Contents

SR NO.	TITLE	PAGE NO.
	CH 1: INTRODUCTION	**1-41**
1	The Poly (ADP-ribose) polymerase family	1
1.1	The Poly (ADP-ribose) polymerase-1	2
1.2	PARP-1 Structure	2
1.3	PARP Activation	5
1.4	Functions of PARP-1	8
1.4.1	PARP-1 in DNA repair	9
1.4.2	PARP-1 in Chromatin modulation	10
1.4.3	PARP-1 in transcription	11
1.4.4	PARP-1 in cellular-stress responses	13
1.4.5	PARP-1 and cancer	16
1.4.6	PARP-1 in cell differentiation/multicellularity	19
1.5	*Dictyostelium discoideum*	20
1.5.1	Genes/ Factors responsible for the transition from growth to development	24
1.5.1.1	Pre Starvation Factor (PSF)	24
1.5.1.2	Conditioned Medium Factor (CMF)	24
1.5.1.3	Myb2	24
1.5.1.4	DIAI	24
1.5.1.5	Cyclic AMP (cAMP)	25
1.5.1.6	cAMP receptor 1(CAR1)	25
1.5.1.7	YAKA	25
1.5.1.8	Adenylate cyclase A (ACA)	26
1.5.1.9	Protein kinase (PKA)	26
1.5.1.10	Counting factor (CF)	26
1.5.1.11	RegA	27
1.5.1.12	CsA	27
1.5.1.13	PdsA	27
1.6	Other Factors controlling differentiation	28
1.7	*D. discoideum*: a model system	29
1.7.1	Cell Differentiation	29
1.7.2	Chemotaxis	29
1.7.3	Signal transduction	30
1.7.4	Phagocytosis	30
1.7.5	Cell Death	30
1.8	References	31

CH 2: MATERIALS AND METHODS		**42-57**
2.1	CHEMICALS	42
2.2	Materials and methods	42
2.2.1	*Dictyostelium discoideum* culturing	42
2.2.2	Preparation of modified HL5 medium	42
2.2.3	Development of *D. discoideum* cells on non-nutrient agar (NNA)	43
2.2.4	Revival of *Dictyostelium* Spores	43
2.2.5	Genomic DNA Isolation from *D. discoideum*	43
2.2.6	Plasmid DNA isolation by alkaline lysis method	44
2.2.7	Transformation of plasmid DNA in *E.coli*	44
2.2.8	Generation of overexpression and knockout construct	45
2.2.8.1	PCR amplification	45
2.2.8.2	*ADPRT1A* overexpression construct	45
2.2.8.3	*ADPRT1A* knockout construct	46
2.2.9	Transformation of plasmid DNA in *D. discoideum*	46
2.2.10	RNA Isolation	47
2.2.11	cDNA synthesis	47
2.2.12	Confirmation of knockout strains	48
2.2.13	Functional characterization of *ADPRT1A* overexpression and knockout	49
2.2.14	Cellular localization of *ADPRT1A*	49
2.2.15	Growth profile analysis	49
2.2.16	Cell cycle analysis	49
2.2.17	Induction of oxidative stress	50
2.2.18	Sequence similarity, Domain and Phylogenetic analysis	50
2.2.19	Estimation of NAD^+ levels	50
2.2.20	ROS estimation	51
2.2.21	Monitoring stress induced DNA damage by immunofluorescence	51
2.2.22	PARP activation	51
2.2.23	Evaluation of mitochondrial membrane potential (MMP)	52
2.2.24	Assessment of cell death by AnnexinV-FITC/PI dual staining	52
2.2.25	Effect of Oxidative stress on *ADPRT1A* knockout cells	52
2.2.26	Neutral red staining	52
2.2.27	cAMP estimation	53
2.2.28	Chemotaxis assay and cAMP pulsing	53
2.2.29	Gene expression analysis by Real Time PCR (qPCR)	54
2.3	References	56

