<b>List of Abbreviations.....</b>	<b>iii</b>
<b>List of Figures.....</b>	<b>iv</b>
<b>List of Tables.....</b>	<b>vi</b>
<b>Abstract.....</b>	<b>vii</b>

### **1. Introduction and Review of Literature**

<b>1.1 Rhizobia .....</b>	<b>1</b>
<b>1.2 Process of Symbiotic Nitrogen fixation .....</b>	<b>2</b>
1.2.1 Pre-infection stages of nodulation .....	2
1.2.2 Nodulation .....	8
<b>1.3 Host root colonization by rhizobia .....</b>	<b>10</b>
<b>1.4 Rhizobia as biofertilizers .....</b>	<b>12</b>
<b>1.5 Nodulation competitiveness .....</b>	<b>13</b>
1.5.1 Motility and chemotaxis .....	15
1.5.2 Secretory and surface components.....	15
1.5.3 Survival and metabolic fitness .....	17
<b>1.6 Quorum sensing.....</b>	<b>18</b>
1.6.1 Quorum sensing in Gram positive bacteria .....	19
1.6.2 Quorum sensing in Gram Negative bacteria .....	20
1.6.3 Quorum sensing in Rhizobia .....	22
1.6.4 Quorum sensing and Nodulation competitiveness .....	27
<b>1.7 Pigeon pea .....</b>	<b>29</b>

## **2. Elucidation of quorum sensing components and their role in regulation of symbiotically important traits in pigeon pea nodule bacteria**

<b>2.1 Introduction .....</b>	<b>31</b>
2.2 Materials and Methods .....	33
2.2.1 Bacterial strains and culture conditions .....	33
2.2.2 Isolation of bacteria from pigeon pea nodules .....	34
2.2.3 Plant experiments.....	35
2.2.4 Detection of Siderophore production .....	35
2.2.5 Quantification of Indole-3-acetic acid production.....	36
2.2.6 Qualitative detection of 1-aminocyclopropane-1-carboxylic acid (ACC) deaminase production .....	36
2.2.7 Bioassay for N-acyl homoserine lactone production.....	37
2.2.8 Taxonomic identification of bacterial strains .....	37
2.2.9 Extraction of AHLs from spent bacterial culture supernatants .....	38
2.2.10 Chemical Identification of AHLs using Liquid chromatography tandem mass spectrometry .....	38
2.2.11 Detection of quorum sensing gene homologues in Ensifer isolates .....	39
2.2.12 Preparation of cells of differential densities and AHL-induction for gene expression analysis .....	41
2.2.13 Biofilm formation assay .....	41
2.2.14 Chemotactic motility assay .....	42
2.2.15 Real-time quantitative reverse transcription PCR (qRT-PCR) ...	42
2.2.16 Data analysis.....	43
<b>2.3 RESULTS.....</b>	<b>44</b>
2.3.1 Isolation of nodule bacteria from pigeon pea.....	44
2.3.2 Screening for host growth promotion and AHL production .....	44
2.3.3 Molecular phylogenetic identification of pigeon pea nodule isolates .....	46
2.3.4 Chemical identification of n-acyl homoserine lactones secreted by Ensifer isolates.....	48

2.3.5 Detection and sequence analysis of QS gene homologues of Ensifer isolates.....	55
2.3.6 Regulation of Biofilm formation and chemotactic motility by quorum sensing in the Ensifer sp. HP127 .....	56
2.3.7 Transcriptional control of symbiotically crucial phenotypes by quorum sensing in the Ensifer isolate.....	60
<b>2.4 Discussion .....</b>	<b>61</b>

### **3. Engineering quorum sensing systems of rhizobia to assess its effect on their nodulation competitiveness**

<b>3.1 Introduction .....</b>	<b>66</b>
3.2 Materials and Methods .....	67
3.2.1 Bacterial strains and culture conditions .....	67
3.2.2 Cloning of cinRI and sinRI regulons from Rlv3841 and Em8530 respectively .....	70
3.2.3 Electroporation of plasmid constructs in Rhizobium hosts .....	75
3.2.4 Measurement of production kinetics of n-Acyl homoserine lactones .....	75
3.2.5 Root attachment assay.....	76
3.2.6 Biofilm formation assay .....	77
3.2.7 Exopolysaccharide production assay .....	77
3.2.8 Scanning electron microscopy.....	78
3.2.9 Real-time quantitative reverse transcription PCR.....	78
3.2.10 Determination of host-growth parameters .....	79
3.2.11 Determination of nodulation competitiveness .....	79
<b>3.3 Results .....</b>	<b>80</b>
3.3.1 Overexpression of cinRI and sinRI in Rlv3841 and Em8530 respectively .....	80
3.3.2 AHL production kinetics of the QS overexpression strains .....	83
3.3.3 Effect of QS overexpression on attachment of rhizobia to the host root.....	83
3.3.4 Effect of homologous QS overexpression on biofilm formation ...	86

3.3.5 Effect of homologous QS overexpression on Exopolysaccharide production .....	88
3.3.6 Effect of QS overexpression of cinRI on the colony architecture of Rlv3841 on the pea root .....	88
3.3.7 Gene expression analysis in Rlv3841(pCINRI) .....	88
3.3.8 Effect of inoculation QS overexpressing transformants on the plant growth parameters .....	90
3.3.9 Effect of QS overexpression on the nodulation competitiveness.	91
<b>3.4 Discussion .....</b>	<b>93</b>

## **4. Spatiotemporal patterns of root colonization by *Ensifer* spp. individually and competitively on host plant**

<b>4.1 Introduction.....</b>	<b>98</b>
<b>4.2 Materials and Methods.....</b>	<b>99</b>
4.2.1 Bacterial strains and culture conditions .....	99
4.2.2 Construction of pBBR1MCS2-eGFP plasmid .....	99
4.2.3 Transformation of rhizobial strains by electroporation .....	100
4.2.4 Surface sterilization and germination of seeds .....	101
4.2.5 Plant inoculation for colonization experiments .....	102
4.2.7 Dual inoculations for competitive colonization .....	103
4.2.8 Quantification of rhizobial colonization .....	103
4.2.9 Inoculation of rhizobia on pigeon pea seedlings and growth under hydroponic conditions.....	105
4.2.10 Quantitation of exopolysaccharides production .....	105
4.2.11 Confocal laser scanning microscopy of <i>Ensifer</i> isolates on pigeon pea root .....	106
4.2.12 Scanning electron microscopy of <i>Ensifer</i> isoalates colonizing pigeon pea root .....	107
4.2.13 Microfluidics for visualization of rhizobia colonization of host root in real time.....	107
<b>4.3 RESULTS.....</b>	<b>110</b>

4.3.1 Spatiotemporal colonization pattern of Ensifer spp. individually on pigeon pea root .....	110
4.3.2 Competitive colonization of Ensifer spp. on pigeon pea root.....	112
4.3.3 Attachment attributes of rhizobial isolates .....	114
4.3.4 Microscopic analysis of root colonization architecture of the rhizobial colonies on pigeon pea .....	115
4.3.5 Time-lapse imaging of root colonization by rhizobia.....	120
<b>4.4 Discussion .....</b>	<b>121</b>
<b>Summary and Conclusion.....</b>	<b>132</b>
<b>Bibliography.....</b>	<b>137</b>
<b>Supplementary data.....</b>	<b>155</b>
<b>List of papers and Presentations.....</b>	<b>168</b>
<b>Appendix I .....</b>	<b>169</b>
<b>Appendix II .....</b>	<b>179</b>
