CONTENTS

Part I

INTRODUCTION

	Page No.
1. Scope and object	2
2. Ion exchange materials	3
3. Ion exchange equilibria	15
4. Sorption of weak and nonelectrolytes	27

Part II

STUDIES WITH COUMARINS

5. Coumarins	34
6. Ultraviolet absorption spectra of coumarin	
Introduction	36
Experimental	41
Results	43
Discussion	66
References	67
7. Sorption studies with coumarins	
Introduction	68
Experimental	68
Results and Discussion	69
References	84
8. Separation of coumarins	
Introduction	86
Experimental	86
Nomenclature	87
Results and Discussion	95
References	96

Part III

STUDIES WITH CINCHONA ALKALOIDS

9. Cinchona alkaloids 98

10. Ion exchange studies with cinchona alkaloids 104

11. Estimation of cinchona alkaloids : Gravimetric studies 114

12. Estimation of cinchona alkaloids : Ultraviolet absorption studies

- Introduction 116
- Experimental 118
- Results 120
- Discussion 145
- References 146

13. The selectivity coefficients of sulphonic acid cation exchange resin Am-15 in sulphate and chloride solutions

- Introduction 147
- Experimental 147
- Results 151
- Discussion 159
- References 162

14. Equilibrium studies of organic cations with ionexchange resins 164

15. Equilibrium studies of cinchona alkaloid sulphates with sulphonic acid resins

Introduction	168
Experimental	168
Nomenclature	170
Results	172
Discussion	183
References	188

16. Effect of added sulphuric acid on equilibrium exchange of cinchona alkaloid sulphates with sulphonic acid resins

Introduction	189
Experimental	189
Nomencalture	189
Results	190
Discussion	208
References	210

17. Studies on the uptake of the alkaloid bases by resins in ethanolic and aqueous ethanolic solution

Introduction	212
Experimental	212
Nomenclature	213
Results	215
Discussion	223
References	225

18. Column studies with cinchonine sulphate

Introduction	226
Experimental	226
Results	229
Discussion	251
References	253

19. Summary 255
