LIST OF TABLES

Table No.	Name of Table	Page No.
1.1	Different features of algae, bryophytes and pteridophytes	2
1.2	Distribution of bryophytes	5
1.3	Global, National and Regional published barcodes records of different groups of plants	9
1.4	Global, National and Regional identified barcode records of different groups of plants	9
2.1	Sterilizing agents and their concentrations	23
2.2	Light intensities studies carried out by various researchers.	25
2.3	Results of In-vitro studies on different species of bryophytes	26
2.4	List of hormones experimented by different researchers	28
2.5	Methods in DNA based studies	31
2.6	List of different primers used in the molecular studies of Bryophytes	33
2.7	Status of bryophytes records and species across World, India and Gujarat	37
3.1	Major Rivers of Gujarat and their Characteristics	46
4.1	Data specifications of SRTM Void filled data	60
4.2	Composition of stock solution for the above medium is given below	62
4.3	DNA amplification parameters	65
4.4	Primers used in the study and their sequences	65
4.5	Characters of Liverworts used in preparation of DELTA INTKEY	69
4.6	Characters of Hornworts used in preparation of DELTA INTKEY	69
4.7	Characters of Mosses used in preparation of DELTA INTKEY	70
5.1	District wise locations of the locations visited and their GPS coordinates	73
5.2	List of bryophytes recorded in the current study	75
5.3	Family wise distribution in different district	135
5.4	Habitat wise distribution of Species	138
5.5	Bryophytes recorded in Gujarat and Its neighbouring states	146
5.6	Dimensions of Spore, chloronema and caulonema filaments of *Funaria hygrometirca* protonema in different concentrations of Knop's media	150
5.7	Plant species taken up for Barcoding study.	153
5.8	Species which were barcoded successfully along with their details	154

5.9	The bold Chromatogram of the different species	154
5.10	Accession number of species used from NCBI database for Phylogenetic analysis of Fissidentaceae	157
5.11	Accession number of species used from NCBI database for Phylogenetic analysis of Bryaceae	159
5.12	Accession number of species used from NCBI database for Phylogenetic analysis of Ayotoniaceae	162
