A C K N O W L E D G E M E N T

Many a wise man has claimed that it is easier said than done. Speaking through experience, I claim the same distinction for the Ph.D Course. But now that it is done, apart from the feeling of relief there is also a feeling of tremendous gratitude for those without whom it could never have been done.

First and foremost I thank Dr.Sukh Dev, D.Sc.,F.N.A., whose experienced guidance in collusion with his brilliant and never ending flow of ideas created the thesis. Not to forget also his patient bearing of my lapses. A finer opportunity none could desire.

My grateful and sincere thanks are also due to Dr.H.P.S.Chawla for his unequivocal co-operation, constant help and stimulating discussions. He knew which key to press to draw the best from me.

My special thanks to Dr.V.D.Patil and Mr.R.Ramakrishna, who to me were a source of fruitful discussions and constant encouragement. They lauded me when my reactions went well and consoled me when they did not.

I also thank Mr.K.S.Agarwal for all the help rendered. Thanks also to Dr.C.L.Bhagchandani and his group for spectral data and Mr.V.K.Kulkarni for GLC data. I thank Mr.T.R. Viswanathan for an excellent typing of this thesis and all my colleagues for their co-operation.

Financial assistance by C.S.I.R.,New Delhi and MRC, Nandesari is gratefully acknowledged.
