CHAPTER-1 INTRODUCTION	1-8
1.1 Traditional medicine	1
1.2 Chemical Markers/ Biological Markers	2
1.3 Liver disorders and herbal medicines	4
1.4 Selection of plant material	5
1.5 Standardization of herbal drugs	6
CHAPTER-2 LITERATURE REVIEW	9-50
2.1 <i>Feronia limonia</i> Linn	9
2.2 <i>Tecomella undulata</i> Seem	25
2.3 Liver	34
2.4 Research envisaged	49
CHAPTER-3 EXPERIMENTAL	51-71
3.1 Pharmacognostical studies and proximate analysis	51
3.1.1 Collection and identification of plant materials	51
3.1.2 Macroscopical studies	51
3.1.3 Microscopical studies	51
3.2 Proximate Analysis	52
3.2.1 Loss on drying	52
3.2.2 Total Ash	53
3.2.3 Extractive values	53
3.2.4 Estimation of in-organic elements	54
3.2.5 Determination of Total phenolic content	54

3.2.6	Determination of total flavanoid content	55
3.2.7	Determination of flavanol content	57
3.3	Phytochemical studies	58
3.3.1	Successive solvent extraction of plant drugs	58
3.3.2	Qualitative evaluation of successive extracts	59
3.3.3	TLC studies on the successive extracts of leaves, stem bark and root bark of <i>Feronia limonia</i>	60
3.3.4	HPLC studies on the methanolic extract of leaves stem bark and root bark <i>Feronia limonia</i>	60
3.3.5	Extraction, factionation and isolation of compound from leaves, stem bark and root bark of <i>Feronia limonia</i>	61
3.3.6	TLC studies on the extracts, fractions and isolated constituents of <i>Feronia limonia</i>	61
3.3.7	Qualitative determination of secondary metabolite in bioactive extracts and fractions from <i>Feronia limonia</i> by TLC	62
3.3.8	Determination of content marker in methanolic extract of stem barks of <i>Feronia limonia</i> by HPTLC	62
3.3.9	Determination of content of marker in methanolic extract of leaves, stem bark and root barks of <i>Feronia limonia</i> by HPLC	62
3.3.10	Characterisation of isolated compounds	63
3.4	<i>Tecomella undulata</i>	63
3.4.1	Thin layer chromatography studies on the successive extracts of <i>Tecomella undulata</i>	63
3.4.2	High Performance Liquid chromatography studies on the methanolic extract of <i>Tecomella undulata</i>	63
3.4.3	Extraction and fractionation of leaves <i>Tecomella undulata</i>	64
3.4.4	Identification of content marker in methanolic extract of leaves <i>Tecomella undulata</i> by HPLC	64
3.4.5	Extraction, Fractionation and isolation of compound	64

	from stem bark of <i>Tecomella undulata</i>	
3.4.6	HPLC studies on the extracts, fractions and isolated constituents from stem bark of <i>Tecomella undulata</i>	64
3.4.7	Determination of content of marker in methanolic extract of stem barks of <i>Tecomella undulata</i> by HPLC	65
3.4.8	Characterisation of isolated compounds	65
3.5	Biological Studies	65
3.5.1	<i>In vitro</i> hepatoprotective studies/ HepG2 cell lines	65
3.5.1 a	Cell culture	66
3.5.1 b	<i>In vitro</i> Cytotoxicity assay	66
3.5.1 c	CCL ₄ induced hepatotoxicity assay in HepG2 cells	67
3.5.1 d	Acridine orange/ ethidium bromide assay	67
3.5.2	<i>In vivo</i> studies	67
3.5.2 a	<i>In vivo</i> acute toxicity study	67
3.5.2 b	<i>In vivo</i> hepatoprotective studies	67
3.5.2 c	Plasma biochemical assays	69
3.5.2 d	Hepatic antioxidants and Lipid peroxidation	70
3.5.2 e	Histopathological evaluations of liver	71
3.6	Statistical analysis	71
CHAPTER-4	RESULTS AND DISCUSSION	72-135
4	<i>Feronia limonia</i>	
4.1	Pharmacognostical studies	72
4.1.1	Macroscopic features	72
4.1.2	Microscopic studies	73
4.1.3	Powder microscopic features of <i>Feronia limonia</i>	78
4.1.4	Proximate analysis	79
4.2	Phytochemical analysis of <i>Feronia limonia</i>	81
4.2.1	Successive solvent extraction	81
4.2.2	Phytochemical analysis of successive extracts	82
4.2.3	Total Phenolic, flavanoid and flavanol content of <i>Feronia limonia</i>	83
4.2.4	TLC of the extracts obtained in successive	84

