Certificate.....i

Acknowledgement.....ii

Table of Contents.....iv

List of Plates.....x

List of Tables.....xii

List of Figures.....xiii

Abbreviations.....xiv

Chapter 1

(1.1) Eco-city - An introduction..... 1

(1.1.1) History of Eco-city.....3

(1.1.2) Eco-city In India.....4

(1.1.3) The specific objectives of the Eco-city project.....5

(1.1.4) Criteria for selection of the towns/cities covered under the Eco-city Project.....6

(1.1.5) Towns in which the Eco-city program was implemented by government of India 6

(1.1.6) Vadodara as an Eco-city.....13

(1.2) Different types of Maps.....14

(1.2.1) General purpose maps.....14

(1.2.2) Thematic maps.....15

(1.2.2.1) Choropleth map.....17

(1.2.2.2) Proportional or graduated symbols map.....17

(1.2.2.3) Isarithmic or contour map.....18

(1.2.2.4) Dot map.....20

(1.2.2.5) Dasymetric map.....21

(1.2.3) Importance of Thematic maps 21

(1.2.4) Designing the thematic map.....22

(1.2.5) Role of Remote Sensing (RS) and Geographical Information System (GIS) in generation of thematic maps.....23

(1.3) Land use change analysis: An Overview.....25

(1.4)Analysis of Urban Green Space..... 28

(1.4.1) Part 1: Suitability of Urban green space..... 28

(1.4.1.1) Vegetation..... 31

(1.4.1.2) Temperature..... 32

(1.4.1.3) Land use.....32

(1.4.1.4) Transport.....32

(1.4.2) Part 2: Economic valuation of Urban Green Space (UGS) 33

(1.4.3) Part 3: Assessment of impact of various biophysical and socio-economic parameters on Property Value (P.V.) at VMSS level.....35

(1.5) Land suitability analysis and Air Pollution Tolerance Index (APTI) for Eco-ward planning..... 35

(1.6) Need of development of Vadodara as an Eco-city.....36

(1.7) Objectives.....37

Chapter 2

(2.1) Study Area..... 38

(2.2) Geography.....38

(2.3) Regional setting.....39

(2.4) History of Vadodara.....40

(2.5) Topography, Natural Drainage and water Bodies.....42

Chapter 3

(3.1) Materials.....43

(3.1.1) SOI map.....43

(3.1.2) Ancillary data.....43

(3.1.3) Field Survey..... 43

(3.1.4) Satellite data used in the study.....43

(3.2) Software used..... 44

(3.3) Methods.....44

(3.3.1) Methodology for thematic map generation.....44

(3.3.2) Methodology followed for Land use change analysis..... 48

(3.3.3) Methodology followed for Urban green space analysis.....53

(3.3.3.1) Part 1: Suitability Analysis.....53

(3.3.3.2) Part 2: Economic valuation of Urban Green Space (UGS).....54

(3.3.3.3) Part 3: Assessment of impact of various biophysical and socioeconomic parameters on Property Value (P.V.) at VMSS level..... 55

(3.3.4) Methodology followed for Eco-city plan generation.....58

(3.3.5) Methodology for estimation of Air Pollution Tolerance Index (APTI).....59

Chapter 4: Results

(4.1) Thematic map generation.....62

(4.1.1) Thematic layer of Transportation Network of Vadodara city.....62

(4.1.2) Thematic layer of Water body of Vadodara city.....66

(4.1.3) Thematic layer of Gardens of Vadodara city.....69

(4.1.4) Thematic layer of Greenbelts of Vadodara city.....73

(4.1.5) Thematic layer of Population density of Vadodara city.....77

(4.1.6) Contour and Slope of Vadodara city.....80

(4.2) Land use change analysis.....83

(4.2.1) Agriculture.....84

(4.2.1.1) VUDA level (1880-2006).....85

(4.2.1.2) VMSS level (1880-2009).....90

(4.2.2) Water Bodies.....92

(4.2.2.1) VUDA level (1880-2006).....92

(4.2.2.2) VMSS level (1880-2009).....92

(4.2.3) Built-up land..... 93

(4.2.3.1) VUDA level (1880-2006).....94

(4.2.3.2) VMSS level (1880-2009).....94

(4.2.4) Transportation Network.....95

(4.2.4.1) VUDA level (1880-2006).....96

(4.2.4.2) VMSS level (1880-2009).....96

(4.2.5) Validation of results.....98

(4.2.6) Urban sprawl analysis.....98

(4.2.6.1) Entropy.....98

(4.2.6.2) U.S.I.....100

(4.2.6.3) L.C.R. and L.A.C.....101

(4.3) Analysis of Urban green space (U.G.S.).....102

(4.3.1) Suitability analysis.....102

(4.3.1.1) Vegetational Status.....103

(4.3.1.2) Per capita change in Vegetation.....108

(4.3.1.3) Temperature.....109

(4.3.1.4) Identification of Suitable sites.....110

(4.3.2) Economic valuation of Urban Green Space (UGS).....112

(4.3.3) Assessment of impact of various biophysical and socioeconomic parameters on Property Value (P.V.) at VMSS level.....113

(4.3.3.1) Assessment of Impact considering Individual Components.....114

(4.3.3.2) Assessment of Impact considering Integrated Components.....114

(4.4) Eco-city plan generation.....117

(4.4.1) Ward No. 1- City Ward.....117

(4.4.1.1) APTI estimation.....118

(4.4.1.2) Eco-ward generation.....119

(4.4.2) Ward No.5 Shiyabaug.....124

(4.4.2.1) APTI estimation.....124

(4.4.2.2) Generation of Eco-ward plan.....125

(4.4.3) Ward No.9: Panigate Ward.....129

(4.4.3.1) APTI estimation.....129

(4.4.3.2) Generation of Eco-ward plan.....130

(4.4.4) Converting the existing city into an Eco-city.....134

Chapter 5

(5.0) Discussions.....136

(5.1) Thematic Map generation.....136

(5.2) Land use change analysis.....137

(5.3) Urban green space Analysis.....140

(5.4) Eco-ward plan generation.....144

Chapter 6

(6.0) Conclusions.....148

Chapter 7

(7.0) Summary.....151

Chapter 8

(8.0) Recommendations.....155

References.....161

Annexure I: Survey for Eco-city planning.....184

Annexure II: Case study.....188
