LIST OF FIGURES

Sr. No.	Title	Page no.
CHAPTER I	**Introduction**	
Figure 1	Structure of the skin	4
Figure 2	Epidermal melanin unit	5
Figure 3	Clinical patterns of vitiligo	10
Figure 4	Sources, effects and interactions of ROS/ H_2O_2 in vitiligo	21
Figure 5	Modulation of cellular ROS	22
Figure 6	Cross talk between oxidative stress, ER stress and immune System in melanocyte death	35
Figure 7	*CAT* gene and relevant single-nucleotide polymorphisms	44
Figure 8	Reduction of H_2O_2 by GPX1	46
Figure 9	Redox pathways involved in maintaining the cofactors necessary for the activity of GPX1	47
Figure 10	Protective and harmful effects of GPX1	47
Figure 11	The canonical miRNA biogenesis pathway in animal cells	53
Figure 12	Modes of gene regulation by miRNAs	56
Figure 13	Biological and cellular functions of miRNAs	58
CHAPTER II	**Genetic association of glutathione peroxidase 1 (*GPX1*) gene polymorphisms with vitiligo susceptibility**	
Figure 1	Genotyping of *GPX1* gene polymorphisms	118
Figure 2	Linkage disequilibrium (LD) block	124
Figure 3	GPX1 activity, LPO levels and genotype-phenotype correlation analysis	125
Figure 4	Relative gene expression of *GPX1* in vitiligo patients and controls	126
Figure 5	Structural superimposition of monomer GPX1 wild,	128

	Leu6Pro and Arg5Pro variants	
Figure 6	Monomer MD simulation	131
Figure 7	Tetramer MD simulation	132
CHAPTER III	**Genetic association of catalase (*CAT*) gene polymorphisms with vitiligo susceptibility**	
Figure 1	Genotyping of *CAT* gene polymorphisms	150
Figure 2	Linkage disequilibrium (LD) block	154
Figure 3	Catalase mRNA levels and activity in vitiligo patients	155
Figure 4	Genotype-phenotype correlation analysis for *CAT* polymorphisms	158
Figure 5	Haplotype-phenotype correlation analysis for *CAT* polymorphisms	160
CHAPTER IV	**Genetic association of glucose-6-phosphate dehydrogenase (*G6PD*)gene polymorphisms with vitiligo susceptibility**	
Figure 1	miR-1 expression in vitiligo patients:	179
Figure 2	G6PD expression and activity in vitiligo patients	180
Figure 3	Polymorphisms of *G6PD* gene investigated in the present study	184
Figure 4	Genotyping of *G6PD* gene polymorphisms	186
Figure 5	Genotyping of *G6PD* gene polymorphisms	187
Figure 6	Genotype -phenotype correlation analysis for *G6PD* 3’ UTR A/G polymorphism	190
CHAPTER V-A	**Skin miRNA profiling of non-segmental vitiligo patients**	
Figure 1	Heat map analysis	205
Figure 2	Skin miRNA expression profiling in non-segmental vitiligo patients	206
CHAPTER V-B	**miRNA signatures and transcriptional regulation of their target genes in vitiligo**	

Figure 1	miRNA expression profile in blood of vitiligo patients and controls	230
Figure 2	miRNA expression profile in subsets of vitiligo patients and controls	231
Figure 3	Expression of miR target genes in vitiligo patients and controls	239
Figure 4	Expression analysis of miR target genes in the blood of subsets of vitiligo patients and controls	241
CHAPTER VI	***In vitro* study on effect of oxidative stress on melanocytes**	
Figure 1	Dose dependent effect of H_2O_2 on melanocyte viability	267
Figure 2	Dose dependent effect of 6-ANAD on melanocyte viability	268
Figure 3	Gene expression profiles of primary NHM, PIG1 and PIG3V cells under normal condition.	270
Figure 4	Effect of H_2O_2 on melanocytes	271
Figure 5	Gene expression profiles of primary NHM, PIG1 and PIG3V cells after 24 hrs of 10μM H_2O_2 treatment.	273
Figure 6	Gene expression profiles of primary NHM, PIG1 and PIG3V cells after 24 hrs of 20μM H_2O_2 treatment.	275
Figure 7	Effect of 6-ANAD on melanocytes	277
Figure 8	Gene expression profiles of primary NHM, PIG1 and PIG3V cells after 24 hrs of 0.5 mM 6-ANAD treatment.	278
7.	**Concluding Remarks**	
Figure 1	Possible mechanism of miRNA and oxidative stress mediated melanocyte destruction in vitiligo	307
