

LIST OF TABLES

Table No.		Page No.
2.1	Distribution of excavated trenches across sites	33
2.2	Classification of the lithic assemblage	34
2.3	Characteristics of various tool types	35
2.4	Attributes recorded for tools	42
2.5	Attributes recorded for cores	43
2.6	Attributes recorded for Lithic Debitage:	44
3.1	Layer wise representation of lithic assemblage found from Loteshwar	47
3.2	Proximal end forms during Mesolithic and Chalcolithic periods at Loteshwar	53
3.3	Proximal end types during Mesolithic and Chalcolithic periods at Loteshwar	54
3.4	Proximal end shapes during Mesolithic and Chalcolithic periods at Loteshwar	54
3.5	Proximal end metrics in mm during Mesolithic and Chalcolithic periods at Loteshwar	55
3.6	Use marks on blades during Mesolithic and Chalcolithic periods at Loteshwar	59
3.7	Retouches during Mesolithic and Chalcolithic periods at Loteshwar	59
3.8	Metrics of length of various types of intact blades in mm of Mesolithic period at Loteshwar	60
3.9	Metrics of length of various types of intact blades in mm of Chalcolithic period at Loteshwar	60
3.10	Metrics of breadth of various intact blades in mm of Mesolithic period at Loteshwar	61
3.11	Metrics of breadth of various intact blades in mm of Chalcolithic period at Loteshwar	61
3.12	Metric of thickness of various intact blades in mm of Mesolithic period at Loteshwar	61

3.13	Metric of thickness of various intact blades in mm of Chalcolithic period at Loteshwar	61
3.14	Metrics of length of various broken blades in mm of Mesolithic period at Loteshwar	62
3.15	Lengths of various broken blades in mm of Chalcolithic period at Loteshwar	62
3.16	Metrics of breadth of various broken blades in mm of Mesolithic period at Loteshwar	63
3.17	Metrics of breadth of various broken blades in mm of Chalcolithic period at Loteshwar	63
3.18	Metrics of thickness of various broken blades in mm of Mesolithic period at Loteshwar	63
3.19	Metrics of thickness of various broken blades in mm of Chalcolithic period at Loteshwar	64
3.20	Metric analysis in mm of the isosceles triangles of Mesolithic and Chalcolithic periods at Loteshwar	66
3.21	Metric analysis in mm of the scalene triangles of Mesolithic and Chalcolithic periods at Loteshwar	67
3.22	Metric analysis in mm of the lunates of Mesolithic and Chalcolithic periods at Loteshwar	67
3.23	Metric analysis in mm of the trapeziums of Mesolithic and Chalcolithic periods at Loteshwar	68
3.24	Metric analysis in mm of points of Mesolithic and Chalcolithic periods at Loteshwar	69
3.25	Metric analysis in mm of side and end scraper belonging to Mesolithic and Chalcolithic period at Loteshwar	70
3.26	Metric analysis of side scrapers belonging Chalcolithic of period at Loteshwar	70
3.27	Metric analysis in mm of core rejuvenation flakes of Mesolithic and Chalcolithic period of Loteshwar	75
3.28	Lengths in mm of blade cores from Mesolithic period at Loteshwar	81

3.29	Lengths in mm of blade cores from Chalcolithic period at Loteshwar	82
3.30	Breadth in mm of blade cores from Mesolithic period at Loteshwar	82
3.31	Breadths in mm of blade cores from Chalcolithic period at Loteshwar	82
3.32	Thickness in mm of blade cores from Mesolithic period at Loteshwar	83
3.33	Thickness in mm of blade cores during Chalcolithic period at Loteshwar	83
3.34	Metrics in mm of flake cores of Mesolithic period at Loteshwar	83
3.35	Metrics in mm of flake cores during Chalcolithic period at Loteshwar	84
3.36	Layer wise distribution of lithic assemblage at Datrana	88
3.37	Various proximal end categories at Datrana	93
3.38	Metrics in mm of platform end width and thicknesses at Datrana	93
3.39	Metrics in mm of lengths of various intact blades in mm at Datrana	97
3.40	Metrics in mm of breadth values of intact blades in mm at Datrana	98
3.41	Metrics in mm of thickness values of intact blades in mm at Datrana	98
3.42	Metric analysis of different types of broken blades in mm at Datrana	98
3.43	Metric analysis of triangles in mm at Datrana	100
3.44	Metric analysis of lunates in mm at Datrana	100
3.45	Metric analysis of trapeziums in mm at Datrana	101
3.46	Metric analysis of points in mm at Datrana	102
3.47	Metric analysis of core rejuvenation flakes at Datrana	108
3.48	Metric analysis of blade cores in mm at Datrana	114
3.49	Metric analysis of flake cores in mm at Datrana	115

