C O N T E N T S

CHAPTER		PAGE
I	INTRODUCTION	1
	GENERAL	1
	GEOGRAPHICAL ASPECTS OF NEPAL	3
	Terai	5
	Siwalik Range (Churia Range)	5
	Mahabharat Lekh	6
	Midlands	6
	Fore Himalaya	7
	Great Himalaya	7
	Inner Himalaya	8
	Tibetan Himalaya	8
	THE STUDY AREA	8
	Location	8
	Topography	11
	Drainage	13
	Climate and Rainfall	14
	Flora	15
	Fauna	16
	Land use and Agriculture	17
	Communication	18
	People	19
	SCOPE OF INVESTIGATION	19

CHAPTER		PAGE
II	BACKGROUND INFORMATION	24
	HIMALAYA IN GENERAL	24
	Outer Himalayan Zone or Sub-Himalaya or Siwalik Foot Hills	27
	Lesser Himalayan Zone (Midlands)	28
	Higher Himalaya or Great Himalaya	29
	Tethys (Tibetan)Himalaya	30
	GEOLOGY OF NEPAL	31
	PREVIOUS GEOLOGICAL INFORMATION PERTAINING TO THE STUDY AREA	56
III	GEOLOGICAL SETTING	68
	GENERAL	68
	THE KUSMA UNIT	72
	Kusma Quartzite	75
	Balewa Formation	81
	THE SIRKANG UNIT	84
	Bihadi Slates	85
	Phoksing Dolomite	87
	Sumsa Formation	91
IV	ROCK TYPES	95
	KUSMA UNIT	96
	Quartzites	96
	Gritty Quartzose Phyllites	100

CHAPTER		PAGE
	Quartz-sericite-phyllites	102
	Nature of original sediments	103
	SIRKANG UNIT	107
	Carbonaceous Slates	107
	Metapelites	108
	Siliceous dolomites	113
	Sandstones	116
	Quartz arenites	119
	Sublitharenites	125
	Wackes (Graywackes)	130
V	STRUCTURAL GEOLOGY	139
	SCOPE OF STUDY	139
	MAIN DEFORMATIONAL EVENTS	141
	STRUCTURAL ELEMENTS	144
	Structures relatec to folding F_1	144
	Structures relatec to folding F_2	150
	Structures relatec to folding F_3	153
	Structures relatec to folding F_4	154
	STRUCTURAL ANALYSIS	156
	Sub-area I	159
	Sub-area II	161
	Sub-area III	161

CHAPTER		PAGE
	Sub-area IV	163
	Sub-area V	165
	Sub-area VI	168
	Sub-area VII	168
	Sub-area VIII	171
	Sub-area IX	171
	THRUSTS AND FAULTS	174
	DEFORMATIONAL HISTORY	175
	DISCUSSION	177
VI	STRATIGRAPHIC CONSIDERATIONS	182
	LESSER HIMALAYA IN GENERAL	182
	STRATIGRAPHY OF WESTERN NEPAL	187
	REVISED STRATIGRAPHY OF KUSMA-BIHADI SECTION	195
	PROBLEMS OF AGE AND CORRELATION	198
VII	CARBONATE ROCKS	202
	GENERAL	202
	CHEMICAL ASPECTS OF DOLOMITIC ROCKS	203
	CLASSIFICATION	207
	INTRACLASTIC DOLOMITE	215
	Petrography	216

CHAPTER		PAGE
	Allochemical constituents	217
	Orthochemical constituents	225
	Origin and Palaeoenvironmental significance	228
	STROMATOLITES	233
	Types of stromatolites and their characteristics	234
	Flat laminated algal mats	236
	Crinkled and laminated biohermal stromatolites	236
	Columnar and Conical stromatolites	239
	Large-scale vertically stacked domical stromatolites	239
	Palaeoenvironmental Significance	246
	Morphology and Environmental conditions of Formation	248
	Depositional Facies and Palaeoenvironments of Kali Gandaki Stromatolites	254
	Age Considerations	257
VIII	BASIC ROCKS	263
	GENERAL	263
	SPILITIC DIABASE	264
	Textures	265
	Mineralogy	267

CHAPTER		PAGE
	SPILITIC BASALT	272
	TUFFS AND TUFFITES	274
	PETROCHEMISTRY	274
	Diagram based on $CaO-Na_2O-K_2O$ wt.percent	279
	Diagram based on $(FeO + Fe_2O_3)-(Na_2O + K_2O)-MgO$ (FAM diagram)	279
	Diagrams based on	
	Mg - Fe - Al cations	282
	Mg - Ca - Al cations	282
	Ca - Fe - Al cations	282
	Diagram based on SiO_2 vs. $(Na_2O + K_2O)$ (Kuno's diagram)	282
	Diagram based on K_2O vs. Na_2O	288
	DISCUSSION	288
IX	GEOMORPHOLOGY	293
	INTRODUCTION	293
	METHOD OF INVESTIGATION	294
	DRAINAGE STUDY	295
	Morphology of the drainage basins	295
	Kali Gandaki basin	296
	Lamjung Khola basin	297
	Seti Khola basin	298

CHAPTER		PAGE
	Drainage Pattern	299
	Slope Studies	300
	Morphometric Analysis	303
	Kali Gandaki Basin	305
	Lamjung Khola Basin	316
	Seti Khola Basin	328
	Comparison of Morphometric parameters of various sub-basins	337
	GRAVEL DEPOSITS	341
	Terrace classification	343
	Phalebas-Kurgha Terraces	350
	Karnas-Bachha Terraces	352
	Bihadi Terraces	353
	Profile Studies	355
	Depositional History and Neotectonism	356
	Nature of the Gravelly Material	362
X	SUMMARY AND CONCLUSIONS	368
	GEOLOGICAL SETTING	368
	GEOLOGICAL EVOLUTION	374
	Depositional History	374
	Deformational History	377
	CONCLUDING REMARKS	379
	REFERENCES	380
