LIST OF TABLES:

NAME	PAGE NO
Table 1.1. Composition of Fermented Papaya Preparation	21
Table 2.2.1. Experiment design	46
Table 2.3.1. Heart weight and Body weight ratio.	68
Table 2.3.2. Effect of FPP on CK MB and LDH in doxorubicin induced cardiotoxicity in rats	69
Table 2.3.3. Effect of FPP on Cholesterol and Triglycerides in doxorubicin induced cardiotoxicity in rats	71
Table 2.3.4. Effect of FPP on SGPT, SGOT and ALP in doxorubicin induced hepatotoxicity in rats	73
Table 2.3.5. Effect of FPP on Urea and Creatinine in doxorubicin induced hepatotoxicity in rats	75
Table 2.3.6. Effect of FPP on Glutathione peroxidise & Glutathione in doxorubicin treated heart of rats.	77
Table 2.3.7. Effect of FPP on Superoxide dismutase & Catalase in doxorubicin treated heart of rats.	78
Table 2.3.8. Effect of FPP on Malondialdehyde, in doxorubicin treated heart of rats.	79
Table 2.3.9. Effect of FPP on Glutathione peroxidise and Glutathione in doxorubicin treated liver of rats	81
Table 2.3.10. Effect of FPP on Catalase & Superoxide dismutase in doxorubicin treated liver of rats	82
Table 2.3.11. Effect of FPP on Malondialdehyde, in doxorubicin treated liver of rats	83
Table 2.3.12. Effect of FPP on Glutathione peroxidise Glutathione in doxorubicin treated kidney of rats	85
Table 2.3.13. Effect of FPP on Catalase & Superoxide dismutase in doxorubicin treated kidney of rats	86
Table 2.3.14. Effect of FPP on Malondialdehyde in doxorubicin treated kidney of rats	87
Table 3.2.1 Experimental design	97
Table 3.3.1.Body weight, Tissue weight and Ratio of Tissue weight to Body weight:	99
Table 3.3.2-Effect of FPP on CK MB and LDH in doxorubicin induced cardiotoxicity in rats.	101
Table 3.3.3 Effect of FPP on Cholesterol and Triglycerides in doxorubicin induced cardiotoxicity in rats	102

Table 3.3.4 Effect of FPP on SGPT, SGOT and ALP in doxorubicin induced hepatotoxicity in rats	103
Table 3.3.5. Effect of FPP on Urea and Creatinine in doxorubicin induced hepatotoxicity in rats	104
Table 3.3.6. Glutathione & Glutathione Peroxidase in heart	106
Table 3.3.7. Effect of FPP on Superoxide dismutase & Catalase in doxorubicin treated heart of rats.	107
Table 3.3.8. Effect of FPP on Malondialdehyde, in doxorubicin treated heart of rats.	108
Table 3.3.9. Effect of FPP on Glutathione peroxidise and Glutathione in doxorubicin treated liver of rats	110
Table 3.3.10. Effect of FPP on Catalase & Superoxide dismutase in doxorubicin treated liver of rats	111
Table 3.3.11. Effect of FPP on Malondialdehyde in doxorubicin treated liver of rats	112
Table 3.3.12. Effect of FPP on Glutathione peroxidise Glutathione in doxorubicin treated kidney of rats	114
Table 3.3.13. Effect of FPP on Catalase & Superoxide dismutase in doxorubicin treated kidney of rats	115
Table 3.3.14. Effect of FPP on Malondialdehyde in doxorubicin treated kidney of rats	116
Table 3.3.15. Comparison between pretreatment of FPP in Acute dose and Cumulative dose in rats(serum)	117
Table 3.3.16. Comparison between pretreatment of FPP in Acute dose and Cumulative dose in rats.(serum)	118
Table 3.3.17. Comparison between acute and cumulative dose of FPP pretreatment in rats.(Heart)	119
Table 3.3.18. Comparison between acute and cumulative dose of FPP pretreatment in rats.(Liver)	120
Table 3.3.19. Comparison between acute and cumulative dose of FPP pretreatment in rats.(Kidney)	121

LIST OF FIGURES:

NAME	PAGE NO
FIG.1.1. Structure of doxorubicin	8
FIG:2.1.1. Accumulation of anthracyclines in the nucleus of neoplastic and proliferating cells	25
FIG: 2.1.2. Oxidative stress	27
FIG:2.3.1. Effect of FPP on CKMB and LDH levels in doxorubicin induced cardiotoxicity	69
FIG: 2.3.2. Effect of FPP on TRIG and CHOL levels in doxorubicin induced cardiotoxicity	71
FIG: 2.3.3. Effect of FPP on SGPT & SGOT in doxorubicin induced hepatotoxicity in rats	73
FIG: 2.3.4. Effect of FPP on ALP in doxorubicin induced hepatotoxicity in rats	73
FIG:2.3.5. Effect of FPP on Urea in doxorubicin induced renal toxicity in rats	75
FIG: 2.3.6. Effect of FPP on Creatinine in doxorubicin induced renal toxicity in rats	75
FIG: 2.3.7. Effect of FPP on Glutathione in doxorubicin treated heart of rats	77
FIG: 2.3.8. Effect of FPP on Glutathione peroxidase in doxorubicin treated heart of rats	77
FIG: 2.3.9. Effect of FPP on Catalase in doxorubicin treated rat heart	78
FIG:2.3.10. Effect of FPP on SOD in doxorubicin treated heart of rats	78
FIG: 2.3.11. Effect of FPP on Malondialdehyde in doxorubicin treated heart of rats	79
FIG: 2.3.12. Effect of FPP on Glutathione in doxorubicin treated liver of rats	81
FIG: 2.3.13. Effect of FPP on Glutathione peroxidase in doxorubicin treated liver of rats	81
FIG: 2.3.14 Effect of FPP on Catalase in doxorubicin treated liver of rats	82
FIG: 2.3.15 Effect of FPP on SOD in doxorubicin treated liver of rats	82
FIG: 2.3.16 Effect of FPP on Malondialdehyde in doxorubicin treated liver of rats	83
FIG: 2.3.17 Effect of FPP on Glutathione in doxorubicin treated kidney of rats	85

