List of Figures.....	vii
List of Tables	ix
Abstract.....	xi
Chapter 1 Introduction and Review of literature.....	1
1.1 <i>Klebsiella</i> spp.....	2
1.2 Antibiotic resistance.....	3
1.3 Genomics of antibiotic resistance in <i>Klebsiella</i> spp.....	5
1.3.1 Multilocus Sequence Typing (MLST).....	5
1.3.2 Mechanism/genes responsible for antibiotic resistance in <i>Klebsiella</i>	8
1.3.3 Mobile genetic elements involved in antibiotic resistance.....	13
1.4 Virulence genes.....	16
1.5 Virulence factors of <i>Klebsiella</i> spp.....	18
1.5.1 Capsular polysaccharides.....	19
1.5.2 <i>rmpA</i>	21
1.5.3 Exopolysaccharides (EPS).....	22
1.6 Biofilm.....	23
Chapter 2 Rational and objectives	26
Chapter 3 Collection, isolation and identification of clinical isolates of pathogenic <i>Klebsiella</i> spp.....	29
3.1 Introduction.....	30
3.2 Materials & methods.....	30
3.2.1 Collection of pathogenic isolates of <i>Klebsiella</i>	30
3.2.2 Isolation and identification.....	31
3.2.3 Biochemical tests.....	31
3.2.4 16s rRNA gene amplification and analysis.....	33

3.3 Results.....	35
3.3.1 Isolation and identification.....	35
3.3.2 Biochemical tests.....	37
3.3.3 16s rRNA gene amplification and analysis.....	42
3.4 Discussion.....	46
Chapter 4 Study of antibiotic resistance.....	49
4.1 Introduction.....	50
4.2 Materials and methods.....	51
4.2.1 Antibiotic susceptibility testing.....	51
4.2.2 Categorization of isolates.....	54
4.2.3 Phenotypic assay for ESBL and MBL production.....	55
4.2.4 Multiplex PCR for detection of carbapenemase genes.....	56
4.2.5 Quantitative expression of beta-lactamase genes using real-time reverse transcription-PCR (qRT-PCR)	59
4.2.6 Genomic analysis of PDR, XDR, MDR and susceptible isolates using whole genome sequencing.....	63
4.3 Results.....	67
4.3.1 Antimicrobial susceptibility testing.....	67
4.3.2 Categorization of isolates.....	75
4.3.3 Phenotypic assay.....	76
4.3.4 Multiplex PCR.....	79
4.3.5 Quantitative expression of beta-lactamase genes using qRT-PCR....	81
4.3.6 Genomic analysis of PDR, XDR, MDR and susceptible isolates using WGS by Illumina NGS.....	82
4.3.7 High-resolution genomic analysis of pan-drug resistant strain DJ using Illumina and Nanopore NGS.....	90
4.3.8 Analysis of global population of <i>Kp</i> sublineage CG147.....	93
4.3.9 Global analysis of ST231 <i>Kp</i> genomes.....	99
4.4 Discussion.....	105
Chapter 5 Study of virulence factors.....	113
5.1 Introduction.....	114
5.2 Materials and methods.....	116

5.2.1	Extraction of CPS.....	116
5.2.2	Extraction of EPS.....	116
5.2.3	Quantification of CPS and EPS.....	116
5.2.4	Statistical Analysis.....	117
5.2.5	Detection of string phenotype.....	117
5.2.6	Study of <i>rmpA</i>	117
5.2.7	Phagocytosis assay.....	122
5.2.8	Quantification of biofilm formation.....	125
5.2.9	Growth curve.....	126
5.2.10	Quantification of biofilm on catheters.....	127
5.2.11	Quantification of components of biofilm matrix.....	127
5.2.12	Time bound live dead assay.....	129
5.2.13	Inhibition assay.....	130
5.2.14	Addition assay.....	130
5.2.15	Microscopy of strong and weak biofilms.....	131
5.2.16	Cell adhesion assay.....	132
5.2.17	Statistical analysis.....	132
5.3	Results.....	132
5.3.1	Quantification of CPS.....	132
5.3.2	Quantification of EPS.....	133
5.3.3	Correlation between CPS and EPS.....	134
5.3.4	Frequency distribution of CPS and EPS.....	134
5.3.5	Detection of string phenotype.....	134
5.3.6	Study of <i>rmpA</i>	135
5.3.7	Phagocytosis assay.....	137
5.3.8	Biofilm Formation by uro-pathogenic <i>Kp</i> isolates.....	141
5.3.9	Components of strong and weak biofilm matrix.....	142

5.3.10 Inhibition and addition assay.....	144
5.3.11 Microscopy of weak and strong biofilm.....	145
5.4 Discussion.....	149
Summary.....	161
Conclusion.....	175
Appendix.....	179
Appendix 1.....	180
Appendix 2.....	181
