LIST OF FIGURES

Sr No.		Page No.
1.	The probable relationships of the Rubiaceae with the families of the Apocynales and Gentianales.	61
2.	The evolutionary levels achieved by various tribes of the Rubiaceae.	65
3.	Cladogram depicting the interrelationships among the genera of the Rubiaceae.	85
4.	Dendrogram showing groupings of plants and their branch points.	86
5.	Histological characters of *Adina cordifolia* (Roxb) Benth. & Hook.f.- bark	96
6.	" " *Anthocephalus cadamba* Miq.-bark and leaf	101
7.	" " *Borreria hispida* Schum. - root	106
8.	" " *Gardenia* (*Dikamali*) - gum	111
9.	" " *Hymenodictyon excelsum* wall. - bark	115
10.	" " *Ixora coccinea* Linn. - root	119
11.	" " *Ixora nigricans* Br. leaf	122
12.	" " *Ixora parviflora* Vahl. - bark	127
13.	" " *Meyna laxiflora* Robyns - leaf	131
14.	" " *Morinda citrifolia* Linn. - leaf	134
15.	" " *Morinda tinctoria* Roxb. - root	138
16.	" " *Oldenandia corymbosa* Linn. - whole plant	143
17.	" " *Ophiorrhiza mungos* Linn. - root	147
18.	" " *Paederia foetida* Linn. - Leaf and root	152
