

ACKNOWLEDGEMENT

Although only one name appears on the cover of the thesis, but every work is always the result of the efforts of many great individuals. My work is also no different, many great researchers and individuals have contributed and helped me to achieve my research goals in one way or another. I owe my gratitude to all those people who have made this research possible. Experience earned through this research process is much precious and I will cherish this experience forever. My research work happened under the supervision of **Prof. Pragna Parikh** can be easily expressed by the phrase by an famous Italian philosopher Niccolò Machiavelli "*The more sand that has escaped from the hourglass of our life, the clearer we should see through it.*". I bow down to the almighty for giving me such a noble human being as my guide. Her academic knowledge, research acumen and ability to understand the problem & propose the most appropriate solution is exceptional. Without her guidance, it would have been impossible for me do my research work. Her motherly concerns have always worked for me as lighthouse in most difficult times of research work. Irrespective of her ill health and busy schedule she was always there for me and gave her all important suggestions. Above all, her caring nature has always guided me at my personal level and will look towards her in future as well. Her mentorship was paramount in providing a good experience for achieving short term objectives along with setting long-term career goals for me. She has encouraged me not only to grow as an experimentalist but also as an instructor and an independent thinker. Her unflinching courage and conviction will always inspire me, and I hope to continue to work with noble thoughts lodged by her. I also take the opportunity to express my gratitude to **Mr. Hitesh Parikh, Mr. Yashesh Parikh** and **Mrs. Vaidehi Parikh** for sparing their weekend holidays for my thesis work and boosting my confidence in completing thesis work.

Such a delicate work is not possible without the timely and advanced facilities provided by the Department. From my bottom of the heart, I would like to thank **Prof. Dolly Kumar, Head Department of Zoology** for her constant motivation and enthusiastic nature. My deepest gratitude to **Prof. B. Suresh** who ignited my thought process and gave valuable practical suggestions in the initial phase of my work. I sincerely appreciate **Prof. P. C.**

Mankodi, *Former Head Department of Zoology*, for motivating me at each stage of my research work and I would always be grateful to him for allowing me to utilize his lab facilities for my experiments, without which it would be very difficult for me to successfully complete my work. I want to thank **Dr. R. V. Devkar** for providing a Fluorescence microscope for my experiment work. I owe my deepest gratitude to all my teachers in the Department of Zoology for their constant support and valuable help. Also, I am grateful to all the non-teaching staff members of the department for their help and support in various situations.

I would also like to express my gratefulness to **Prof. Geeta Padate, Prof. K.D. Vaccharajani, Prof. Sunita Salunke, Prof. Vihav Vasu, Dr. Prakash Pillai, and Dr. U. K Gaurikumari** for their continuous encouragement in the completion of my thesis. My special thanks to **Dr. Hetal Roy** for giving me much needed advices while troubleshooting research problems. Discussions during the coffee time with her have always helped to solve the problem at hand. I am very much thankful to **Dr. Sanjay Karn** for his proactive & timely support and practical guidance. I am also grateful to **Mr. Gauravkumarsingh Gaharwar, Navrachna University** to solve my computer and statistical queries. I am lucky to have a group of highly motivated people around me who played a role in nurturing the practical and theoretical qualities in me.

I would be doing injustice to myself, if I forget to convey my gratitude to my senior, **Dr. Mohammedayaz Rangrez**, for helping in critical evaluation of my thesis. I am highly obliged and grateful to **Dr. Parth Pandya**, a brotherly support, who was my backbone in ups and downs at the personal and professional level. He also helped a lot in analyzing and interpreting my data. His continued praise encouraged my level of trust to take my work to a different level. I extend my sincere thanks to my labmates **Dr. Ankur Upadhaya, Sr. Linta Paulson, Mr. Hitarth Changani, and Ms. Ankita Salunke** for their help in the final compilation of the thesis.

My deepest admiration towards my friends **Ms. Nevyia Thakkar, Ms. Pinal Shah** and **Ms. Barkha Purohit** for helping me whenever I was in need of it. They helped me in the standardisation of various genes by providing various practical approaches.

There are many individuals who may not belong to your domain or may not be from your profession even but their suggestions and motivating words can be much helpful in every difficult situation. I am grateful to have many such people around me, timely wisdom from enlightened individuals like **Prof. Apurva Shah, Dr. Ravindra Jadeja, Prof. Hitesh Ravia** and **Prof Kirit Lad** has always encourage and motivated me during my research work. My friends **Mr. Alpesh Patel, Mr. Naveen Singh, Mr. Gaurang Joshi, Ms. Pankti Vaidya, Mr. Hemant Thaker, Mr. Niraj Patel, Ms. Divyesh Purohit, Mrs. Suzen Mackwan, Mr. Sanket Patel, Mr. Kush Bhavshar** and **Mrs. Riddhi Bhavshar** always worked as major stress reliever for me during the most difficult times of my research work. The magnitude of non-academic help they have given cannot be described in the words. I also would be ungrateful if I do not appreciate my musketeer **Yashvi**, my little niece, or her ever-smiling face. I wish to God that every budding researcher should have such people around them.

Without the love and support from my **parents & my brother**, such endeavours are beyond my imagination. My parents have always strived for providing us the education best in its class. I thank them for the trust they kept on me to pursue my dreams, even when it seemed incomprehensible. I feel very proud to mention that my parents are very simple and they taught me how to lead a simple life. I would simply say, "Mummy, Papa you are unique in this world!" I strongly believe that their prayers played a very important role in my life. They are the most important people in my world and I dedicate this thesis to them. My brother, Prerak, is always the source of constant motivation and support for me.

I thank them all and the others who genuinely offered their support. I appreciate those to whom I might have missed here in spite of their contribution to the accomplishment of my Ph.D.

Last but not least, I am thankful to the University Grant Commission for providing financial support in the form of the UGC-BSR Scholarship.

-Bhumi Thakkar
