

TABLE OF CONTENTS

	Page
SYNOPSIS	iii
ACKNOWLEDGEMENTS	v
LIST OF TABLES	x
LIST OF FIGURES	xi
1. INTRODUCTION	1
1.1 General	1
1.2 Eccentrically Loaded Members with Uniaxial Bending	1
1.3 Eccentrically Loaded Members with Biaxial Bending	2
1.4 Notation	5
2. REVIEW OF ULTIMATE LOAD THEORIES	6
2.1 Stress Strain Relationship	6
(a) General	6
(b) Summary of Equations	7
(c) Unit Strain ϵ_u at Ultimate Stress f_u	11
(d) Selection of Curve	13
(e) Functional Form of Stress Strain Curve	15
2.2 Ultimate Load Theories	17
(a) General	17
(b) Background of Theories	18
(c) Thattey's Theory	18
(d) Tung Au Charts	20
(e) ACI Design Charts	21

	Page
(f) Approximate Methods	22
(g) John Meek Approach	26
(h) Tung Au Theory	27
(i) Fleming and Werner Non-dimensional Charts	27
(j) Huggins and Farah Polynomial Stress Block	29
(k) Ramamurthy and Mallick Approach	30
(l) Weber, Row and Paulay Charts	31
(m) Medland and Donald Method	33
(n) Interaction Exponent	34
2.3 Closure	36
3. SCOPE OF THE PRESENT STUDY	47
3.1 General	47
3.2 Object and Scope	47
4. DEVELOPMENT OF THEORY	51
4.1 General	51
4.2 Notation	52
4.3 Assumptions	55
4.4 The Development of Theoretical Equations	57
4.5 Location of Neutral Axis	73
4.6 Summary of Equations	74
5. COMPUTATIONS	99
5.1 General	99
5.2 Scheme of Computation	99
5.3 Computer Programme	101

	Page
5.4 Solution of Cubic Equations	102
5.5 Input and Output Cards	104
5.6 Use of Output Results	105
6. EXPERIMENTAL WORK	106
6.1 General	106
6.2 Scope of Experimental Work	106
6.3 Material Strengths	108
6.4 Testing Equipment	108
7. TEST RESULTS	116
7.1 General Remarks	116
7.2 Presentation of Test Data and Results	116
7.3 Behaviour under Load and Mode of Failure	117
7.4 Observations regarding Crack Pattern and Modes of Failure	120
7.5 Test Results; Influence of Variables	127
7.6 Closure	130
8. SUMMARY AND CONCLUSIONS	134
8.1 Summary	134
8.2 Conclusions	136
8.3 Recommendations for Biaxial Beam Column Design	138
8.4 Recommendations for Future Research	138
BIBLIOGRAPHY	143
APPENDIX A COMPUTER PROGRAMME FLOW DIAGRAM	151
APPENDIX B ARRANGEMENT OF MAIN PROGRAMME AND SUB ROUTINES	153

		Page
APPENDIX C	COMPUTER PROGRAMME	155
APPENDIX D	DESIGN EXAMPLE	167
APPENDIX E	ULTIMATE THRUST MOMENT INTERACTION GRAPH NOS. 1 to 98	170
APPENDIX F	ECCENTRICITY RATIOS AND ULTIMATE LOAD FACTORS GRAPH NOS. 99 to 128	269
APPENDIX G	PHOTOGRAPHS IN PLATE NOS. 1 to 27	300
