LIST OF TABLES

NO	TABLE		PAGE
1	II.1	The composite section of the Lesser Himalaya of Nepal (Talalov, 1972).	46
2	II.2	Stratigraphic table for Nepal (Sharma, 1975).	53
3	III.1	Field succession	73
4	III.2	Lithotectonic correlation	74
5	IV.1	Chemical composition of gritty quartzose phyllite compared with the average graywacke and Arkose	106
6	IV.2	Chemical composition of metapelites of the study area compared with the average slates and phyllites.	115
7	IV.3	Modal analyses of sandstones	118
8	V.1	The successive folc events and the related planar and linear structures.	145
9	VI.1	Comparative stratigraphic scheme of the rocks of Lesser Himalaya of Western Nepal	188
10	VI.2	Stratigraphy of the Kusma-Bihadi section of Kali Gandaki valley	197
11	VI.3	Radiometric ages of different rocks of Lesser Himalaya of Nepal	199

NO	TABLE		PAGE
12	VII.1	Chemical analysis of Dolomite of Kali Gandaki Valley (weight percent).	204
13	VII.2	Values of $CaO-MgO-SiO_2$ for Triangular diagram.	206
14	VII.3	Theoretical calculations of different carbonate minerals from the chemical data	212
15	VII.4	Characteristics and ranges of stratigraphically significant columnar stromatolites in the USSR	258
16	VII.5	Comparison of stromatolites of Kali Gandaki valley with those of Indian Himalaya and Peninsular India	261
17	VIII.1	Chemical analysis of basic rocks of Kali Gandaki valley (weight percent)	276
18	VIII.2	Average spilites (cf. Patwardhan and Bhandari,1974, P.183)	277
19	VIII.3	Niggli values	278
20	VIII.4	Values of $CaO-Na_2O-K_2O$ and $(FeO + Fe_2O_3) - (Na_2O + K_2O) - (MgO)$ for triangular diagrams	278
21	VIII.5	Cation values per 100 oxygen anions	286
22	VIII.6	Values of various cationic ratios for triangular diagrams	287

NO	TABLE		PAGE
23	IX.1	Morphometric parameters of sub-basins of Kali Gandaki	308
24	IX.2	Morphometric parameters of Lamai Khola basin	322
25	IX.3	Morphometric parameters of sub-basins of Lamai Khola	323
26	IX.4	Morphometric parameters of Seti Khola basin	329
27	IX.5	Morphometric parameters of sub-basins of Seti Khola	330
