

## ACKNOWLEDGEMENT

First and foremost, I would like to thank *"The Almighty"* for enabling me to complete this research project successfully. His blessings and mercy helped me a great deal all throughout.

It is said that it is only the "GURU"- the one who shows light in darkness and shows us the right path to achieve any goal successfully. I express my deepest sense of gratitude towards my guide and my "GURU" Prof. A. V. Ramachandran for being the torch bearer and helping me reach this position. Without him it would not have been possible to see this world with a correct scientific vision. His indepth knowledge of all subjects and foresightedness has inspired me to know life sciences so well.

I am grateful to the Head, Department of Zoology, Faculty of Science, The M. S. University of Baroda, Vadodara for allowing me to carry out my research work in the department.

A traveller always needs certain landmarks to show the way to his destination. I found them in form of very valuable and precious suggestions from some very noble people. I am very grateful to Prof. Michael M. Aruldas (Department of Endocrinology, PGIBMS, University of Madras, Taramani Campus, Chennai) for giving me a chance to work in his lab every time I needed. It was due to him that I was able to have hand on experience of some of the specialized techniques (Western blot analysis, RT-PCR) and I am also thankful to Prof. K. Balasubramanian (Department of Endocrinology, PGIBMS, University of Madras, Taramani Campus, Chennai) for allowing me to work in his lab for Leydig cell isolation and cell culture experiments. I also thank research students of Department of Endocrinology, PGIBMS, University of Madras, Taramani

campus, Chennai, especially Stanley, Sridhar, Katheresh Kumar and Selvaraj for their help in carrying out cell culture experiments.

I am grateful to Dr. T.G. Srivastava Sir (Department of Reproductive Biomedicine, NITFW, New Delhi) for providing me with all the necessary equipments to carry out hormone assay (Testosterone, Estradiol and Melatonin). I thank him for his deep interest and constructive criticism in my research work. His research students Mr. Vinay Tripathi and Ms. Seema Naara also helped me with my work in their lab.

My sincere thanks to Chaube Sir (Department of Zoology, Banaras Hindu University, Varanasi) in helping me to carry out TUNEL assay, Serum NO assay Caspase3 assay and giving me technical advise to conduct cell culture experiments. His enthusiastic approach, good counsel and encouragement helped me a great deal for the successful completion of some of the parameters pertaining to my research work.

I thank Mr. Mombasawala(SAIF, IIT-B, Mumbai) for his guidance regarding the sample preparation for ICP-AES and the Earth Science Department of IIT Bombay, Powai, Mumbai for allowing me to measure tissue metal content by employing ICP-AES technique.

I cannot forget the ever so cheerful T. Shivanandappa Sir (Department of Biochemistry and Nutrition, CTRI, Mysore) for his simple yet meaningful approach towards research. I thank him for his critical comments and advise regarding experimental setup and study design. I thank Late Ben Pereira Sir(IIT-Roorkee, Roorkee) for some of his valuable tips during my research. My heartfelt thanks to Prof. M. A. Akbarsha (Department of Animal Sciences, Bharathidasan University, Tiruchirappalli) for his precious advice in semen parameters.

*My sincere thanks to Prof. Maheep Bhatnagar (Head, Department of Zoology, Mohanlal Sukhadia University, Udaipur). I express my gratitude towards two of the most senior and highly dignified persons Prof. R.V. Shah Sir and Prof. P. Govindarajulu Sir (Department of Endocrinology, PGIBMS, University of Madras, Chennai) for their blessings. Also Dolly Shah Madam for her encouraging words and motherly concern for my work.*

*I thank Dr. Darshika Shah Madam (Department of Pharmacology, Parul Institute, Waghodia, Vadodara), Aruna Joshi Madam (Department of Botany, The M. S. University of Baroda, Vadodara) and respected Cherian Sir for their moral support and encouraging words.*

*Sun Pharma Advance Research Center, Vadodara rendered me with one of the most important need for my research i.e. animals for my experiments and investigations. I specially thank Dr. M. R. Marathe for giving me some useful tips regarding animal maintenance and Dr. Satish Panchal who gave me some critical comments on animal maintenance. I sincerely thank Dr. T. Rajammannar for allowing me and Dr. Vinod Burade for helping me in carrying out steroid hormone assay. I also thank Dr. Rajesh Anand for me giving valuable suggestions to form an Institutional Animal Ethical committee and formalities related to CPCSEA. I would also like to thank H. Krishna (Reliance Life Sciences, Navi Mumbai) for providing valuable tips regarding animal care and handling.*

*I thank the whole Teaching and Non-teaching staff especially Mr. Hitesh Suthar and Mr. Sangeet Patel of Zoology Department for rendering their generous help all throughout my sojourn as a research student at the department.*

