CHAPTER - I	HETEROLYTIC FRAGMENTATION REACTIONS - A REVIEW	1 - 42
	Abstract	1
	Introduction	2
	Structural Factors	2
	Mechanism And Stereoelectronic Requirements	3
	Alkene Forming Fragmentation	8
	Alkyne Forming Fragmentation	26
	Allylic Alcohol And Allylic Halide Forming Fragmentation	30
	Application of Fragmentation Reaction In Organic Synthesis	33
	References	40
CHAPTER -II	FRAGMENTATION OF HOMOALLYLIC ALCOHOLS : SYNTHESIS AND FRAGMENTATION OF 6-HYDROXYCAMPHENE	43 - 77
	Abstract	43
	Introduction	44
	Synthesis of Homoallylic Alcohols	46
	Fragmentation of Homoallylic Alcohols	51

	Experimental	54
	References	63
	Spectra	64
CHAPTER-III	FRAGMENTATION OF HOMOALLYLIC ALCOHOLS : GEOMETRIC REQUIREMENTS	78 - 160
	Abstract	78
	Introduction	79
	Synthesis of Epoxides	83
	Fragmentation of Epoxides	98
	Reaction of 7-*syn*-Hydroxycamphene	101
	Discussion	102
	Experimental	107
	References	124
	Spectra	126
CHAPTER-IV	FRAGMENTATION OF HOMOALLYLIC ALCOHOLS : EFFECT OF RING STRAIN	161 - 222
	Abstract	161
	Introduction	162
	Synthesis of 6-Hydroxy-2-Methylene-bicyclo[2,2,2,] octane	166
	Results	177
	Discussion	179

Experimental 180

References 197

Spectra 199