3.50	Metric analysis of core cum scrapers in mm at Datrana	115
3.51	Metric analysis of proto blade cores in mm at Datrana	116
3.52	Trench wise distribution of lithic assemblage at Shikarpur	120
3.53	Proximal end features of Rohri chert blades at Shikarpur	123
3.54	Proximal end width and thickness in mm of Rohri chert blades at Shikarpur	124
3.55	Metrics of Rohri chert blades in mm at Shikarpur	126
3.56	Metrics of different intact blades in mm of Rohri chert at Shikarpur	126
3.57	Representation of blades according of raw materials at Shikarpur	128
3.58	Proximal end width and thickness in mm at Shikarpur	130
3.59	Metrics of intact blades in mm at Shikarpur	133
3.60	Metrics of broken blades in mm at Shikarpur	134
3.61	Metrics of lunates in mm at Shikarpur	136
3.62	Metrics of points in mm at Shikarpur	137
3.63	Metrics of burins in mm at Shikarpur	137
3.64	Metrics of end scrapers in mm at Shikarpur	137
3.65	Measurements of core rejuvenation flakes in mm at Shikarpur	143
3.66	Metrics in mm of Rohri chert cores at Shikarpur	145
3.67	Metrics in mm of lengths of different types of cores at Shikarpur	147
3.68	Metrics in mm of breadths of different types of cores at Shikarpur	148
3.69	Metrics in mm of thickness of different types of cores at Shikarpur	148
3.70	Trenchwise representation of the lithic debitage at Pithad (1992)	152
3.71	Representation of layers at Pithad (1992)	152
3.72	Proximal conditions of intact as well as proximal fragments of blades during Mesolithic period at Pithad	156

3.73	Metrics in mm of platform width and thickness of blades during Mesolithic period at Pithad	156
3.74	Metric in mm comparison of lengths of different intact blades of Mesolithic period at Pithad	160
3.75	Metric in mm comparison of breadths of different intact blades at Mesolithic period of Pithad	160
3.76	Metric in mm comparison of thicknesses of different intact blades of Mesolithic period at Pithad	161
3.77	Metric in mm comparison of different broken blades of Mesolithic period at Pithad	161
3.78	Metric in mm analysis of lunates from Mesolithic period at Pithad	162
3.79	Metric analysis of trapeziums in mm from Mesolithic period at Pithad	163
3.80	Metric analysis of points in mm from Mesolithic period at Pithad	163
3.81	Metric analysis of burins in mm from Mesolithic period at Pithad	163
3.82	Metric analysis of borers in mm from Mesolithic period at Pithad	164
3.83	Metric analysis of end scrapers in mm from Mesolithic period at Pithad	164
3.84	Metric analysis of side scrapers in mm from Mesolithic period at Pithad	165
3.85	Metric analysis of double sided scrapers in mm from Mesolithic period at Pithad	165
3.86	Metric analysis of concave scrapers in mm from Mesolithic period at Pithad	165
3.87	Metric analysis of convex scrapers in mm from Mesolithic period at Pithad	167
3.88	Metric analysis of side and end scrapers in mm from Mesolithic period at Pithad	167

