TABLE OF CONTENTS

Sl. No.	TITLE	Page no.
1.0	**Introduction & Review of Literature**	**22-49**
1.0	Introduction	22
1. 1	Objectives	**26**
1.2	Review of Literature	27
1.2.1	Cancer and Apoptosis	**27**
1.2.2	cFLIP: Regulator of apoptosis and autophagy signaling	**28**
1.2.3	Cellular dynamics of FADD	**32**
1.2.4	Structural organization of FADD	**34**
1.2.5	Sub-cellular localization of FADD	**37**
1.2.6	Cellular Signaling of FADD in Apoptosis	**38**
1.2.6.1	Fas (CD95/ Apo1/ TNFRSF6) in extrinsic cell death signaling	39
1.2.6.2	TNF-α signaling in cell death and survival	40
1.2.6.3	TRAIL signaling	41
1.2.7	RIP1 and FADD in cell death and survival	**43**
1.2.8	Role of FADD in Autophagy	**44**
1.2.9	Role of FADD in Necroptosis	**45**
1.2.10	Role of FADD in Inflammation	**47**
1.2.11	Role of FADD in cancer and therapeutic intervention	**49**
2.0	**Materials & Methods**	**52-68**
2.0	Materials & Methods	52
2.1	Chemicals	**52**
2.2	*In vitro* cell culture	**53**
2.3	Plating and Stock preparation	**53**
2.4	*In Vitro* transfection and expression of proteins	**54**
2.4.1	Lipofectamine method	54
2.4.2	Calcium Phosphate method	54

Sl. No.	TITLE	Page no.

2.4.3 Evaluation of plasmid transfection....54
2.5 Knockdown of $cFLIP_L$ by siRNA....**54**
2.6 Cell Viability assay....**55**
2.7 Cell Proliferation Assay....**55**
2.8 Apoptotic Cell Death Analysis....**56**
2.8.1 Propidium iodide (PI) staining....56
2.8.2 Evaluation of apoptotic cell death by image based cytometer....56
2.8.3 Flow Cytometry....56
2.9 Colony formation assay....**57**
2.10 Establishment of GFP-LC3 stable cell line and autophagy assay....**57**
2.11 Detection of autophagic vacuoles....**58**
2.12 Mitochondria staining....**58**
2.13 p65 translocation assay....**58**
2.14 Luciferase reporter assay for determination of NF-κB activation....**59**
2.15 Measurement of mitochondrial membrane potential (ΔΨm)....**59**
2.16 Confocal microscopy....**60**
2.17 Real Time-qPCR (RT-qPCR)....**60**
2.18 Sucellular fractions, SDS-PAGE and Western blotting....**61**
2.19 Enzyme-Linked Immunosorbent Assay (ELISA)....**62**
2.20 Immunostaining....**62**
2.21 Co-immunoprecipitation analysis....**63**
2.22 Caspases 8 and Caspase 3 activity assay....**63**
2.23 ROS measurement....**63**
2.24 Cytotoxicity assay....**64**
2.25 Purification, Characterization and conjugation of hFADD....**64**
2.25.1 Isolation of total RNA from mammalian cells....64
2.25.2 Synthesis of cDNA and amplification of FADD....64
2.25.3 Cloning of the human FADD (hFADD)....65
2.25.4 Transformation and expression of pET-FADD....65
2.25.5 Purification of human FADD (hFADD)....66
2.25.6 *In vitro* protein-protein interaction....67

2.25.7 Conjugation of purified FADD with a cell permeable (CP) peptide 67
2.25.8 Fluorescence spectroscopy 67
2.25.9 MALDI-TOF mass spectrometry 67
2.25.10 FT-IR spectral analysis 68
2.26 In silico protein-protein interaction **68**
2.27 Statistical analysis **68**

3.0 Results 70-126

3.0 Results 70

PART- I 70

3.1 FADD REGULATES EXPRESSION OF ANTI-APOPTOTIC PROTEIN CFLIP$_L$ AND AUGMENTS EXTRINSIC SIGNALING OF APOPTOSIS 70
3.1.1 Determination of endogenous expression of FADD and cFLIP$_L$ in different origin of cancer cells 70
3.1.2 Over expression of FADD induces cell death 71
3.1.3 Overexpression of FADD attenuates the expression of cFLIP$_L$ and activates extrinsic cell death signaling 72
3.1.4 FADD potentiates CD95L mediated apoptosis 74
3.1.5 Sufficient availability of FADD ablates cFLIP$_L$ binding at the DISC 75

PART II 76

3.2 EXPRESSION OF FADD AND CFLIP$_L$ BALANCES MITOCHONDRIAL INTEGRITY AND CELL DEATH 77
3.2.1 Expression of FADD and cFLIP$_L$ modulates mitochondrial integrity 77
3.2.2 Expression of FADD and cFLIP$_L$ regulates mitochondrial signaling of apoptosis 79
3.2.3 Knockdown of cFLIP$_L$ induces cell death 80
3.2.4 Knockdown of cFLIP$_L$ alters mitochondrial integrity 81
3.2.5 TNF-α stimulation unable to protect cell death during knockdown of cFLIP$_L$ 82

Sl. No.	TITLE	Page no.

