Table of Contents

Chapter 1: Introduction

1.1 Introduction 1

1.2 Dyes 1

1.2.1 Sources and pathways of dyes in the environment 1

1.2.2 Wastewater treatment techniques for dye removal 3

1.3 Fluoride 5

1.3.1 Sources and pathways for fluoride in the environment 5

1.3.2 Wastewater treatment techniques for fluoride removal 6

1.4 Nitroarenes 8

1.4.1 Sources of phenol and phenolic derivatives 9

1.5 Remediation techniques 10

1.5.1 Adsorption 10

1.5.1.1 Activated carbon 10

1.5.1.2 Carbon nanotubes 10

1.5.1.3 Graphene 11

1.5.1.4 Low-cost adsorbents 12

1.5.1.4.1 Non-carbonized agro-waste 12

1.5.1.4.2 Biochars 13

1.5.1.5 Biopolymers 13

1.5.1.6 Layered materials 14

1.5.1.6.1 Clay 14

1.5.1.6.2 Layered double hydroxides 14

1.5.1.6.3 Zeolites 15

1.5.1.6.4 Tetravalent Metal Acids (TMAs) 16

1.5.1.7 Composites 17

1.5.1.7.1 Metal cholates 18

1.5.2 Catalytic reduction by $NaBH_4$ 19

1.5.2.1 Metal organic frameworks (MOFs) 21

1.6 Aim 22

1.7 References 22

Chapter 2: Biochar from Citrullus Lanatus: Preparation, Characterization, and Adsorptive Potential

2.1 Introduction 35
2.2 Materials and Methods 36
2.2.1 Synthesis of watermelon rind biochars 36
2.2.2 Characterization of biochars 37
2.3 Results and Discussion 38
2.3.1 Characterisation of biochars 38
2.3.2 Physico-Chemical analysis of Biochars 44
2.4 Adsorptive removal of fluoride using 4PWMR 46
2.4.1 Experimental methods 46
2.4.1.1 Materials and methods 46
2.4.2 Fluoride uptake studies 47
2.4.2.1 Effect of pH 47
2.4.2.2 Effect of 4PWMR dose 48
2.4.2.3 Effect of contact time 49
2.4.2.4 Effect of temperature 49
2.4.2.5 Effect of initial concentration of fluoride 50
2.4.2.6 Adsorption kinetics and thermodynamics 52
2.4.2.7 Effect of competing anions 54
2.4.2.8 Reuse of adsorbent 55
2.4.3 Characterization of 4PWMR after adsorption of fluoride 55
2.4.4 Discussion 56
2.4.5 Conclusion 57
2.5 Adsorptive removal of Methylene blue using 8PWMR 58
2.5.1 Experimental methods 58
2.5.1.1 Materials 58
2.5.2 Methylene blue uptake studies 58
2.5.2.1 Effect of pH 59
2.5.2.2 Effect of dose 59
2.5.2.3 Effect of contact time 60
2.5.2.4 Effect of temperature 61
2.5.2.5 Effect of initial concentration of dye 61

2.5.2.6 Adsorption kinetics and thermodynamics 64
2.5.2.7 Reuse of adsorbent 65
2.5.3 Characterization of 8PWMR after adsorption of MB 66
2.5.4 Conclusions 67
2.6 References 67

Chapter 3: Lanthanum cholate: A novel adsorbent for fluoride removal

3.1 Introduction 77
3. 2 Materials and methods 80
3.2.1 Chemicals 80
3.2.2 Synthesis of Lanthanum cholate self-assembly 80
3.2.3 Adsorption experiments and methods 80
3.3 Results and discussion 81
3.3.1 Characterisation of LaC 81
3.3.2 Effect of solution pH 85
3.3.3 Effect of adsorbent dose 86
3.3.4 Adsorption Kinetic studies 86
3.3.5 Adsorption isotherm studies 88
3.3.6 Effect of competing anions 89
3.4 Conclusions 91
3.5 References 91

Chapter 4a: Adsorption of fluoride using Al-Zn-Zr Hydrotalcite

4a.1 Introduction 96
4a.2 Material and methods 97
4a.2.1 Materials 97
4a.2.2 Synthesis of Zr-Al-Zn HLC 98
4a.2.3 Adsorption experiments 98
4a.3 Result and discussion 99
4a.3.1 Characterisation of Zr-Al-Zn HLC 99
4a.3.2 Effect of solution pH 102
4a.3.3 Effect of dose 103

4a.3.4 Effect of time 104
4a.3.5 Effect of initial fluoride concentration 105
4a.3.6 Effect of temperature 107
4a.3.7 Effect of competing anions 108
4a.3.8 Plausible mechanism 109
4a.4 Conclusions 109
4a.5 References 110

Chapter 4b: Adsorptive removal of Methylene blue using Zirconium tungstate

4b.1 Introduction 113
4b.2 Material and methods 114
4b.2.1 Materials 114
4b.2.2 Synthesis of Zirconium tungstate (ZrW) 114
4b.2.3 Adsorption experiments 114
4b.3 Results and discussion 115
4b.3.1 Characterization of ZrW 115
4b.3.2 Effect of pH 118
4b.3.3 Effect of dose 119
4b.3.4 Effect of initial MB concentration 120
4b.3.5 Effect of temperature 120
4b.3.6 Effect of contact time 121
4b.3.7 Adsorption isotherm 121
4b.3.8 Adsorption kinetics 123
4b.3.9 Reuse of adsorbent 124
4b.4 Conclusion 124
4b.5 References 125

Chapter 5a: Microwave Synthesis of Trimesic acid capped silver nanofluids for Catalytic Applications

5a.1 Introduction 129
5a.2 Materials and methods 132
5a.2.1 Materials 132
5a.2.2 Microwave synthesis of Ag-BTC NF 133

5a.2.3 Characterization of Ag-BTC NF 133
5a.2.4 Catalytic experiments 133
5a.2 Results and Discussion 134
5a.2.1 Characterization of AgNF 134
5a.2.2 Catalytic activity of Ag nanofluid 136
5a.3 Conclusions and further work 138
5a.4 References 139

Chapter 5b: Ag-Based Magnetic Metal Organic Framework Nanocomposite as Catalyst for Nitrophenol Removal

5b.1 Introduction 144
5b.2 Materials and methods 146
5b.2.1 Materials and Chemicals 146
5b.2.2 Synthesis of Iron oxide nanoparticles 146
5b.2.3 Synthesis of nano Ag-BTC MOFs 147
5b.2.4 Synthesis of IO@Ag-BTC MMOFC 147
5b.2.5 Catalytic reduction of Nitrophenol 147
5b.3 Results and discussion 148
5b.3.1 Characterisation of IO@Ag-BTC MMOFC 148
5b.3.2. Catalytic activity 158
5b.3.3 Plausible mechanism 160
5b.3.4 Reusability of catalyst 160
5b.4 Conclusions 162
5b.5 References 163

6. Summary and conclusions 169