*I thank Bhanvinbhai and Hardikbhai (Gujarat Chemicals, Vadodara) for providing necessary chemicals as per our requirements. Mr. Bhanubhai of Durga Scientific (Vadodara) for providing me with plasticware and glassware required for my research work. I also thank Mr. Nair (Department of Microbiology and Biotechnology, The M. S. University of Baroda, Vadodara) for procuring Sigma-Aldrich chemicals. I thank Mr. Ganesh (Cryoscientific, Chennai) for promptly attending our complaints and solving the problems related to -80° Refrigerator without any delay. It helped me in maintaining the proper storage of my experimental tissues. I also thank Mr. Vinod Patel of Pranav Agro for providing food pellets for the rats. I acknowledge Mr. Chandrakant for extending his helping hand for preparing Histopathology slides.*

*I would also like to acknowledge and appreciate Pankaj Sharma and Angshuman (Nano) from Chemistry Department and also Kiran from Physics Department for their valuable support towards the execution of my work.*

*God showers His blessings in the form of true friends. I find myself lucky that God has blessed me with some of the most wonderful friends. To begin with I would thank Tejas for criticism, love and unending affection. The quote "a friend in need is a friend indeed" is made for friends like Anand, Jatin, Ankur, Riddhish, Maunik, Pratyush and Mayur. Without their moral support and encouragement it would have been difficult for me to finish my research.*

*I deem a great pleasure in thanking Neha a million times for sharing with me countless useful references and her encouraging words. I should not forget to thank Shweta Bhatt for her cheerful and rejuvenating company during our meetings at the coffee shop. I also thank Shristuti and Dhaval for their friendship and care.*

*I immensely thank Dr. Biren, Dr. Nikhil, Dr. Zala and Dr. Jennipher for helping me at the beginning of my research work. A special thanks to my juniors who always showed their readiness to help me. I thank Sushmita, Renuka, Shagufta, Manisha and a very special thanks to Monaz for some of the most tedious works that we performed for the animal treatments and maintenance.*

*My sincere thanks to Prakash Pillai and Niraj Bhatt for some of their very important suggestions and valuable technical advise for standardizing biochemical assay for my research work. I am thankful to Shiva, my friend and ex-colleague for his concern about my research work, boosting up my morale and all the adjustments for classes and practicals that he has made during his presence in the department, whenever required.*

*I cannot forget Sanjay dada for what he has done for me. It's not just about providing us with biochemical assay kits or procuring Melatonin kit but, his presence and concern for my research helped me to stand tall in the toughest of times. Without him my work would not have been smooth even in tough times.*

*I can never forget to appreciate how much labmates have been helpful for me. Raktim Mukherjee (Dada) cannot be forgotten at all for his sound technical advises. His company and help gave my work a better perspective. I duly acknowledge Yashkamal (the CEO), Prem, Darshie, Kiran, Menaka and Deepak for their generous and timely help extended towards my research work,*

*I fall short of words to thank Vandana, Palak, Hemangi and Pradnya for extending their generous help during the last but crucial phase of my research work. Their concern and care for me never allowed unfavourable conditions to overrule my state of mind.*

*Rome was not built in a day and not at all by a single person. So is my work which is accomplished by efforts and help of several people. Words cannot truly express the regards, which I hold for Jagruti and Sonal for all their concern about my research work and tireless help and co-operation rendered during the making of thesis. I owe a special thanks to Sunny, Chandni, Trupti, Nirjara, Ansar and Ravi for their help for the successful completion of thesis.*

*My heartfelt thanks to Sudip for his support and care. Working together with him was a wonderful experience and without combined approach and efforts either the beginning or the completion of this work would not have had materialized. We not only just worked together but laughed and shared the difficult movements of life and research together.*

*I heartily thank all the Scientists who provided me with all the reprints and research articles on time whenever I asked for.*

*It is said that "Somebody's gain is Somebody's loss" and in vivo experimentation is not possible without animals. Hence, I would not like to miss this opportunity to thank all innocent creatures (Wistar rats) who sacrificed their valuable lives for successful completion of my research work.*

*I thank my beloved sister Gopi & MayurJijaji and also all the members of Gaekwad Family for their encouraging words and moral support throughout my research work. I am thankful to Jagjit Singhji and Kishore Kumar for their gazals and songs respectively which always gave me chance to get relaxed and refreshed during the stressful days of my life and research.*

*Life without love is like an incomplete sentence. And my sentence of life can never be completed without my wife, Zankhana. Her love, affection, faith and patience gave me inspiration to never give up even at the most critical phases of my life.*

*Last but not the least, I can never find words enough to thank My Parents and My Grandmother (Baa). Their patience, love and care for me have always given me the strength to work and to carry on in both good as well as bad times of my life. Be it success or failure their support and trust in me have always been my strength to work hard and to bring the best out of me. I owe each and every accolade of my life to them.*

*Lastly I thank one and all for being so patient with me and helping me to get what I aimed and desired so much in my life.*

*Niraj R. Joshi*
