List of tables

Table 1 Endoproteases found within the endosomal system.

Table 2 Viability assays on primary cultures exposed to iron-dextran and FITC-dextran.

Table 3 Disruption of rat peritoneal macrophages.

Table 4 Biochemical analysis of affinity magnetic chromatography fractions.

Table 5 Biochemical analysis of thioglycolate elicitated rat peritoneal macrophage endosomal fractions.

Table 6 Biochemical analysis of resident rat peritoneal macrophage endosomal fractions.

Table 7 Biochemical analysis of LPS stimulated rat peritoneal macrophage endosomal fractions.

Table 8 Comparative analysis of protein profiles in PNS and endosome fractions (RF) from three sets of macrophages.

Table 9 Percentage distribution of the endosomal lipids.

Table 10 Percentage distribution of the early endosomal lipids.

Table 11 Percentage distribution of the late endosomal lipids.