3.89	Metric analysis of round scrapers in mm from Mesolithic period at Pithad	167
3.90	Metrics of core rejuvenation blades in mm of Mesolithic period at Pithad	170
3.91	Metric of blade core lengths in mm of Mesolithic period at Pithad	177
3.92	Metric of blade core breadths in mm of Mesolithic period at Pithad	177
3.93	Metric of blade core thicknesses in mm of Mesolithic period at Pithad	177
3.94	Metric of flake core lengths in mm of Mesolithic period at Pithad	178
3.95	Metric of flake core breadths in mm of Mesolithic period at Pithad	178
3.96	Metric of flake core thicknesses in mm of Mesolithic period at Pithad	179
3.97	Proximal end conditions during Chalcolithic period at Pithad	187
3.98	Metrics in mm of platform width and thickness values of Chalcolithic period at Pithad	188
3.99	Metrics of intact blades in mm of Chalcolithic period at Pithad	189
3.100	Metrics of broken blades in mm of Chalcolithic period at Pithad	190
3.101	Metrics of lunates in mm of Chalcolithic period at Pithad	191
3.102	Metrics of trapeziums in mm of Chalcolithic period at Pithad	191
3.103	Metrics of points in mm from Chalcolithic period at Pithad	192
3.104	Metrics of burins in mm from Chalcolithic period at Pithad	194

3.105	Metric analysis of borers in mm from Chalcolithic period at Pithad	194
3.106	Metric analysis of end scrapers in mm from Chalcolithic period at Pithad	195
3.107	Metric analysis of side scrapers in mm from Chalcolithic period at Pithad	195
3.108	Metric analysis of double sided scrapers in mm from Chalcolithic period at Pithad	196
3.109	Metric analysis of concave scrapers in mm from Chalcolithic period at Pithad	196
3.110	Metric analysis of side and end scrapers in mm from Chalcolithic period at Pithad	197
3.111	Metrics of core rejuvenation flakes in mm from Chalcolithic period at Pithad	202
3.112	Metrics of cores in mm from Chalcolithic period at Pithad	206
5.1	Representation of lithic assemblage at selected sites.	229
5.3	Metric comparison of Rohri chert blades	239

LIST OF FIGURES

Figure No.		Page No.
1.1	The selected sites of study along with other major excavated sites of Gujarat.	2
2.1	Section at the site of Loteshwar	17
2.2	Plan of the excavation at Loteshwar 2009	18
2.3	Excavation at Datrana 2010	19
2.4	Section at Datrana 2010	20
2.5	Contour of Datrana	20
2.6	Section facing north of trench I, 1992 excavation at Pithad	22
2.7	Section facing east trench II, 1992 excavation at Pithad	22
2.8	Plan and layout of the fortification at the Pithad/Jaidak mound	23
2.9	Plan and layout of the Chalcolithic settlement at Pithad	24
2.10	Schematic cultural sequence at Pithad	25
2.11	Plan and layout of structures at Bagasra	27
2.12	Cross-section of Bagasra (Gola Dhoru) mound	28
2.13	Cross-section of Bagasra (Gola Dhoru) mound	29
2.14	The site of Shikarpur	30
2.15	Schematic cultural sequence at Shikarpur	31
2.16	Proximal (1,2,3,6) and mesial (4,5,7,8,9,10,11) blade fragments	36
2.17	Simple (1,2,3,4,5,8) and Retouched (6,7,9,10,11, 12,13,14) Blade fragments	37
2.18	Proximal (3,5), Mesial (4,6,7,8,9,10) and Distal (1,2) blade fragments	38
2.19	Simple blade (1,2,3,4,5,6,7,8,9,10,11) and crested ridge (12) blade fragments	39
2.20	Geometric tools: lunates (1,2), trapeziums (3,4,5,6) and triangle (7)	40
2.21	Non-geometric tools: burin (1), borer (2,11), points (3,4,5,6,7,8,9,10)	40

2.22	Various type of scrapers	41
3.1	Representation of lithic assemblage according to cultural periods at Loteshwar	47
3.2	Blades and blade flakes from Mesolithic and Chalcolithic period at Loteshwar (courtesy: NoGAP)	48
3.3	Representation of different types of blades according to their raw materials during Mesolithic and Chalcolithic periods of Loteshwar.	50
3.4	Representation of different types of blades during Mesolithic and Chalcolithic periods at Loteshwar	51
3.5	Condition of blades during Mesolithic and Chalcolithic periods at Loteshwar	51
3.6	Condition of blade types according to cultural periods at Loteshwar	52
3.7	Distal end terminations of intact blades and distal end fragments for Mesolithic and Chalcolithic periods at Loteshwar	56
3.8	Distal end terminations for proximal and mesial blade fragments of Mesolithic and Chalcolithic periods at Loteshwar	57
3.9	Representation of cortex on blade types from Mesolithic and Chalcolithic periods at Loteshwar	57
3.10	Edge condition of blades during Mesolithic and Chalcolithic periods at Loteshwar	58
3.11	Representation of geometric and non-geometric tools during Mesolithic and Chalcolithic periods at Loteshwar	65
3.12	Geometric tools from the Mesolithic and Chalcolithic periods	70
3.13	Geometric and non-geometric tools from Mesolithic and Chalcolithic periods	71
3.14	Representation of lithic debitage of Mesolithic and Chalcolithic period at Loteshwar	72

