TABLE OF CONTENTS

Chapters Page No.

List of Figures ……..... …(i)

List of Tables …… ..... (v)

List of Abbreviations……..... (vi)

Abstract…….. ..... ……(ix)

CHAPTER ONE

1. INTRODUCTION 1

1.1 Central nervous system and their cell types 1

1.2 Oligodendrocytes..... 1

1.3 Oligodendrocyte origin and specification 3

1.4 Glial Cell migration 6

1.5 Factors regulating OPC migration..... 7

1.5.1 Intrinsic Factors 7

1.5.2 Extrinsic Factors 8

1.6 PDGF and its receptors 13

1.7 PDGF-A activated signaling pathways in OPC migration..... 15

1.8 Oligodendrocytes migration and cytoskeleton 16

1.9 Demyelinating diseases/Neurodevelopmental disorders perspective - OPC migration defects..... 18

1.10 PDGF and Cancer..... 20

1.11 GLIOMA 21

1.12 C6 glioma as model system for Glioblastoma..... 22

1.13 Rationale of the present study..... 23

1.14 Objectives..... 24

CHAPTER TWO

2.Material and Methods 27

2.1 Oligodendrocyte Isolation and Culture 28

2.2 Cell Line Culture and Maintenance 28

2.3 Chemicals and Inhibitors 28

2.4 Migration Assays 29

A) Agarose drop assay 30

B) Scratch assay 30

2.5 Cell Proliferation Assay 30
2.6 Small Interfering RNA (siRNA) Transfection 31
2.7 Plasmid Transfection 31
2.8 Restriction digestion, end filling by klenow fragment and blunt end ligation 31
2.9 Plasmid transformation and isolation 32
2.10 Western blotting 32
2.11 Immunocytochemistry 33
2.12 Immunoprecipitation 34
2.13 Cell Survival Assay 34
2.14 Colony Formation Assay 35
2.15AdhesionAssay 35
2.16 Invasion Assay 35
2.17 Sphere formation Assay 36
2.18 RNA Isolation and qPCR 36
2.19 Microscopy and Statistical Analysis 37

CHAPTER THREE

3. To determine the role of ERK1/2 in the regulation of OPC migration and cytoskeletal reorganisation 38

3.1 Introduction 39

3.2 Plan of Work 41

3.3 Results 41

3.3.1 Reduction of ERK expression by U0126 or siRNA inhibits the PDGF-A induced OPC migration 42

3.3.2 PDGF-A induce actin reorganization in OPCs 42

3.3.3 PDGF-A induce pERK1/2-Paxillin-FAK complex formation in OPCs 43

3.4 Discussion 44

3.5 Conclusion 46

CHAPTER FOUR

4. To determine the crosstalk of ERK1/2-ROCK signalling in OPCs 55

4.1 Introduction 55

4.2 Plan of Work 57

4.3 Results 57

4.3.1 ROCK signalling regulates OPC migration 57

4.3.2 ROCK inhibition regulates PDGF-A induced ERK activation 57

4.3.3 ROCK inhibition has no effect in OPC proliferation and survival 58

4.3.4 ROCK inhibition modulates actin-myosin expression..... 58
4.3.5 ROCK signalling does not modulate FAK-Paxillin interaction..... 59
4.4 Discussion..... ……59
4.5Conclusion…… 61

CHAPTER FIVE
5.To determine the role of ERK and ROCK signaling in PDGFR inhibition mediated intracellular signaling in C6 glioma growth and migration 67
5.1 Introduction …… 67
5.2 Plan of work …… 70
5.3 Results …….. 71
5.3.1 Effect of PDGFR, ERK and ROCK signaling inhibition on C6 cell survival and proliferation…… 71
5.3.2 Involvement of ERK and ROCK signaling in PDGFR mediated glioma migration…… 71
5.3.3 PDGFR inhibition modulates cytoskeleton reorganization and pERK-FAK-Paxillin complex formation in C6 glioma…… 72
5.3.4 PDGFR inhibition impairs anchorage independent growth, sphere forming ability, adhesion and invasion of C6 glioma 72
5.3.5 PDGFR inhibition regulates the expression of GFAP, FAK, BDNF and MeCP2..... 73
5.3.6 Overexpression of ERK1 regulates C6 glioma migration..... 73
5.3.7 ERK1/2 knockdown in C6 Glioma…..……... 74
5.3.8 Inhibition of Calcium signaling in C6 glioma …….…. 74
5.4 Discussion..... …74
5.5 Conclusion……..... 78

CHAPTER SIX
6. SUMMARY……...…… 89

BIBLIOGRAPHY……...……. 93
LIST OF PUBLICATIONS…… ..110
