List of Figures

2.1 Few configurations or basis states for m spinless bosons in N sp states 19
2.2 Ensemble averaged state density for BEGOE(k) 20
2.3 Interpolating parameter μ plotted against the body rank k for BEGOE(k) 21
2.4 Nearest Neighbor Spacing Distribution for BEGOE(k) 22

3.1 Block form of BEGOE(1+2)-F ensemble 45
3.2 Eigenvalue density for BEGOE(2)-F 46
3.3 Average-Fluctuation separation for BEGOE(2)-F 47
3.4 Nearest Neighbor Spacing Distribution for a BEGOE(1+2)-F ensemble 48
3.5 A plot of Brody parameter ω as a function of λ for BEGOE(1+2)-F ensemble 49
3.6 Δ_3 statistics for BEGOE(1+2)-F ensemble 50
3.7 Plot showing $1/f$ noise behavior for BEGOE(1+2)-F 51

4.1 Block matrix form for BEGOE(1 + 2)-$S1$ ensemble 72
4.2 Ensemble averaged eigenvalue density for BEGOE(1 + 2)-$S1$ ensemble 73
4.3 Nearest Neighbor Spacing Distribution for BEGOE(1 + 2)-$S1$ ensemble 74
4.4 Transition of NNSD with respect to λ for BEGOE(1 + 2)-$S1$ ensemble 75
4.5 Ensemble averaged variances for BEGOE(2)-$S1$ ensemble 76
4.6 Normalized self-correlations in energy centroids for BEGOE(2)-$S1$ ensemble 77
4.7 Expectation values of the two pairing Hamiltonians and $\hat{C}_2(SU(3))$ vs $\hat{E}$ for BEGOE(1+2)-$S1$ 78

5.1 Block form of EGOE(1+3)-s ensemble 88
5.2 Ensemble averaged eigenvalue density for EGOE$(1+3)$-s 89
5.3 Average-fluctuation separation for EGOE$(1+3)$-s 90
5.4 Nearest Neighbor Spacing Distribution for EGOE$(1+3)$-s 91
5.5 Δ_3 statistics for EGOE$(1+3)$-s 92

6.1 Variation of $\langle r \rangle$ and $\langle \tilde{r} \rangle$ with respect to λ for $H_{3\times 3}$ ensemble 108
6.2 Variation of $\langle r \rangle$ and $\langle \tilde{r} \rangle$ with respect to λ for $H_{d\times d}$ ensemble 109
6.3 Variation of $\langle r \rangle$ and $\langle \tilde{r} \rangle$ with respect to Λ for $H_{d\times d}$ ensemble 110
6.4 Mapping between λ and Λ 111
6.5 $P(r)dr$ analysis for BEGOE(1+2)-F 112
6.6 $P(r)dr$ analysis for BEGOE(1+2)-$S1$ 113
6.7 $P(r)dr$ analysis for Heisenberg's XXX model 114
6.8 Variation of $\langle r \rangle$ and $\langle \tilde{r} \rangle$ with respect to ε for Heisenberg's XXX model 115
6.9 $P(r)dr$ analysis for Heisenberg's XXZ model 116
6.10 Variation of $\langle r \rangle$ and $\langle \tilde{r} \rangle$ with respect to ε for Heisenberg's XXZ model 117

List of Tables

2.1 Dimensionality and Independent Matrix Elements 13

2.2 Variation of interpolating parameter μ with respect to the rank of k-body interaction 16

3.1 Root Mean Square deviations (Δ_{RMS}) for each F spin 36

3.2 Inputs to calculate fixed-F centroids and variances for given Ω 37

B-1 $U(\Omega) \supset SO(\Omega)$ reductions for $\Omega \geq 4$ for BEGOE(1+2)-$S1$ 128
