Contents

Chapter-1	**Introduction**	**01-19**
	1.1 Chemistry	2
	1.2 What is quinone?	2
	1.3 Occurrence and medicinal applications of quinones	3-7
	1.4 Lawsone (2-hydroxy-1,4-naphthoquinone)	7-10
	1.5 Lawsone derivatives and metal complexes	10-12
	1.6 Aim and Objectives of thesis	12
	1.7 References	13-19
Chapter-2	**Synthesis, Characterization and Anticancer Activity of Some 2-hydroxy-1,4, Naphthoquinone (Lawsone) Derived Mannich Bases**	**20-78**
	2.1 Introduction	21
	2.2 Results and Discussion	23-31
	2.3 Experimental	31-44
	2.4 Conclusion	44
	2.5 Spectra	45-76
	2.6 References	76-78
Chapter-3	**Synthesis, Characterization, DNA/BSA Binding and Cytotoxicity Studies of Cu(II) and V(IV) Complexes Derived from Mannich Bases of Lawsone**	**79-125**
	3.1 Introduction	80-81
	3.2 Results and Discussion	81-94
	3.3 Biological evaluation	95-101
	3.4 Experimental	101-107
	3.5 Conclusion	107-108
	3.6 Spectra and Figures	109-119
	3.7 References	120-125

Chapter-4	**Synthesis, Characterization and application of some metal complexes Derived from 2-(((2-(dimethylamino) ethyl)amino) (4-nitrophenyl)methyl) 3-hydroxynaphthalene-1,4-dione**	**126-160**
	4.1 Introduction	127-128
	4.2 Results and Discussion	128-138
	4.3 Biological evaluation	139-145
	4.4 Experimental	146-150
	4.5 Conclusion	151
	4.6 Spectra	152-154
	4.7 References	155-160
Chapter-5	**Synthesis of Lawsone Vanadium complex for catalytic oxidation of diphenylmethane**	**161-178**
	5.1 Introduction	162-163
	5.2 Results and Discussion	163-168
	5.3 Catalytic application	168-170
	5.4 Experimental	171-173
	5.5 Conclusion	173
	5.6 Spectra and Figures	173-175
	5.7 References	175-178
Chapter-6	**Novel substituted isoindolinones derived from Lawsone: Synthesis, Characterization, DFT and biological studies**	**179-239**
	6.1 Introduction	180-182
	6.2 Results and Discussion	182-189
	6.3 Biological evaluation	190-193
	6.4 Experimental	193-194
	6.5 Conclusion	194-204
	6.6 Spectra	205-233
	6.7 References	234-239
