Acknowledgement

First and foremost my deepest gratitude to my supervisor **Dr. Kauresh D. Vachhrajani** for all exceptional expert counsel and guidance he gave me to see the fruition of this study. He has been a motivating force throughout my carrier, during my master's dissertation and doctoral research. Thank you for encouraging me to go on through the toughest moments of my research.

I express my gratitude to **Dr. Ketan Tatu**, Senior Scientist, GEER Foundation for sharing useful insights of his research on behavioral studies on mute swan. It was an honor to work with a scientist whose dedication to quality research is matched only by his commitment to wetland conservation. I also thank **Dr. P.C. Mankodi**, Head of the Dept. Zoology for his suggestions and tips. I also thank **Dr. Geeta Padte**, who was the head of the department during the initial phase of my work. I thank **Dr. Bharat Jethva**, former scientist, GEER foundation for encouraging me to carry out this research. I am also thankful to **Dr. Rajarathinavelu Nagarajan**, AVC College, Rangantithu, (Tamil Nadu) for his expert advice on study design and for his valuable inputs in data collection.

I express my gratitude to **Shri Bharat Pathak**, Additional Chief Conservator of Forests & Director, GEER Foundation, Gandhinagar for facilitating a great atmosphere to do my research successfully. I also thank **Dr. C. N. Pandey**, Principal Chief Conservator of Forests (Wildlife) and former director GEER Foundation for providing me opportunity to work on Lesser Flamingo project. I also thank the entire staff of GEER

Foundation who unknowingly were a source of inspiration and made this an enjoyable place to learn.

Invaluable field support was provided by **Mr. Irshad Theba**, my friend and colleague at GEER Foundation. His watchful eyes didn't allow me to miss a single bird even at a distance where a normal human eye wouldn't spot anything!! I owe him a lot for his constant support during the toughest of field surveys.

Many people enriched my field experience by sharing their knowledge on the breeding and distribution of the species in the areas like Little Rann of Kachchh and Gulf of Khambhat, especially **Shri Uday Vora,** Conservator of Forests, Gujarat Forest Department, who invariably helped and guided me in searching Lesser Flamingo breeding and congregation sites. I owe him a lot for his immense help.

I especially thank **Forest Department staff of Wild Ass Sanctuary** and Kachchh Desert Wildlife Sanctuary for their support and necessary permissions.

I appreciate the amity, support, and advice of my friends at the Zoology Department as well as GEER Foundation. Specifically, I would like to thank **Dr. Pranav Pandya, Manan Shukla, Jignesh Trivedi, Dr. Sandeep Munjpara, Dr. Bhavik Patel, Gunjan Soni** and **Dr. Dishant Parasharya** for their constant support, guidance and for the intellectual discussions that helped me improve the statistical analyses. I would also like to thank my friends, **Gaurang Rajyaguru, Parth Malkan** and **Deepak** for their motivation and constant support. I would also like to

extend my hearty thanks to **Bhavesh Trivedi** for his help in photo documentation of my research work.

Invaluable field support was provided by **Late Shri Rahim Bhai of Surajbari, Pratap Bhai, Merbhai, Makwanabhai and Malek Bhai** of Wild Ass Sanctuary, Bajana. Without their dedication during the nesting surveys in Little Rann of Kachchh, this work would not have been successfully completed.

I owe an immeasurable amount of gratitude to my father **Shri R. B. Vyas** and mother **Naliniben**, my elder brother **Niraj** and **Hetal Bhabhi** and my sweet little niece **Vaidehi** and **Jiya**. I dedicate this research to my little daughter **Vishwa**. I am appreciative of my wife **Pooja** for providing adore, encouragement and support throughout my career.

Above all, I thank the **Almighty** for providing me the opportunity to work on one of his greatest creation “Lesser Flamingos”.

(Virag Vyas)