PART III **85**

3.3 FADD REGULATES NF-ΚB ACTIVATION AND PROMOTES UBIQUITINATION OF CFLIP$_L$ TO INDUCE APOPTOSIS **85**

3.3.1 FADD induces apoptosis independent of TNF-α stimulation 85

3.3.2 FADD inhibits NF-κB activation with subsequent ablation of cFLIP$_L$ 86

3.3.3 FADD ubiquitinates IKKβ to stabilize IκBα expression 89

3.3.4 Knockdown of cFLIP$_L$ mitigates NF-κB activation 90

3.3.5 Mutations in the DED domains of FADD and cFLIP$_L$ modulates NF-κB signaling 90

3.3.6 FADD interacts with RIP1 by inhibiting the expression of cIAP2 91

3.3.7 FADD stabilizes the integrity of RIP1 92

3.3.8 *In silico* binding interaction of FADD and RIP1 93

3.3.9 FADD and cFLIP$_L$ synergistically regulates NF-κB signaling and RIP1 interaction with procaspase-8 94

3.3.10 Knockdown of cFLIP$_L$ facilitates RIP1 to form complex with FADD 95

3.3.11 FADD augments apoptosis rather than necrosis 96

3.3.12 FADD promotes ROS accumulation and JNK1 mediated ubiqutination of cFLIP$_L$ 96

3.3.13 Expression of FADD and cFLIP$_L$ balances redox signaling 98

3.3.14 FADD ubiquitinates cFLIP$_L$, independent of TNF-α stimulation 98

3.3.15 Knockdown of cFLIP$_L$ triggers ROS dependent JNK1 activation 99

PART IV **100**

3.4 FADD AND CFLIP$_L$ REGULATES AUTOPHAGY SIGNALING **101**

3.4.1 FADD and cFLIP$_L$ regulates autophagic cell death 101

3.4.2 cFLIP$_L$ inhibits oxidative stress induced accumulation of HMGB1 102

3.4.3 Expression of cFLIP$_L$ balances autophagic stress 104

3.4.4 Knockdown of cFLIP$_L$ generates oxidative stress and autophagy by Beclin-1 and HMGB1 interaction 106

3.4.5 cFLIP$_L$ protects p53 dependent ubiquitination of Beclin-1 108

3.4.6 Stimulation of TNF-α during knockdown of cFLIP$_L$ unable to sustain autophagy 110

Sl. No. TITLE Page no.

PART V **111**

3.5 FADD REGULATES INFLAMMASOME MEDIATED ACTIVATION OF IL-1β **113**

3.5.1 FADD regulates the expression of Pro-IL1β 113

3.5.2 Over expression of FADD inhibits inflammasome mediated maturation of IL-1β114

PART VI **115**

3.6 PEPTIDE MEDIATED DELIVERY OF FADD IN CANCER CELLS **116**

3.6.1 Quantitative and qualitative analysis of total RNA and cDNA 116

3.6.2 Cloning of human FADD (hFADD) 116

3.6.3 Expression of human FADD (hFADD) 118

3.6.4 Refolding and purification of human FADD (hFADD) 118

3.6.5 Characterization and *in vitro* protein-protein interaction of purified FADD..... 120

3.6.6 MALDI-TOF analysis of purified FADD 121

3.6.7 Characterization of cell permeable peptides (CP) conjugated hFADD..... 121

3.6.8 FT-IR analysis of CP-FADD 1223

3.6.9 Intracellular delivery and cellular localization of CP-FADD 123

3.6.10 Apoptotic potential of CP-FADD on cancer cells 124

3.6.11 CP-FADD affects activation of NF-κB and inflammatory cytokines 125

3.6.12 Comparative analysis of cell death induced by CP-FADD and known apoptosis inducer molecules 126

4.0 Discussion & Conclusions 129-142

4.1 Discussion 129

4.2 Conclusions 142
