## CONTENTS

<i>LIST OF FIGURES</i> .....	
<i>LIST OF ABBREVIATIONS</i> .....	
<i>ABSTRACT</i> .....	<i>1</i>
<b>1. REVIEW OF LITERATURE</b> .....	<b>2</b>
<b>1.1 Rice as a staple diet and its economic significance</b> .....	<b>2</b>
<b>1.2 Plant pathogens of rice</b> .....	<b>2</b>
<b>1.3 Rice Blast Disease and symptoms</b> .....	<b>3</b>
<b>1.4 Rice blast pathogen <i>Magnaporthe oryzae</i></b> .....	<b>5</b>
<b>1.4.1 Infection cycle of <i>Magnaporthe oryzae</i></b> .....	<b>6</b>
<b>1.5 Regulation of Signalling and metabolic processes initiating pathogenesis</b> .....	<b>8</b>
<b>1.5.1 Formation of the infection structure appressorium</b> .....	<b>8</b>
<b>1.5.2 Nutrient uptake strategies of the hemibiotrophic pathogen</b> .....	<b>12</b>
<b>1.6 MAP Kinases in <i>M. oryzae</i></b> .....	<b>13</b>
<b>1.7 Stress activated pathways in filamentous fungi</b> .....	<b>15</b>
<b>1.8 Two Component Systems for Signal Transduction</b> .....	<b>15</b>
<b>1.8.1 TCS in fungal system</b> .....	<b>17</b>
<b>1.8.2 Two component systems in filamentous fungi</b> .....	<b>20</b>
<b>1.9 Importance of two component system and stress activated MAP Kinases in pathogenicity of the phytopathogens</b> .....	<b>21</b>
<b>1.10 Cross-talks involving the two component system regulated SAPKs and other MAP Kinases and other key signalling pathways</b> .....	<b>21</b>
<b>1.11 Involvement of histidine kinase signalling in light regulated expression</b> .....	<b>22</b>
<b>1.12 Histidine kinases and its downstream components in <i>M. oryzae</i></b> .....	<b>23</b>
<b>1.13 The TCS as new target for novel fungicides</b> .....	<b>24</b>
<b>2. MATERIALS AND METHODS</b> .....	<b>26</b>
<b>2.1 Fungal culture</b> .....	<b>26</b>
<b>2.2 <i>In silico</i> analysis of <i>MoHPT1</i></b> .....	<b>26</b>
<b>2.3 Plasmid construction</b> .....	<b>27</b>

---

---

---

2.4 Complementation of Yeast <i>YPDI</i> heterozygous deletion mutant with <i>Magnaporthe MoHPT1</i> .....	29
2.5 Transformation of the fungus .....	29
2.6 Southern blot analysis.....	30
2.7 Growth rate analysis of <i>M. oryzae</i> strains.....	31
2.8 Melanin formation of <i>M. oryzae</i> .....	32
2.9 Pathogenicity of <i>M. oryzae</i> strains on rice plants .....	32
2.10 Appressorium formation of <i>M. oryzae</i> .....	33
2.11 Total RNA extraction and cDNA synthesis .....	33
2.12 Quantitative real-time PCR (qRT-PCR) .....	33
2.13 Raising of antibodies against MoHPT1.....	34
2.14 Western blotting.....	35
2.15 Immunolocalisation and Microscopy .....	35
2.16 Tail PCR.....	36
2.17 Co-immunoprecipitation of MoHPT1.....	37
2.18 RNA extraction for RNA sequencing .....	38
2.19 Library preparation for RNA-Seq .....	38
2.20 Transcriptome Analysis and identification of differentially expressed genes .....	39
<i>CHAPTER 1: Magnaporthe Histidine Phosphotransferase is required for stress response signalling and survival</i> .....	40
3.0 ABSTRACT .....	40
3.1 INTRODUCTION: Histidine phosphotransferase and it's role in stress signalling .....	41
3.2 RESULTS: Characterization of <i>MoHPT1</i> in <i>M. oryzae</i> .....	42
3.2.1 Identification of <i>MoHPT1</i> gene in <i>M. oryzae</i> .....	42
3.2.2 Identification of two different transcripts of <i>MoHPT1</i> under different conditions .....	43
3.2.3 Cloning and construct preparation of the <i>MoHPT1</i> gene in different expression vectors.....	47
3.2.4 Antibody Raising and Western blot of MoHPT1 .....	49