3.15	Condition of flakes during Mesolithic and Chalcolithic periods at Loteshwar	74
3.16	Representation of cortex on flakes of Mesolithic and Chalcolithic periods at Loteshwar	74
3.17	Nodules from Mesolithic and Chalcolithic periods at Loteshwar	75
3.18	Representation of cortex on waste/shatter during Mesolithic and Chalcolithic periods at Loteshwar	76
3.19	Core types according to raw materials during Mesolithic and Chalcolithic periods of Loteshwar	77
3.20	Core shapes according to raw materials during Mesolithic periods at Loteshwar	78
3.21	Core shapes according to raw materials during Chalcolithic periods at Loteshwar	78
3.22	Presence of cortex on cores of Mesolithic and Chalcolithic period at Loteshwar	80
3.23	Blade cores from the Mesolithic and Chalcolithic periods at Loteshwar	84
3.24	Blade cores from Mesolithic and Chalcolithic periods at Loteshwar	84
3.25	Various blades from Datrana	89
3.26	Various blades from Datrana	89
3.27	Crested Blades from Datrana	90
3.28	Layer wise representation of lithic assemblage at Datrana	91
3.29	Condition of different blades at Datrana	92
3.30	Distal end terminations for intact and distal fragments of blades at Datrana	94
3.31	Distal end terminations for proximal and mesial blade fragments	95
3.32	Representation of cortex on different blade types at Datrana	96

3.33	Representation of edge condition and retouches of various blades at Datrana	96
3.34	Distribution of geometric and non-geometric tools vs raw materials at Datrana	99
3.35	Geometric tools and points from Datrana	101
3.36	Points from Datrana	103
3.37	Distribution of lithic debitage according to raw materials at Datrana	105
3.38	Size wise representation of intact and proximal fragments of flakes at Datrana	106
3.39	Representation of nodules vs raw materials at Datrana	107
3.40	Cortex vs raw materials for waste/shatter at Datrana	108
3.41	Representation of cortex on cores at datrana	109
3.42	Representation of intact cores according to raw materials at Datrana	110
3.43	Blade cores from Datrana I	112
3.44	Blade cores from Datrana II	112
3.45	Cores showing remaining crests	113
3.46	Representation of cortex on blade cores at Datrana	113
3.47	Proto blade cores from Datrana	116
3.48	Layout of trenches at Shikarpur	121
3.49	Various blades vs raw materials at Shikarpur	122
3.50	Presence of cortex on Rohri chert blades at Shikarpur	125
3.51	Rohri chert blades from Shikarpur	127
3.52	Rohri chert blades from Shikarpur	127
3.53	Rohri chert blades from Shikarpur	128
3.54	Proximal end forms of different blades at Shikarpur	129
3.55	Proximal end types of different blades at Shikarpur	129
3.56	Proximal end shape of different blades at Shikarpur	130
3.57	Distal end terminations of intact blades at Shikarpur	131
3.58	Distal end terminations of broken blades at Shikarpur	131
3.59	Presence of cortex on blades at Shikarpur	132
3.60	Edge condition of blades at Shikarpur	133

