CONTENTS

	Introduction	1
1.	Histochemical changes in glycogen and phosphorylase in the pigeon pectoralis during disuse atrophy	5
2.	Histochemical observations on succinic dehydrogenase in pigeon pectoralis during disuse atrophy	19
3.	Cholinesterases in the pigeon pectoralis during disuse atrophy	29
4.	Electrolyte changes in breast muscle and serum of pigeon under disuse atrophy of the muscle	40
5.	Effect of disuse atrophy on fat metabolism in the pigeon breast muscle	48
6.	Effect of denervation on the red and white fibres of the pectoralis muscle of pigeon	61
7.	Effect of denervation on glycogen, phosphorylase, succinic dehydrogenase and lipase levels in the pigeon breast muscle	86
8.	Histochemical investigation on normal and dystrophic human muscle	97
9.	Lipase activity in the normal and dystrophic human muscle	122
	Summary and Conclusions	129
	Bibliography	135
