

## PREFACE

Thesis-writing is a fruitful learning experience. The investigator has enjoyed it as he has had an opportunity to revise his thesis according to the useful suggestions offered by his guide and the external examiners. This effort has brought the thesis to the present shape and has increased its academic value. A considerable improvement in the quality of this study, it must be admitted, owes largely to the expert comments of the examiners. The revision of the thesis was, of course, a challenging task which has demanded from the investigator a great deal of reading, imagination resourcefulness, patience and toil.

For this, the investigator acknowledges his sincere thanks to Dr.S.N.Mukerji and Dr.B.P.Lulla who have readily given their valuable time, help and guidance whenever the task became difficult for

him. He is also indebted to Dr.D.M.Desai, Reader in Educational Administration and Mr.Edwell Sutton,Chief Inspector of Schools (Tanganyika) with whom he has had the opportunity of discussing the subject matter pertaining to Chapters IV and V.

The investigator cannot forget to appreciate the help of the State Directors of Education for supplying him the necessary data, of the Centre for Advanced Study in Education at Baroda for lending him the reference books, and of the DEPSE for sending him the latest figures required for the study.

Since it is not possible to record individually all the inspecting officers, the headmasters, the teachers and the educationists who have willingly participated in this study project, he thanks them sincerely though collectively for their co-operation.

Last but not least, the investigator has the pleasure in presenting his revised thesis which in fact is the outcome of his earnest labour for the past five years and feels that it has been a rewarding experience in itself.

For good and careful typing, the researcher  
wishes to express his appreciation to Mr.B.D.Mistry.