	extraction	
4.2.5	Qualitative HPLC fingerprinting of <i>Feronia limonia</i>	88
4.3	Phytochemistry of <i>Feronia limonia</i>	90
4.3.2	TLC fingerprinting of extracts, fractions and isolated compound from <i>Feronia limonia</i>	94
4.3.3	Analytical HPLC of isolated compound	96
4.3.4	Phytochemical analysis of bioactive extracts, fraction from <i>F. limonia</i>	97
4.3.5	Determination of content marker in methanolic extract of leaves, stem and root bark of <i>F. limonia</i> by HPTLC and HPLC	98
4.3.6	Characterization of isolated compounds from <i>Feronia limonia</i>	108
4.4	Biological studies	114
4.4.1	<i>In vitro</i> cytotoxicity studies of extracts, fractions and isolated compounds from <i>Feronia limonia</i>	114
4.4.1.a	<i>In vitro</i> - cytotoxicity studies of <i>Feronia limonia</i> leaves (FLs)	114
4.4.1.b	Cytotoxicity assessment of <i>Feronia limonia</i> stem bark (FSBs)	115
4.4.1.c	<i>In vitro</i> cytotoxicity assessment of <i>Feronia limonia</i> root bark (FRBs)	115
4.4.2	<i>In vitro</i> Hepatoprotective potential of leaves, stem bark and root bark of <i>Feronia limonia</i>	117
4.4.2 a	<i>In vitro</i> hepatoprotective potential of <i>Feronia limonia</i> leaves	117
4.4.2.b	<i>In vitro</i> hepatoprotective potential of <i>Feronia limonia</i> stem bark	118
4.4.2.c	<i>In vitro</i> - Hepatoprotective potential of <i>Feronia limonia</i> root bark	120
4.4.3	Acridine orange/ethidium bromide (fluroscent dye) staining of <i>Feronia limonia</i>	121
4.4.3.a	AO/EB staining and cell morphology study on FLs	121

4.4.3.b	AO/EB staining and cell morphology study on FSBs	122
4.4.3.c	AO/EB staining and cell morphology study on FRBs	122
	<i>In Vivo</i> Studies	126
4.4.4	<i>In vivo</i> : acute toxicity studies of <i>Feronia limonia</i>	126
4.4.5	<i>In vivo</i> : hepatic antioxidants levels and lipid peroxidation of <i>Feronia limonia</i>	126
4.4.6	<i>In vivo</i> : CCl ₄ induced hepatotoxicity of <i>Feronia limonia</i>	129
4.4.7	<i>In vivo</i> : histopathology of liver	132
CHAPTER-5	RESULTS AND DISCUSSION	136-176
5	<i>Tecomella undulata</i>	
5.1	Pharmacognostical Evaluation	136
5.1.1	Macroscopic features	136
5.1.2	Microscopic studies	137
5.1.3	Proximate analysis	142
5.1.4	Elemental analysis	143
5.2	Preliminary phytochemical analysis of <i>Tecomella undulata</i>	144
5.2.1	Successive solvent extraction	144
5.2.2	Phytochemical analysis of successive extracts	144
5.2.3	TLC of the extracts obtained From <i>Tecomella undulata</i> in successive extraction	145
5.2.4	HPLC fingerprinting of <i>Tecomella undulata</i> leaves and stem bark methanolic extract	147
5.3.	Phytochemistry of <i>Tecomella undulata</i>	149
5.3.1	Extraction, fractionation and identification of compound from leaves of <i>Tecomella undulata</i>	149
5.3.2	Identification of MS-2 in leaves of <i>Tecomella undulata</i> by HPLC	150
5.3.3	Extraction, fractionation and isolation of compounds from stem bark of <i>Tecomella undulata</i>	152
5.3.4	Identification of isolated marker in bioactive	153

	methanolic extract and flavanoidal fraction of stem barks <i>Tecomella undulata</i> by HPLC	
5.3.5	Identification and quantification of MS-1 from stem bark of <i>T. undulata</i> by HPLC	154
5.3.6	Characterization of isolated compounds from <i>Tecomella undulata</i>	159
5.4	Biological studies	163
5.4.1	<i>In vitro</i> cytotoxicity studies of extracts, fractions and isolated compounds from <i>Tecomella undulata</i>	163
5.4.1.a	<i>In vitro</i> cytotoxicity studies of TLs	163
5.4.1.b	<i>In vitro</i> cytotoxicity studies of TSBs	163
5.4.2	<i>In vitro</i> hepatoprotective potential of <i>Tecomella undulata</i>	165
5.4.2.a	<i>In vitro</i> hepatoprotective potential of <i>Tecomella undulata</i> leaves	165
5.4.2.b	<i>In vitro</i> hepatoprotective potential of <i>Tecomella undulata</i> stem bark	167
5.4.3	Acridine orange/ethidium bromide staining of <i>Tecomella undulata</i>	168
5.4.3.a	Acridine orange/ethidium bromide staining of <i>Tecomella undulata</i> leaves	169
5.4.3.b	Acridine orange/ethidium bromide staining of <i>Tecomella undulata</i> stem bark	170
5.4.4	<i>In vivo</i> acute toxicity studies of <i>Tecomella undulata</i>	170
5.4.5	<i>In vivo</i> hepatic antioxidants levels and lipid peroxidation of <i>Tecomella undulata</i>	171
5.4.5.a	<i>In vivo</i> hepatic antioxidants levels and lipid peroxidation of TLs	171
5.4.5.b	<i>In vivo</i> hepatic antioxidants levels and lipid peroxidation of TSBs	172
5.4.6	<i>In vivo</i> CCl ₄ induced hepatotoxicity of <i>Tecomella undulata</i>	173
5.4.6.a	<i>In vivo</i> CCl ₄ induced hepatotoxicity of leaves	173

	<i>Tecomella undulata</i>	
5.4.6.b	<i>In vivo</i> CCl ₄ induced hepatotoxicity of stem bark	174
	<i>Tecomella undulata</i>	
5.4.7	<i>In vivo</i> : Histopathology of Liver	175
5.4.7.a	Morphological and histopathological changes in liver after treatment with TLs	175
5.4.7.b	Morphological and histopathological changes in liver after treatment with TSBs	176
CHAPTER-6	SUMMARY AND CONCLUSION	177-189
