मार्गव्यवस्था-जयपुरनगरम्

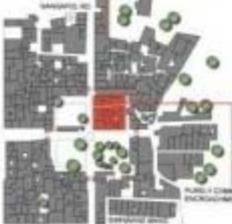

जयपुरनगरम्

1 New Gate:
Originally a char darwaza, later expanded by Sawai Jai Singh II. A clear demarcation in built form is seen between the structures inside and outside the walled city. Part of visual axis from Albert Hall to City Palace. Only gate with separate openings for pedestrians. Thus the gate has a total of 3 arched openings.

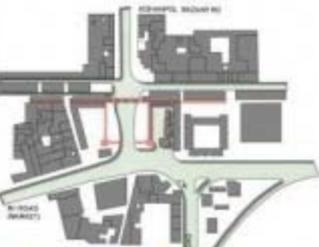

2 Char Darwaza:
The complex consists of 4 gates, enclosing an open space. It was intended as an emergency shelter. It is among the 2 gates that open into the valley. Land use is mostly residential or mixed (commercial + residential).

3 Chandpol Gate:
Lies on the far east of the East West Axis.

4 Ajmeri Gate:
1 Facing MI Road (Commercial Hub of New Jaipur)
2 The Gate acts as an interface between the old and the new city.

5 Sangneri Gate:
Built on the road to Amer (2018), the structure's appearance makes integration of traffic. Gate has been suitable modified for pedestrian traffic movement. Poor pedestrian connectivity near gate area. Impacts of adjoining to Bapu Bazaar.

1 Gate experiences heavy traffic congestion
2 Critical vehicular node of Jaipur City
3 The gate manifests itself into a make-shift chowk. As a result of extensive commercial activity.
