ACKNOWLEDGEMENT

I am indebted to many for the successful completion of this work. First and foremost I acknowledge my deep gratitude and appreciation to **Dr. S.S.Kansara**, Reader, Department of Chemistry, whose scholarly guidance and patience helped me to complete this thesis successfully.

I am also thankful to Dr.N.K.Patel, Reader, Department of Chemistry, S.P.University, who has been a constant help and encouragement to me in my research. Thanks are due to Prof. A.K.Rakshit and Prof. A.C.Shah, present and former Heads, Department of Chemistry, M.S.University of Baroda for extending facilities to work in the department. I acknowledge the significant help given by Dr. AkioTakemura, Associate Professor, Department of Biomaterial Sciences, University of Tokyo, in doing the SEM and DMA analyses of my samples. I also remember the help given by Dr.C.F.Desai, Reader, Department of Physics, M.S.University of Baroda in recording the IR spectra of some polymer samples. I take this opportunity to thank Dr.B.V.Kamath and Dr.H.S.Rama, Readers, Department of Chemistry for their valuable suggestions.

I thank my friends Drs. Varghese, Beena, Sureshan, Biju, Ramesh, Suresh, Raveendran, and Messrs. Prasad, Ramakanthan, Chandran Dileep, Suresh and Paresh for their timely help.

Finally I owe my gratitude to my parents and other family members for their unfailing support in the completion of this thesis.

Ajithkumar. S
