List of Figures	i
List of Tables	vi
List of Notations	vii

CONTENTS		Page No.
CHAPTER 1	Introduction	1-8
1.1	Introduction	1
1.2	Heavy metals	2
1.3	Effects of Heavy metals on human health	5
1.4	Research objectives	7
CHAPTER 2	Literature survey	9-33
2.1	Historical perspective	9
2.2	Classification of foam separation techniques	9
2.3	Foam generation and structure	15
2.3.1	Nature of foams	16
2.4	Foam flow and stability	17
2.5	Metal removal by foam separation a brief review	19
2.5.1	Zinc	21
2.5.2	Cadmium	23
2.5.3	Nickel	26
2.6	Polymer- surfactant association	31
2.7	Summary of literature Survey	33
CHAPTER 3	Materials and methods	34-45
3.1	Materials & Reagents	34
3.1.1	Metallic precursors	34
3.1.2	Surfactant	34
3.1.3	Polymer additives	35
3.1.4	Indicators	35
3.1.5	Miscellaneous chemicals	35
3.1.6	Ancillary reagents and chemicals	35
3.2	Experimental setup	36
3.3	Experimental Technique	38
3.4	Analysis of surfactant and metals	40
3.4.1	Surfactant analysis by two phase titration	40
3.4.2	Metal analysis	41

3.5	Determination of Interfacial areas in foam column	42
3.6	Characterization of particles formed in foam and foam morphology	43
CHAPTER 4	Foam formation in aqueous sodium dodecyl sulfate solutions and its characterization	46-80
4.1	Structure of foam	46
4.2	Sodium dodecyl sulfate in solution	49
4.3	Liquid holdup in foams	51
4.3.1	Effect of SDS concentration on liquid holdup	51
4.3.2	Effect of metal ions on foam bed volume	52
4.3.3	Effect of zinc ions on liquid holdup	53
4.3.4	Effect of cadmium ions on liquid holdup	54
4.3.5	Effect of nickel ions on liquid holdup	56
4.3.6	Effect of Zinc-Cadmium and Nickel-Cadmium ions on foam bed volume and liquid hold up	56
4.4	Role of polymeric additive on foaming behaviour	59
4.5	Effect of presence of PVP on the foaming patterns	60
4.6	Foam formed by bubbling air in surfactant solutions	63
4.7	Effect of air flow rate on foamate volume	64
4.7.1	Foamate volume collected in fixed time intervals	65
4.7.2	Foaming behaviour of SDS in presence of metal ions	68
4.8	Bubble size distribution in foams	69
4.8.1	Effect of Gas flowrate on Bubble size distribution	75
4.9	Interfacial area measurement	76
4.10	Conclusions	78
CHAPTER 5	Heavy metal removal using foam separation	81-129
5.1	Factors influencing foam separations	81
5.2	Optimization of operational parameters	82
5.3	Mechanism of flotation of metal ions by SDS	86
5.4	Zinc removal by foaming	87
5.4.1	Selection of sampling port	87
5.4.2	Effect of pH	87
5.4.3	Effect of SDS concentration	91
5.4.4	Effect of Zinc concentration in the feed	93
5.5	Cadmium removal by foaming	94

5.5.1	Effect of pH on cadmium removal	94
5.5.2	Effect of SDS concentration	96
5.6	Nickel removal by foaming	97
5.6.1	Effect of pH on nickel removal	98
5.7	Selective removal from Zinc-Cadmium and Nickel-Cadmium binary mixtures	100
5.7.1	Zinc-Cadmium removal by foaming	101
5.7.2	Effect of pH on zinc - cadmium removal	102
5.7.3	Nickel-Cadmium removal by foaming	104
5.7.4	Effect of pH on nickel - cadmium removal	104
5.8	Flotation rate constant	107
5.8.1	Flotation rate constant (k) for Zn-Cd system	108
5.8.2	Flotation rate constant for Ni-Cd system	109
5.8.3	Utility of flotation rate constant	109
5.9	Evaluation of the Distribution Factor	111
5.10	Effect of surfactant polymer interaction on metal removal	113
5.10.1	Cadmium removal using SDS-PVP complex	113
5.11	Characterization of precipitates collected in foamate	115
5.11.1	Fourier Transform Infrared Spectrometry (FTIR) for SDS and metals	115
5.11.2	SEM/EDX of zinc dodecyl sulfate	117
5.11.3	X-Ray diffraction of zinc dodecyl sulfate	118
5.11.4	Particle size distribution of zinc dodecyl sulfate	119
5.11.5	Sublate in foam column for cadmium removal	121
5.11.6	SEM/EDX of cadmium dodecyl sulfate	123
5.11.7	SEM/EDX of cadmium dodecyl sulfate in presence of PVP	124
5.11.8	SEM/EDX of Nickel dodecyl sulfate	124
5.12	Scale up of column operations	125
5.12.1	Effect of column diameter on foam behavior and removal of metals	125
5.13	Conclusions	129
CHAPTER 6	Summary and conclusions	130-135
6.1	Introduction	130
6.2	Foam behavior in aqueous sodium dodecyl sulfate solutions	131

6.3	Foam formation and associated metal recovery	131
6.4	Interfacial area and bubble size distribution	132
6.5	Heavy metals removal	132
6.6	Effect of column diameter on foam behavior and removal of metals	135
6.7	Scope for future work	135
REFERENCES		136-152
Appendix A	The Iodometric method	153
Appendix B	XRD profile of zinc dodecyl sulfate	154
