Contents

Chapter-1 General Introduction [1-39]

- Abbreviation / Symbol
- Micellization
- Clouding
- Relevance of the research problem

Chapter-2 Material and Methods [40-49]

Chapter-3 Micellization and clouding behavior of anionic surfactants [50-66]

- Introduction
- Result discussion
- Conclusion
- References

Chapter-4 SANS studies on tetra- n-butyl ammonium dodecyl sulphate solutions : Effect of temperature [67-78]

- Introduction
- Result discussion
- Conclusion
- References

Chapter-5 Clouding behavior of sodium deoxycholate (NaDC) + amitriptyline hydrochloride (AMT) with and without additives [79-90]

- Introduction
- Result discussion
- Conclusion
- References

Chapter-6 Morphological transitions in anionic surfactants in presence of salts and additives [91-125]

- Introduction
- Result discussion
- Conclusion
- References

Chapter-7 Morphological transition in aqueous CTAB – NADC system [126-142]

- Introduction
- Result discussion
- Conclusion
- References

Chapter-8 Hexanol -triggered self- assemblies of the cationic gemini surfactant / KBr system [143-164]

- Introduction
- Result discussion
- Conclusion
- References

Overall Conclusion [165-166]
