

Table of Contents

Acknowledgments	i
Abstract	ii
List of Abbreviations and Symbols	v
List of Tables	viii
List of Figures	ix
1. Chapter 1: Introduction and Literature review	1
1.1 Malaria: historical perspective and current status	3
1.1.1 Lifecycle of <i>Plasmodium</i>	3
1.1.2 Classification of malaria	5
1.1.3 Factors affecting malaria transmission.....	5
1.1.4 Malaria Vaccine development	8
1.1.5 Antimalarial drugs.....	9
1.2 Plasmeprins: the <i>Plasmodium</i> aspartic proteases	11
1.2.1 Biosynthesis and maturation	12
1.2.2 Activation mechanism of vacuolar PMs.....	14
1.2.3 Structure and mechanism of action.....	17
1.2.4 PMs as antiplasmodial drug targets.....	18
1.3 Drug discovery from plants	18
1.3.1 Traditional wisdom: Ayurveda, Siddha, Unani.....	20
1.3.2 Ethnopharmacological approach: research from clinics to laboratories.....	22
Rationale, Scope and Objectives of the Thesis	23
2. Chapter 2: Screening of medicinal plants against <i>Plasmodium falciparum</i>	27
2.1 Introduction	29
2.2 Materials and methods	29
2.2.1 Selection of plants	29
2.2.2 Collection of plant material	30
2.2.3 Preparation of extracts	31
2.2.4 <i>In vitro</i> antiplasmodial activity screening	31

2.2.5 Antiplasmodial IC ₅₀ studies	36
2.2.6 <i>In vitro</i> cytotoxic activity	38
2.2.7 <i>In vitro</i> hemolytic activity.....	38
2.2.8 Statistical analysis	39
2.3 Results and discussion	39
2.3.1 Preparation of extracts	39
2.3.2 <i>In vitro</i> antiplasmodial activity screening	39
2.3.3 Antiplasmodial IC ₅₀ studies	42
2.3.4 <i>In vitro</i> cytotoxic activity.....	43
2.3.5 <i>In vitro</i> hemolytic activity.....	44
3. Chapter 3: Cloning and expression of Plasmepsin I and Plasmepsin II from <i>Plasmodium falciparum</i> and search for their inhibitors	49
3.1 Introduction	51
3.2 Materials and methods	52
3.2.1 Cloning and preparation of expression constructs	52
3.2.2 Expression of the recombinant enzymes.....	53
3.2.3 Purification of the recombinant enzymes.....	53
3.2.4 Activity assay.....	54
3.2.5 pH optimum determination.....	55
3.2.6 Protein concentration determination.....	55
3.2.7 PM inhibition assay	55
3.3 Results and discussion	56
3.3.1 Cloning and preparation of constructs	56
3.3.2 Expression of the recombinant enzymes.....	59
3.3.3 Optimization of the pH	66
3.3.4 Plasmepsin inhibition studies	67
4. Chapter 4: Phytochemical characterization of <i>Andrographis paniculata</i> ethanol and <i>Commiphora wightii</i> aqueous extracts	71
4.1 Introduction	73
4.2 Material and methods.....	744
4.2.1 Qualitative analysis of phytochemical constituents	74
4.2.2 Quantitative analysis of phytochemical constituents.....	75

4.2.3 LC-MS-QTOF analysis	77
4.3 Results and discussion	78
4.3.1 Qualitative and quantitative analysis of phytochemical constituents	78
4.3.2 LC-MS-QTOF analysis	80
5. Molecular interaction studies of <i>Plasmodium falciparum</i> specific Plasmeprin I and Plasmespsin II with compounds from <i>Andrographis paniculata</i> ethanol and <i>Commiphora wightii</i> aqueous extracts	87
5.1 Introduction	89
5.2 Material and methods	89
5.2.1 Homology modeling.....	89
5.2.2 Docking studies	90
5.3 Results and discussion	91
6. Summary	101
7. Conclusion	109
8. Future perspectives	113
9. Bibliography.....	117
6. Publications and Presentations.....	129
