SR.NO.	TITLE	PAGE NO.
CHAPTER 1	INTRODUCTION	1-12
1.1	Wound	1
1.2	Wound management	3
1.3	Some biomaterial used in wound care systems	4
1.3.1	Collagen	4
1.3.2	Hyaluronic acid	5
1.3.3	Pot Marigold (<i>Calendula officinalis L.</i>)	5
1.4	Selected formulations for effective wound healing	5
1.4.1	Hydrogel	5
1.4.2	Scaffolds / Films	6
1.5	Aims and Objective	7
1.5.1	Aims	7
1.5.2	Objectives	7
1.6	Hypothesis	8
1.7	Plan of work	9
1.8	References	10
CHAPTER 2	LITERATURE REVIEW	13-78
2.1	Skin	13
2.1.1	Anatomy of skin	13
2.1.2	Wound	14
2.1.3	Wound healing	16
2.1.4	Wound Management	19
2.1.5	Advanced wound management	21
2.1.6	Wound dressing	22
2.2	Burn	28
2.2.1	Management of burns	28

SR.NO.	TITLE	PAGE NO.
2.3	Challenges	33
2.4	Hydrogels for wound healing	35
2.4.1	Different types of hydrogels	36
2.4.2	Methods for preparation of hydrogels	37
2.4.3	Characterization of hydrogels	39
2.4.4	Types of hydrogel dressings available in market for wound healing	39
2.5	Collagen dressings for wound healing	41
2.5.1	Formulation available in market	41
2.5.2	Indication	43
2.5.3	Contraindications	43
2.6	Pot marigold (<i>Calendula officinalis</i> L)	44
2.6.1	Description	45
2.6.2	Research work on <i>Calendula</i>	53
2.7	References	60
CHAPTER 3 PRELIMINARY STUDIES 79-97		
3.1	Characterization of hydroglycolic extract of <i>Calendula officinalis</i> flower	79
3.1.1	Physical appearance	79
3.1.2	Ph	79
3.1.3	Moisture content by Karl Fischer titration method	80
3.1.4	Qualitative chemical examination	81
3.1.5	DSC study	83
3.1.6	FT-IR study	84
3.1.7	Total polyphenolic content by Folin-Ciocalteu method	86
3.1.8	Total flavonoid content by aluminum chloride method	90

SR.NO.	TITLE	PAGE NO.
3.1.9	Antioxidant activity by DPPH assay	93
3.3	References	96
CHAPTER 4		
HYDROGEL SHEET –PREPARATION AND CHARACTERIZATION		98-142
4.0	CFE loaded hydrogel sheet: preparation, optimization and characterization	98
4.1	Materials	99
4.2	Preparation and optimization of CFE loaded hydrogel sheet	100
4.3	Characterization of CFE loaded PVA hydrogel sheet (CFE-hydrogel sheet)	103
4.3.1	Mechanical properties	103
4.3.2	Fluid absorption capacity	103
4.3.3	pH	104
4.3.4	Gel fraction	104
4.3.5	Total polyphenolic content	104
4.3.6	Total flavonoid content	105
4.3.7	Estimation of antioxidant activity by DPPH assay	105
4.3.8	DSC study	106
4.3.9	FT-IR study	106
4.3.10	Microbe penetration test	106
4.3.11	Sterility	106
4.3.12	<i>In-vitro</i> haemolysis study	106
4.4	Results and discussion	108
4.4.1	Hydrogel sheet preparation and optimization	108
4.4.2	Physicochemical characterization	127
4.5	References	138

CHAPTER 5	CFE-COLLAGEN FILM	143-173
5.0	Materials and methods: CFE loaded collagen film (CFE-collagen film)	143
5.1	Materials	143
5.2	Preparation and optimization of CFE-collagen films	144
5.3	Characterization of CFE loaded collagen film	146
5.3.1	Physical appearance	146
5.3.2	Thickness	146
5.3.3	pH	146
5.3.4	Folding endurance	146
5.3.5	Fluid absorption capacity	146
5.3.6	% Moisture content	147
5.3.7	Pepsin digestion time	147
5.3.8	Differential scanning calorimetry (DSC) study	147
5.3.9	Fourier-transform infrared (FT-IR) study	147
5.3.10	Total polyphenolic content	147
5.3.11	Total flavonoid content	148
5.3.12	Estimation of antioxidant activity by DPPH assay	148
5.3.13	<i>In-vitro</i> haemolysis study	148
5.3.14	Atomic force microscopy	149
5.3.15	Sodium-dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE)	149
5.4	Result and discussion	152
5.4.1	Preparation of CFE loaded collagen film	152
5.4.2	Total polyphenolic, flavanoid content and DPPH assay	156
5.4.3	<i>In-vitro</i> haemolysis study	159

INDEX

SR.NO.	TITLE	PAGE NO.
5.4.4	SDS-PAGE	160
5.4.5	Optical microscopy and AFM study	161
5.4.6	DSC study	164
5.4.7	FT-IR study	168
5.5	References	171
CHAPTER 6		
CHAPTER 6	<i>IN-VITRO</i> DRUG RELEASE STUDY	174-184
6.0	In-vitro drug release study	174
6.1	Material	174
6.2	Procedure	174
6.3	Kinetics of drug release	175
6.3.1	Zero order release equation	175
6.3.2	First order release equation	175
6.3.3	Highuchi square root of time equation	175
6.3.4	Korsmeyer-Peppas equation	176
6.3.5	Hixon-Crowell cube root model equation	177
6.4	Results and discussion	178
6.5	References	183
CHAPTER 7		
CHAPTER 7	CELL LINE STUDIES	185-196
7.0	Cell line studies	185
7.1	Materials	185
7.2	<i>In-vitro</i> cell cytotoxicity study (MTT assay)	187
7.2.1	Principle	187
7.2.2	Procedure	187
7.3	<i>In-vitro</i> wound healing (scratch assay)	188
7.4	Results and discussion	189

7.4.1	<i>In-vitro</i> cytotoxicity study	189
7.4.2	Scratch assay	192
7.5	Conclusion	194
7.6	References	195
CHAPTER 8 ANIMAL STUDY 197-219		
8.0	<i>In-vivo</i> wound healing activity	197
8.1	Cutaneous excision wound healing model	200
8.1.1	Grouping of animal	200
8.1.2	Surgical procedure	200
8.1.3	Treatment regimens	202
8.1.4	Observation	202
8.1.5	Results and discussion	203
8.2	Burn wound model	208
8.2.1	Grouping of animals	208
8.2.2	Surgical procedure	208
8.2.3	Treatment regimens	210
8.2.4	Observations	210
8.2.5	Result and discussion	211
8.3	References	217
CHAPTER 9 STABILITY STUDY 220-224		
9.0	Stability study	220
9.1	Procedure	220
9.2	Result and discussion	221
9.3	Conclusion	224
9.4	References	224

CHAPTER 10	SUMMARY AND CONCLUSIONS	225-231
10.0	Summary and conclusion	225
10.1	Pre-formulation study	225
10.2	Formulation development and evaluation of hydrogel sheet containing calendula flower extract	226
10.3	Formulation development and evaluation of collagen film containing calendula flower extract	227
10.4	<i>In-vitro</i> drug release study	227
10.5	Cell line study	228
10.5.1	MTT assay	228
10.5.2	Scratch assay	228
10.6	<i>In-vivo</i> study	229
10.6.1	Burn wound model for CFE loaded hydrogel sheet	229
10.6.2	Cutaneous excision wound healing model for CFE-collagen film	230
10.7	Stability study	231
10.8	Conclusion	231