FIG: 2.3.18 Effect of FPP on Glutathione peroxidase in doxorubicin treated kidney of rats	85
FIG: 2.3.19 Effect of FPP on Catalase in doxorubicin treated kidney of rats	86
FIG: 2.3.20 Effect of FPP on SOD in doxorubicin treated kidney of rats	86
FIG: 2.3.21 Effect of FPP on Malondialdehyde in doxorubicin treated kidney of rats	87
FIG:3.3.1 Effect of FPP on CKMB and LDH levels in doxorubicin induced cardiotoxicity	101
FIG:3.3.2 Effect of FPP on TRIG and CHOL levels in doxorubicin induced cardiotoxicity	102
FIG:3.3.3 Effect of FPP on SGPT & SGOT in doxorubicin induced hepatotoxicity in rats	103
FIG:3.3.4 Effect of FPP on ALP in doxorubicin induced hepatotoxicity in rats	103
FIG:3.3.5 Effect of FPP on Urea in doxorubicin induced renal toxicity in rats	104
FIG:3.3.6 Effect of FPP on Creatinine in doxorubicin induced renal toxicity in rats	104
FIG:3.3.7 Effect of FPP on Glutathione in doxorubicin treated heart of rats	106
FIG:3.3.8 Effect of FPP on Glutathione peroxidase in doxorubicin treated heart of rats	106
FIG:3.3.9 Effect of FPP on Catalase in doxorubicin treated rat heart	107
FIG:3.3.10 Effect of FPP on SOD in doxorubicin treated heart of rats	107
FIG:3.3.11 Effect of FPP on Malondialdehyde in doxorubicin treated heart of rats	108
FIG 3.3.12 Effect of FPP on Glutathione in doxorubicin treated liver of rats	110
FIG 3.3.13 Effect of FPP on Glutathione peroxidase in doxorubicin treated liver of rats	110
FIG:3.3.14 Effect of FPP on Catalase in doxorubicin treated liver of rats	111
FIG:3.3.15 Effect of FPP on SOD in doxorubicin treated liver of rats	111
FIG:3.3.16 Effect of FPP on Malondialdehyde in doxorubicin treated liver of rats	112
FIG:3.3.17 Effect of FPP on Glutathione in doxorubicin treated kidney of rats	114
FIG:3.3.18 Effect of FPP on Glutathione peroxidase in doxorubicin treated kidney of rats	114
FIG:3.3.19 Effect of FPP on Catalase in doxorubicin treated kidney of rats	115

FIG:3.3.20 Effect of FPP on SOD in doxorubicin treated kidney of rats	115
FIG:3.3.21 Effect of FPP on Malondialdehyde in doxorubicin treated kidney of rats	116
FIG:3.3.22 Comparison between acute and cumulative dose of FPP pretreatment in serum	117
FIG:3.3.23 Comparison between acute and cumulative dose of FPP pretreatment in serum	118
FIG:3.3.25 Comparison between acute and cumulative dose of FPP pretreatment in serum	118
FIG:3.3.25 Comparison between acute and cumulative dose of FPP pretreatment in rats.(Heart)	119
FIG 3.3.26 Comparison between acute and cumulative dose of FPP pretreatment in rats.(Liver)	120
FIG 3.3.27 Comparison between acute and cumulative dose of FPP pretreatment in rats.(Kidney)	121
FIG 4.3.1 Percentage Viability of Dox and FPP in H9c2 cells	140
FIG 4.3.2 Percentage Viability of FPP +Dox H9c2 cells	140
FIG 4.3.3 Percentage Viability of Dox and FPP in BRL-3A cells	141
FIG 4.3.4 Percentage Viability of Dox and FPP + Dox in BRL-3A cells	141

LIST OF PLATES:

NAME	PAGE NO
PLATE 1 : Histopathological examination of rat heart	88 (a)
PLATE 2 : Histopathological examination of rat Liver	88 (b)
PLATE 3 : Histopathological examination of rat kidney	88 (c)
PLATE 4 : Histopathological examination of rat heart	121(a)
PLATE 5 : Histopathological examination of rat liver	121(b)
PLATE 6 : Histopathological examination of rat kidney	121 (c)
PLATE 7-Bax and Bcl-2 gene expression in H9c2 and BRL-3A	143 (a)
PLATE 8-FPP modulates MMP in H9c2 & BRL-3A cells exposed to doxorubicin	143 (b)
PLATE 9-FPP modulates Dapi staining in H9c2 & BRL-3A cells exposed to doxorubicin	143 (c)
PLATE 10-FPP modulates ROS production in H9c2 and BRL-3A cells:	143 (d)
