ACKNOWLEDGEMENT

This thesis would not have been possible without the support of many people, and this limited space would not be enough to express all my sincere appreciation and gratitude to them. Here I had encountered few of them who decorated my graduate life with meaningful and memorable moments.

First and the most I would like to express my deep sense of gratitude to my research guide Prof. A. C. Sharma, Dean of Science Faculty, whose suggestions and criticisms have been indispensable not only in the successful completion of this work but also in accomplishing significant academic progress.

I owe special thanks to Dr S.S.Z. Ashraf and Dr Sagar K. Ambavale for contributing their ideas and stimulating discussions regarding my research works.

My special thanks also go to all my lab members; Dr K N Vyas, Dr P Tripathi, Pratik, Kavita, Ketan and Mudra, for providing diversity academic environment.

I would like to express my gratitude to my dearest friends; Sandip, Jenish, Rajesh, Aditya, Naveen and Sangeeta who have providing their help and encouragements during this journey.

I would also like to thank my post graduate teachers, Dr. Ashvin N. Prajapati and Dr. Narendrasinh D. Chavda for their constant enthusiasm and encouragement.

Finally, I would like to thank my family and especially my parents for their supports and encouragements. I would not have been able to pursue my goal and obtain my Ph.D. today without them.