---

---

3.2.5	Complementation of Yeast <i>YPD1</i> heterozygous deletion mutant with <i>Magnaporthe MoHPT1</i> .....	50
3.2.6	The functional expression of histidine phosphotransferase in <i>M. oryzae</i> . 50	
3.2.7	Indirect immunolocalisation of MoHPT1 .....	53
3.2.8	Null mutant of <i>MoHPT1</i> is probably in-viable in B157 .....	53
3.2.9	Knock-down of <i>MoHPT1</i> in <i>M. oryzae</i> .....	56
3.2.10	Tail PCR of <i>MoHPT1</i> Knock-down transformant RA6 .....	56
3.2.11	<i>MoHPT1</i> gene knock-down highly affected sporulation and pathogenicity.....	58
3.2.12	Knock-down of MoHPT1 significantly affects the light induced expression of Histidine kinases .....	58
3.2.13	Stress sensitivity and expression of <i>MoHPT1</i> under stress in knock-down transformants .....	62
3.2.14	Resistance to phenylpyrrole and dicarboximide antifungal agents.....	65
3.2.15	Expression of <i>MoHPT1</i> regulated genes under stress in knock-down mutant .....	65
3.2.16	<i>MoHPT1</i> in cell wall stress signalling .....	67
3.2.17	Laccase expression in <i>MoHPT1</i> RNAi transformants .....	69
3.2.18	Role of <i>MoHPT1</i> in Nitrogen catabolite repression or Carbon catabolite repression .....	72
3.2.19	Co-immunoprecipitation of MoHPT1 .....	72
3.3	DISCUSSION .....	75
	<i>CHAPTER 2: Transcriptome of M. oryzae Histidine Phosphotransferase MoHPT1 knock-down reveals significant functional role of two component systems in establishment of infection.</i> .....	80
4.0	ABSTRACT .....	80
4.1	INTRODUCTION: Functional role of TCS in virulence and development..	81
4.2	RESULT: Investigation of <i>MoHPT1</i> regulated stress response by global expression analysis .....	82
4.2.1	Differential expression of genes in the knock-down transformant RA6 compared to wild type B157 .....	82
4.2.1.1	Up-regulation of genes involved in nutrition and metabolism.....	84

---

---

4.2.1. 2 <i>MoHPT1</i> regulates detoxification mechanism and fungal cell wall remodelling genes .....	85
4.2.1.3 Differential expression of genes important for transcription regulation .....	85
4.2.1.4 Down-regulation of amino acid metabolism genes in <i>MoHPT1</i> knock-down .....	87
4.2.1.5 <i>MoHPT1</i> regulate plant cell wall degrading enzymes important for pathogenicity.....	87
4.2.1.6 <i>MoHPT1</i> regulates the expression of light regulated genes.....	89
4.2.1.7 <i>MoHPT1</i> knock-down affects secondary metabolism and xenobiotic response .....	89
4.2.1.8 <i>MoHPT1</i> knock-down affects protein degradation.....	90
4.2.2 Differential expression of genes in RA6 compared to wild type B157 under oxidative stress conditions.....	90
4.2.2.1 Genes which were differentially expressed only in Oxidative stress conditions .....	91
4.3 DISCUSSION.....	96
5. SUMMARY.....	102
6. CONCLUSION AND FUTURE PROSPECTIVE.....	105
7. APPENDIX .....	107
7.1 Appendix 1: Media and Buffers.....	107
7.2 Appendix 2: Summary of Transcriptome data .....	112
7.3 Appendix 3: Primers and sequencing details .....	143
8. REFERENCES .....	150
9. PUBLICATION.....	159
