Table of Tables

Chapter	Title	Page No.
Chapter 1.		
Table 1.1	Recent studies of probiotics effects on metabolic disorders in humans	21
Table 1.2	Bacteria community and ingested bacteria mediated microbiome alteration along the GI tract	22
Table 1.3	Applications of VHb technology	24
Table 1.4	Bioengineered probiotics for use as designer probiotics in humans	
Table 1.5	Details of *E. coli* strains present in market	31
Table 1.6	Overview of the physiological effects of the short-chain fatty acids produced by human colon	35
Chapter 2		
Table 2.1	Plasmids used in this study	44
Table 2.2	Bacterial strains used in this study	45
Table 2.3	List of primers used in this study	45
Table 2.4	Effect of genetically engineered probiotic *E. coli* Nissle 1917 on body weight gain, food intake, fasting glucose, serum insulin levels of rats	51
Table 2.5	Effect of genetically engineered probiotic *E. coli* Nissle 1917 on Colonic SCFA, PQQ concentration in liver tissue and fecal samples and liver GSH levels in rats	56
Chapter 3		
Table 3.1	Plasmid and bacterial strains used in the study	65
Table 3.2	Composition of AIN-93 iron depleted diet and normal diet	66
Chapter 4		
Table 4.1	List of primers used in the study	84
Table 4.2	Plasmids and bacterial strains used in the study	84
Table 4.3	Experimental design for animal experimentation	86
Table 4.4	PQQ Concentration in fecal matter and Liver Homogenate of rats	92
Chapter 5		
Table 5.1	Plasmid and strains used in the study	101
Table 5.2	Experimental design for animal experimentation	102
Table 5.3	PQQ concentration in fecal matter and Liver Homogenate of rats	108
Table 5.4	2-Ketogluconic acid (2-KG) concentration in fecal matter and serum of rats	108