CH 3: PHYLOGENETIC ANALYSIS OF POLY (ADP-RIBOSE) POLYMERASE-1 IN D. *DISCOIDEUM*		**58-70**
3.1	Introduction	58-59
3.2	Results	59
3.2.1	Sequence similarity and phylogenetic analysis of PARP like proteins in *D. discoideum*	59
3.2.2	Domain wise analysis of ADPRT1A, ADPRT1B and ADPRT2 in *D. discoideum*	60
3.2.3	Multiple alignments of ADPRT1A, ADPRT1B and ADPRT2 in *D. discoideum*	62
3.2.4	Phylogenetic analysis of ADPRT1A and PARP-1 in other organisms	62
3.2.5	Discussion	65
3.2.6	References	67
CH 4: OVER EXPRESSION OF *ADPRT1A* AND ITS EFFECTS ON *D. DISCOIDEUM* GROWTH AND MULTICELLULARITY		**71-100**
4.1	Introduction	71
4.2	Results	72
4.2.1	Cloning of *PARP* (*ADPRT1A*) in EYFP vector	72
4.2.2	Confirmation of *PARP (ADPRT1A)* overexpression construct in EYFP using Restriction digestion	74
4.2.3	Transformation of EYFP-*ADPRT1A* overexpression construct in *D. discoideum*	76
4.2.4	Functional characterization and localization of *ADPRT1A* over expressing cells	76
4.2.5	NAD^+ estimation in *ADPRT1A* over expression cell line	78
4.2.6	Effect of *ADPRT1A* overexpression on growth and cell cycle of *D. discoideum*	79
4.2.7	Effect of *ADPRT1A* overexpression on cell death of *D. discoideum*	83
4.2.7.1	ROS estimation and DNA damage	83
4.2.7.2	PARP activation under oxidative stress	85
4.2.7.3	Mitochondrial membrane potential	86
4.2.7.4	Annexin V FITC-PI	88
4.2.8	Effect of *ADPRT1A* overexpression on *D. discoideum* development	90
4.2.9	*ADPRT1A* transcript levels and PARP activation during *D. discoideum* development	91
4.3	Discussion	93
4.4	References	96

CH 5: *ADPRT1A* KNOCK-OUT AND ITS POSSIBLE ROLE IN *D. DISCOIDEUM* GROWTH AND MULTICELLULARITY		**101-130**
5.1	Introduction	101
5.2	Results	102
5.2.1	Sequential cloning of *PARP* (*ADPRT1A*) 5' and 3' HR into pDrive vector	102
5.2.2	Confirmation of *ADPRT1A* knockout (*ADPRT1A* KO) constructs	104
5.2.3	Transformation of *ADPRT1A* knockout construct in *D. discoideum*	106
5.2.4	Standardization of PCR for screening of positional and random integrant knockout clone	107
5.2.5	Screening of *ADPRT1A* knockout clones for positional and random integrants and confirmation	108
5.2.6	Functional Characterization of *ADPRT1A* KO	109
5.2.7	Growth profiling and cell cycle analysis in *ADPRT1A* KO	111
5.2.8	Effect of oxidative stress on *ADPRT1A* KO	114
5.2.9	Role of ADPRT1A in development and multicellularity:	115
5.2.10	cAMP estimation and chemotaxis analysis in *ADPRT1A* KO	117
5.2.11	Effect of exogenous cAMP on chemotaxis and development	119
5.3	Discussion	121
5.4	References	125
CH 6: GENE EXPRESSION ANALYSIS OF DEVELOPMENTAL GENES INVOLVED IN *D. DISCOIDEUM* DEVELOPMENT		**131-161**
6.1	Introduction	131
6.2	Results	133
6.2.1	Expression of *PDSA* in *ADPRT1A* KO, OE, PARP inhibition and *PARP* dR	133
6.2.2	Expression of *REGA* in *ADPRT1A* KO, OE, PARP inhibition and *PARP* dR	137
6.2.3	Expression of *ACA* in *ADPRT1A* KO, OE, PARP inhibition and *PARP* dR	141
6.2.4	Expression of *CAR1* in *ADPRT1A* KO, OE, PARP inhibition and *PARP* dR	145
6.2.5	Expression of *ADPRT* isoforms in *ADPRT1A* KO	150
6.2.6	Expression of differentiation markers in *ADPRT1A* KO	151
6.3	Discussion	153
6.4	References	156
CONCLUSION		**162-172**
