties of Potassium Dihydrogen Phosphate (KDP) Crystals**	
1.			Introduction	110
2.			Experimental	111
3.			Results and Discussion	111
	3.1		Powder X-ray Diffraction (XRD) Analysis	111
	3.2		Dielectric Analysis	113
		3.2.1	Impedance Spectroscopy	115
		3.2.2	A. C Conductivity Mechanism	118
		3.2.3	Jonscher's Plots	119
		3.2.4	Complex Modulus Spectroscopy	124
	3.3		Fourier Transform Infrared (FT-IR) Spectroscopy	127
	3.4		Ultraviolet-Visible (UV-Vis) Spectroscopy	130
		3.4.1	Urbach Energy (Absorption band tail)	133
	3.5		Relative Second Harmonic Generation (SHG) Efficiency	134
4.			Conclusion	135
			References	137

Chapter 6.			**Effect of Growth under Electric Field on Structural, Electrical and Optical Properties of L-Cysteine and L-Arginine Doped Potassium Dihydrogen Phosphate (KDP) Crystals**	
1.			Introduction	139
2.			Experimental	140
3.			Results and Discussion	141
	3.1		Powder X-ray Diffraction (XRD) Analysis	141
	3.2		Dielectric Analysis	144
		3.2.1	Impedance Spectroscopy	147
		3.2.2	A. C Conductivity Mechanism	152
		3.2.3	Jonshcer's Plots	154
		3.2.4	Complex Modulus Spectroscopy	161
	3.3		Fourier Transform Infrared (FT-IR) Spectroscopy	167
	3.4		Ultraviolet-Visible (UV-Vis) Spectroscopy	169
		3.4.1	Urbach Energy (Absorption band tail)	171
	3.5		Photoluminescence (PL) Analysis	171
	3.6		Relative Second Harmonic Generation (SHG) Efficiency	174
	4.		Conclusion	174
			References	176
Chapter 7.			**Future Scopes**	178
			List of Publications	179
			List of Poster Presentations	180