3.61	Blades from Shikarpur	135
3.62	Representation of trenches for geometric and non-geometric tools at Shikarpur	135
3.63	Representation of raw materials for geometric and non-geometric tools at Shikarpur	136
3.64	Representation of lithic debitage according to raw materials at Shikarpur	138
3.65	Trenchwise representation of lithic debitage at Shikarpur	139
3.66	Condition of flakes according to raw materials at Shikarpur	141
3.67	Representation of cortex on flakes at Shikarpur.	141
3.68	Representation of size (cm) of intact as well as broken flakes according to presence and absence of cortex at Shikarpur	142
3.69	Condition of nodules at Shikarpur	142
3.70	Cortex on waste/shatter vs raw material at Shikarpur	143
3.71	Blade cores vs raw materials at Shikarpur	144
3.72	Blade core shapes vs raw materials at Shikarpur	144
3.73a	Rohri chert core from Shikarpur	146
3.73b	Blade cores from Shikarpur	147
3.74	Blades from the Mesolithic period at Pithad	153
3.75	Crested blade from Chalcolithic period and half crested blade from the Mesolithic period of Pithad	154
3.76	Various types of blades according to raw materials during Mesolithic period at Pithad	155
3.77	Condition of blades during the Mesolithic period at Pithad	155
3.78	Distal end types for intact and distal blade fragments of Mesolithic period at Pithad.	157
3.79	Distal end terminations for proximal and mesial blade fragments at Mesolithic period at Pithad	158

3.80	Representation of cortex on various blade types of Mesolithic period at Pithad	158
3.81	Representation of edge damages and retouches on blades during Mesolithic period at Pithad	159
3.82	Representation of geometric and non-geometric tools according to raw materials for the Mesolithic period at Pithad	166
3.83	Representation of lithic debitage according to raw materials for the Mesolithic period at Pithad	168
3.84	Representation of flakes conditions during Mesolithic period at Pithad	169
3.85	Representation of cortex on flakes during Mesolithic period at Pithad	169
3.86	Representation of nodules belonging to Mesolithic period at Pithad	171
3.87	Representation of cortex on waste during Mesolithic period at Pithad	172
3.88	Core types from Mesolithic period at Pithad	173
3.89	Blade and flake cores from the Mesolithic period at Pithad	174
3.90	Cores from Mesolithic period at Pithad I	175
3.91	Cores from Mesolithic period at Pithad II	175
3.92	Cores from Mesolithic period at Pithad II	176
3.93	Representation of cortex on cores from Mesolithic period at Pithad	176
3.94	Distribution of blades from Chalcolithic period at Pithad (2005-06/2006-07)	182
3.95	Distribution of geometric and non-geometric tools from Chalcolithic period at Pithad (2005-06/2006-07)	182
3.96	Distribution of lithic debitage from Chalcolithic period at Pithad (2005-06/2006-07)	183
3.97	Blades from the Chalcolithic period at Pithad	184

3.98	Blade and blade flakes from Chalcolithic period at Pithad	185
3.99	Blade types vs raw material during Chalcolithic period at Pithad	186
3.100	Blade conditions from Chalcolithic period at Pithad	186
3.101	Cortex on blades from Chalcolithic period at Pithad	188
3.102a	Geometric tools from Chalcolithic period at Pithad	192
3.102b	Geometric tools from Chalcolithic period at Pithad	192
3.103	Representation of geometric and non-geometric tools from Chalcolithic period at Pithad	193
3.104	Various scrapers from the Chalcolithic period at Pithad	198
3.105	Various scrapers from the Chalcolithic period at pithad	199
3.106	Lithic debitage vs raw materials from Chalcolithic period at Pithad	199
3.107	Size distribution of intact and proximal flakes from Chalcolithic period at Pithad	201
3.108	Condition of nodules vs raw material from Chalcolithic period at Pithad	201
3.109	Representation of cortex on waste from Chalcolithic period at Pithad	203
3.110	Intact blade cores according to their shapes from Chalcolithic period at Pithad	203
3.111	Intact flake cores according to their shapes from Chalcolithic period at Pithad	204
3.112	Cores from the Chalcolithic period at Pithad	207
4.1	Different raw materials	214
4.2	Location of Rohri hills and major excavated sites	217
4.3	Lithic assemblage from Mesolithic period at Loteshwar	219
4.4	Lithic assemblage from Chalcolithic period at Loteshwar	219
4.5	Lithic assemblage from Mesolithic period at Pithad	220
4.6	Lithic assemblage from Chalcolithic period at Pithad	220
4.7	Lithic assemblage from Datrana	221

4.8	Lithic assemblage from Shikarpur	221
4.9	Lithic assemblage from Bagasra	222
4.10	Crypto crystalline raw material sources of Gujarat	224
5.1	Graphic representation of lithic assemblages belonging to the five selected sites	229
5.2	Metric comparison of Rohri chert blades from different Early Harappan sites	237
5.3	Distribution of excavated trenches at Bagasra	243
