

LIST OF TABLES

Table No.

1. Mean JIM Scores in various studies.
2. Distribution of the Present sample according to high/low level Group of Schools.
3. Distribution of the Present sample according to Medium of instruction Group.
4. Distribution of the Present Sample according to Sex Group.
5. Schoolwise Mean of all variables.
6. Significance of difference between the Mean score for Authenticity According to Boys & Girls.
7. Significance of difference between the Mean Scores for Legitimacy according to Boys and Girls.
8. Significance of difference between the Mean Scores for Productivity according to Boys and Girls.
9. Significance of difference between the Mean Scores for Classroom climate according to Boys and Girls.
10. Significance of difference between the Mean Score for the component F1 (positive-negative Attitude) of BIM according to Boys and girls.
11. Significance of difference between the Mean Score for the component F2 (Belongingness - Alienation) of BIM according to Boys and girls.
12. Significance of difference between the Mean Scores for the component F3 (Idealism - Pragmatism) of JIM according to Boys and Girls.

contd...

(ix)

Table No.

13. Significance of difference between the Mean Scores for the Component F3 - Personal Control-Fatalism) of JIM according to Boys and Girls.
14. Significance of difference between the Mean Scores for the component F5 (Optimism-Pessimism) of JIM according to Boys and Girls.
15. Significance of difference between the Mean Scores of the component F-6 Flexibility - Dogmatism) of JIM according to Boys and Girls.
16. Significance of difference between the Mean Scores of JIM (Academic Motivation) according to Boys and Girls.
17. Significance of Difference between the Mean Scores for Internal Control - A Factor of Origin Climate Questionnaire according to Boys and Girls.
18. Significance of difference between the Mean Scores of Goal setting - A Factor of Origin Climate Questionnaire according to Boys and Girls.
19. Significance of difference between the Mean Scores of Internal Activity - A Factor of Origin Climate Questionnaire according to Boys and Girls.
20. Significance of difference between the Mean Scores of Personal Responsibility, a Factor of Origin Climate Questionnaire according to Boys and Girls.
21. Significance of difference between the Mean Scores for Reality Perception - A Factor of Origin Climate Questionnaire according to Boys and Girls.
22. Significance of difference between the Mean Scores of Self-Confidence - A Factor of Origin Climate Questionnaire according to Boys and Girls.

contd...

Table No.

23. Significance of difference between the Mean Scores of Origin Climate Questionnaire according to Boys and Girls.
24. Significance of Difference between the Mean Scores of Authenticity according to Medium of the Schools.
25. Significance of difference between the Mean Scores for Legitimacy according to Medium of the Schools.
26. Significance of difference between the Mean Scores for Productivity according to Medium of the Schools.
27. Significance of difference between the Mean Scores for Classroom Climate according to the Medium of Schools.
28. Significance of difference between the Mean Scores for the Component F1 (Positive-Negative Schools attitude) of JIM according to Medium of the Schools.
29. Significance of difference between the Mean Scores for the component F2 (Belongingness-Alienation) of JIM according to Medium of the Schools.
30. Significance of difference between the Mean Scores for, the Component F3 (Idealism - Pragmatism) of JIM according to Medium of the Schools.
31. Significance of difference between the Mean Scores for the component F4 (Personal Control-Fatalism) of JIM according to the Medium of Schools.
32. Significance of difference between the Mean Score for the component F5 (Optimism-Pessimism) of JIM according to the Medium of Schools).
33. Significance of difference between the Mean Scores for the component F6 (Flexibility - Dogmatism) of JIM according to the Medium of Schools.

Table No.

