TABLE OF CONTENTS

Acknowledgement i

List of Abbreviations iii

Introduction 1 – 14

Material and Methods 15 – 29

Chapter 1: Inhibition of BMP signaling reduces MMP-2 and MMP-9 expression and obstructs wound healing in regenerating fin of teleost fish *Poecilia latipinna* 30 – 47

Chapter 2: BMP signaling facilitates recruitment of pleuripotent cells during early appendage regeneration through tissue organization 48 – 68

Chapter 3: BMP signaling regulates the skeletal and connective tissue differentiation during caudal fin regeneration in teleost fish 69 – 85

General Considerations 86 – 98

Bibliography 99 – 119
