LIST OF TABLES

Table 2. 1: List of Pgp subtrates 10

Table 2. 2: List of Pgp modulators/inhibitors 11

Table 3. 1: Calibration Curve of PTX in $CHCl_3$: MeOH 34

Table 3. 2: Evaluation of accuracy & precision of the estimation method of PTX in $CHCl_3$: MeOH 35

Table 3. 3: Calibration Curve of PTX in ACN 36

Table 3. 4: Evaluation of accuracy & precision of the estimation method of PTX in ACN 36

Table 3. 5: Calibration Curve of PTX in pH 7.4 PBS containing 20% Ethanol 37

Table 3. 6: Evaluation of accuracy & precision of the estimation method of PTX in pH 7.4 PBS 20% Ethanol 37

Table 3. 7: 1st Derivative Calibration Curve of PTX in ACN at 248.5nm 38

Table 3. 8: Evaluation of accuracy & precision of the estimation method of 1st derivative of PTX in ACN 39

Table 3. 9: Calibration Curve of PTX in ACN: water 40

Table 3. 10: Evaluation of accuracy & precision of the estimation method of PTX in ACN:water. 40

Table 3. 11: Calibration Curve of PTX in rat plasma 42

Table 3. 12: Evaluation of accuracy & precision of the estimation method of PTX in rat plasma . 42

Table 3. 13: Mean Area ± SD obtained from the calibration curve of estimation of PTX in tissue homogenates of rat 43

Table 3. 14: Determination of accuracy and precision of estimation of PTX in tissue homogenates of rat 47

Table 3. 15: Calibration Curve of coumarin-6 49

Table 3. 16: Evaluation of accuracy & precision of the estimation method of coumarin-6 in ACN... 50

Table 3. 17: Calibration Curve of coumarin-6 51

Table 3. 18: Evaluation of accuracy & precision of the estimation method of coumarin-6 in cell lysate 51

Table 3. 19: Calibration Curve of PVA 52

Table 3. 20: Calibration Curve of Tf by BCA method 53

Table 4. 1: Coded values of the dependent variables 61

Table 4. 2: Experimental design for PTX loaded PLGA NPs 64

Table 4. 3: Computed t values and P-values for PS and E.E. 65

Table 4. 4: ANOVA of full and reduced models for PS 65

Table 4. 5: ANOVA of full and reduced models for EE 66

Table 4. 6: Validation of established relationships 70

Table 4. 7: Design of experiments for conjugation of Tf to PLGA NPs 71
Table 4. 8: Coded values of the dependent variables 79
Table 4. 9: Experimental design for PTX loaded GTS SLN 81
Table 4. 10: Computed t values and P-values for PS and E.E. 82
Table 4. 11: ANOVA of full and reduced models for PS 82
Table 4. 12 ANOVA of full and reduced models for EE 83
Table 4. 13: Validation of established relationships 87
Table 4. 14: Experimental and predicted values of PS and EE 96
Table 4. 15: Variables affecting Tf conjugation and PS during conjugation 97
Table 4. 16: Characterization of optimized batch of PTX loaded PLGA and Tf-PLGA NPs 99
Table 4. 17: Characterization of coumarin-6 loaded PLGA NPs 100
Table 4. 18: Effect of different cryoprotectants on the particle size and redispersion 102
Table 4. 19: Effect of monomer concentration on PS, EE and zeta potential 111
Table 4. 20: Effect of surfactant/stabilizer concentration on PS, EE and zeta potential 113
Table 4. 21: Effect of different surfactants/stabilizers on PS and EE 117
Table 4. 22: Effect of temperature on PS and EE 117
Table 4. 23: Effect of stirring speed on PS 118
Table 4. 24: Effect of paclitaxel concentration on PS and EE 118
Table 4. 25: Effect of pH of polymerization medium on PS and EE 118
Table 4. 26: PS of NPs before and after freeze drying 121
Table 4. 27: Partitioning of PTX in different lipids 129
Table 4. 28: Experimental and predicted values of PS and EE 133
Table 4. 29: PS of NPs before and after freeze drying 134
Table 4. 30: Stability data of PTX-PLGA NPs 141
Table 4. 31: Stability data for Transferrin conjugated PTX-PLGA NPs 142
Table 4. 32: Stability data for PTX-PBCA NPs 143
Table 4. 33: Stability data for PTX-GTS SLN 144
Table 5. 1: Uptake efficiency of-coumarin-6 loaded NPs 162
Table 5. 2: IC50 values for PTX loaded NPs and free PTX 166
Table 5. 3: Cell viability of PTX and PTX NPs at 24 hrs 170
Table 5. 4: Cell viability of PTX and PTX NPs at 48 hrs 171
Table 5. 5: Cell viability of PTX and PTX NPs at 72 hrs 172
Table 6. 1: Concentration of PTX in plasma after i.v. administration to rats at dose of 20mg/kg 179
Table 6. 2: Plasma C_{max}, T_{max}, $AUC_{(0-24)}$, $AUC_{(0-\infty)}$, MRT, $t_{1/2}$ of PTX after intravenous administration to rats at dose of 20mg/kg 180

Table 6. 3: Tumor C_{max}, T_{max}, $AUC_{(0-24)}$, $AUC_{(0-\infty)}$, MRT, $t_{1/2}$ of PTX after intravenous administration to rats at dose of 20mg/kg 180

Table 6. 4: Concentration of PTX in different organs/tissues after i.v. administration to rats at dose of 20mg/kg 182
