CASE STUDY PROFORMA

Purpose of the Case Study :

This Case study is directed to Study the objectives of some selected Innovations in higher education and to know the process of their implementation in the institutions and further to find out the factors responsible for its successful or unsuccessful implementation.

A. INFORMATION ABOUT THE UNIVERSITY :

1. Name
2. Place
3. Date of establishment
4. No. of Faculties
5. Names of different faculties with total strength as well as the total strength of the teaching staff

<i>Faculty</i>	<i>Total No. of Staff</i>	<i>Total No. of Students</i>
(a)		
(b)		
(c)		
(d)		
(e)		

B. THE INNOVATION

1. Name of the Innovation
2. Whether the innovation is taken up by the faculty or the whole University.
3. Sponsors of the Innovation
4. Objectives of the Innovation

C. RESOURCES NEEDED FOR THE INNOVATION

1. Technical personnel
2. Finance

3. Equipment
4. Technical know how
5. Library
6. Different means of communication and etc.

D. INNOVATIVE FEATURES OF THE PROJECT

1. Through the innovation which new practices were expected to be followed in the institution.
2. To what extent this project could be followed?
3. With what purpose the innovation was tried out, experimented, temporary, specific period or institutionalised.

E. PROCEDURE FOLLOWED FOR THE IMPLEMENTATION OF THE INNOVATION

1. Different personnel involved in the implementation of the innovation.
2. Population for whose benefit the innovation is being implemented.

F. IMPLEMENTATION OF THE INNOVATION

1. When was the innovation started?
2. How much time was expected to be spent in the implementation of the innovation?
3. What was the procedure followed to assess the progress of the innovation at the end of every specific intervals?

4. How was the project expected to contribute to the amelioration of the problem?
5. At what stage after the implementation of the innovation it was found out that the innovation would be implemented successfully or not?
6. Why was it felt like that?
7. What were the factors working against the successful implementation of the innovation?
8. If the innovation was being successfully implemented according to you, what factors played very important role for its success?

G. EVALUATION

1. What methods were adopted to evaluate the project?
2. How was it tested that the objectives in mind were realised through the implementation of the innovation?

- What further steps were taken to strengthen the effects of the successful implementation of the innovation?

...

...

H. IMPACT

- 1. What were its real contributions and how much benefit was derived out of it?

...

- 2. What changes were brought out?

...

- 3. Effects of this innovation on the other institutions or within the institution.

...

I. IMPRESSIONS AND INFERENCES

- 1. The present position.

...

- 2. What impressions it has created in its jurisdiction?

...