34. Significance of difference between the Mean Scores of JIM (Academic Motivation) according to Medium of Schools.
35. Significance of difference between the Mean Scores for Internal Control - A Factor of Origin Climate Questionnaire according to Medium of Schools.
36. Significance of Difference between the Mean Scores for Goal Setting - A Factor of Origin Climate Questionnaire according to the Medium of Schools.
37. Significance of difference between the Mean Scores for Instrumental Activity - A Factor of Origin Climate Questionnaire according to Medium of Schools.
38. Significance of difference between the Mean Scores for Personal Responsibility & Factor of Origin Climate Questionnaire according to Medium of instruction.
39. Significance of difference between the Mean Scores for Reality Perception - A Factor of Origin Climate Questionnaire according to Medium of Schools.
40. Significance of difference between the Mean Scores for self-confidence - A Factor of Origin Climate Questionnaire according to Medium of Schools.
41. Significance of Difference between the Mean Scores for Origin Climate Questionnaire according to Medium of Schools.
42. Significance of difference between the Mean Scores for Authenticity according to the Level of the Schools.
43. Significance of difference between the Mean Scores for Legitimacy according to the Level of the Schools.

contd...

Table No.

44. Significance of difference between the Mean Scores for Productivity according to the Level of the Schools.
45. Significance of difference between the Mean Scores for Classroom Climate according to the Level of Schools.
46. Significance of difference between the Mean Scores for the component F1 - (Positive - Negative Attitude) of JIM according to the Level of Schools.
47. Significance of difference between the Mean Scores for the Component F2 - (Belongingness-Alienment) of JIM according to Level of the Schools.
48. Significance of difference between the Mean Scores for the component F3-Idealism-Pragmatism) of JIM according to the Level of Schools.
49. Significance of difference between the Mean Scores for the Component F4 - (Personal Centre-Fatalism) of JIM ACCORDING to the Level of Schools.
50. Significance of difference between the Mean Scores for the Component F5-(Optimum-Passivism) of JIM according to the Level of Schools.
51. Significance of difference between the Mean Scores for the Component F6 - (Flexibility-Dogmatism) of JIM according to Level of the Schools.
52. Significance of difference between the Mean Scores for JIM Academic Motivation according to Level of the Schools.
53. Significance of difference between the Mean Scores for Internal Control - A Factor of Origin Climate Questionnaire according to the level of schools.

contd...

Table No.

54. Significance of difference between the Mean Scores for Goal Setting - & Factor of Origin Climate Questionnaire according to the level of Schools.
55. Significance of difference between the Mean Scores of Instrumental Activity - & Factor of Origin Climate Questionnaire according to the Level of Schools.
56. Significance of Difference Between the Mean Scores of Personal Responsibility - & Factor of Origin Climate Questionnaire according to the Level of Schools.
57. Significance of difference between the Mean Scores of Personal Responsibility - & Factor of Origin Climate Questionnaire according to the Level of Schools.
58. Significance of difference between the Mean Scores for Reality Perception - & Factor of Origin Climate Questionnaire according to the Level of Schools.
59. Significance of difference between the Mean Scores for Self Confidence - & Factor of Origin Climate Questionnaire according to Level of Schools.
59. Significance of difference between the Mean Scores for Origin Climate Questionnaire according to the Level of Schools.
60. Mean and S.D. of the Variable JIM.
61. The Comparison of the Mean Score of JIM with various studies.
62. Mean and S.Ds. of the Component of JIM.
63. Intercorrelation between components of JIM.
64. Correlation of JIM with the Components of Classroom Climate.
65. Correlation of JIM with Factors of Origin Climate Questionnaire.

contd...

Table No.

- | | |
|-----|---|
| 66. | Means and S.Ds. of Classroom Climate and Its components. |
| 67. | Comparison of Mean Score of Classroom Climate and its components with various studies. |
| 68. | Intercorrelation of the Components of Classroom Climate. |
| 69. | Correlation of Classroom Climate and its components with Factors of Origin Climate Questionnaire. |
| 70. | Mean and S.D. of Origin Climate Questionnaire. |
| 71. | The Comparison of Previous and Present study. |
| 72. | Mean and S.Ds. of the Factors of Origin Climate Questionnaire. |
| 73. | Intercorrelation of the Factors of Origin Climate Questionnaire. |
