LIST OF TABLES

Table No.			Page No.
2.1	:	Precambrian stratigraphic framework of the Aravalli Mountain Belt (after Heron, 1953).	13
2.2	:	Classification of Aravalli Supergroup (after Gupta et al, 1992).	16
2.3	:	Classification of Delhi Supergroup (after Gupta et al. 1992).	17
2.4	:	Proterozoic succession of Gujarat (after Merh, 1995).	18
2.5	:	Stratigraphic succession of the Aravalli Supergroup in the type area (after Roy, 1991).	28
2.6	:	Formations present in Gujarat (after Gupta and Mukherjee, 1938).	32
2.7	:	Lithostratigraphic sequence of the Kadana reservoir and adjacent area, Rajasthan and Gujarat states, India (after Iqbaluddin, 1989).	40
2.8	:	Rb-Sr isochron ages of the granites from the Precambrians of Rajasthan and Northeastern Gujarat and their significance (after Sastry, 1992).	45
2.9	:	Geochronological framework for the evolution of the Aravalli craton (after Roy and Kröner, 1996).	46
5.1	:	AMS data for rocks of the Lunavada region.	123-124
6.1	:	Mineral assemblages in the different rocks of the study area.	138
6.2a	:	CSD data for schist lying close to the Godhra Granite (Sample A).	171
6.2b	:	CSD data for schist lying far from the Godhra Granite (Sample B).	171
6.3	:	Comparative results from CSD study of schists	174
6.4a	:	CSD data for quartzites in Lunavada region (Sample Q1 and Q2).	176
6.4b	:	CSD data for quartzites from Lunavada region (Sample Q3 and Q4).	177
7.1	:	Representative microprobe analyses from the Anjavana sample.	190
7.2	:	Representative microprobe analyses from the Lunavada sample.	191
7.3	:	Microthermometry data of Type-1 fluid inclusions.	215-218
7.4	:	Data of homogenization temperatures of Type-1 CO_2 inclusions and the average diameter.	220-221
7.5	:	Microthermometry data of Type-2 fluid inclusions.	228-229
7.6	:	Microthermometry data of Type-3 fluid inclusions.	231

7.7 : Table showing data of fluid inclusions subjected to Raman microspectroscopy. 239

Panaromic view (South of Lunavada town)
